

Palgrave Studies in the History of Science
and Technology

Series Editors
James Rodger Fleming
Colby College
Waterville, ME, USA

Roger D. Launius
Auburn, AL, USA

Designed to bridge the gap between the history of science and the history of technology, this series publishes the best new work by promising and accomplished authors in both areas. In particular, it offers historical perspectives on issues of current and ongoing concern, provides international and global perspectives on scientific issues, and encourages productive communication between historians and practicing scientists.

ACKNOWLEDGEMENTS

Research for this volume was part of the project “Assessing Arctic Futures: Voices, Resources, Governance”, [FOR 2008/027] Swedish Foundation for Strategic Environmental Research (Mistra), and part of the programme Mistra Arctic Futures in a Global Context. The project PI was Sverker Sörlin and co-PI was Nina Wormbs, KTH Royal Institute of Technology, Stockholm. We gratefully acknowledge the support from Mistra.

We also thank the Division of History of Science, Technology and Environment, KTH for support throughout the project and the completion of this volume, and Anna Svensson, said Division, for editing assistance.

Nina Wormbs gratefully acknowledges the support from the Swedish Foundation for Humanities and Social Sciences (RJ) as well as the Rachel Carson Centre for Environment and Society, Ludwig Maximilian Universität München and Deutsches Museum for the possibility of a visiting scholarship during the spring of 2018.

Lize-Marié van der Watt and Peder Roberts thank Justiina Dahl for helpful comments on their chapter.

Sverker Sörlin gratefully acknowledges support from NordForsk (Oslo): “REXSAC—Resource Extraction and Sustainable Arctic Communities”, NordForsk Center of Excellence.

CONTENTS

1	Introduction: Back to the Futures of an Uncertain Arctic	1
	Nina Wormbs	
2	Constructing Arctic Energy Resources: The Case of the Canadian North, 1921–1980	19
	Paul Warde	
3	Extracting the Future in Svalbard	47
	Dag Avango	
4	“Red Herring”: The Unpredictable Soviet Fish and Soviet Power in the 1930s	73
	Julia Lajus	
5	A Reindeer Herding People? Political Visions of Sami Futures	95
	Patrik Lantto	
6	Creating a Safe Operating Space for Business: The Changing Role of Arctic Governance	117
	Annika E. Nilsson	

7	Voicing Bipolar Futures: The Antarctic Treaty System and Arctic Governance in Historical Perspective Lize-Marié van der Watt and Peder Roberts	139
8	Political Regime Influences in the Barents Euro-Arctic Region Alexander Gnatenko and Andrian Vlachov	165
9	The Telecoupled Arctic: Assessing Stakeholder Narratives of Non-Arctic States Eric Paglia	189
10	Arctic Modernism: New Urbanisation Models for the Soviet Far North in the 1960s Ekaterina Kalemeneva	213
11	Conclusion: Anthropocene Arctic—Reductionist Imaginaries of a “New North” Sverker Sörlin	243
	Index	271

NOTES ON CONTRIBUTORS

Dag Avango is a Ph.D. holder in History of Technology, Division of History of Science, Technology and Environment at KTH Royal Institute of Technology, Stockholm. His research deals with the relationship between resource extraction, science and geopolitics in the Polar Regions, and effects on environments and societies, from a long-term historical perspective. A related field of research is on legacies of industry and how communities can deal with such legacies when building post-industrial futures, through remediation and heritage processes. He is a part of the leadership of the Nordic Centre of Excellence REXSAC (Resource Extraction and Sustainable Arctic Communities).

Alexander Gnatenko is a business analyst at Agile Montreal (Montréal, Canada). He holds a Ph.D. in Political Science from Perm State Research University (2011). His research focuses on the post-Soviet transformation of Russian economic system.

Ekaterina Kalemeneva is a senior lecturer at the Department of History, National Research University Higher School of Economics, St. Petersburg, and a junior researcher at the Centre for Historical Research. Her dissertation, “‘Making the Arctic comfortable’: projects and practices of urban development of the Soviet Far North in the 1950s–1970s”, explores changes in urbanisation models of the Soviet Arctic and the role of architects and scientists in the formation of a new

conception of the North in the Soviet Union. Her research interests include urban history, history of science, socialist architecture and environmental history.

Julia Lajus is an associate professor in the Department of History, and a head of Laboratory for Environmental and Technological History at National Research University Higher School of Economics, St. Petersburg. Her work is on Russian environmental history including history of environmental sciences and marine resources, especially in the Arctic. Recent articles have appeared in the *Journal of Historical Geography* and *PLOS One*.

Patrik Lantto is a professor of history, and the Director of Vaartoe—Centre for Sami Research at Umeå University, Sweden. He has worked in the field of Sami history for almost 25 years, and his main research focus is the Sami movement in Sweden and Swedish Sami policy in a contemporary perspective. He has published several books and numerous articles on these and related topics.

Annika E. Nilsson is a senior research fellow at Stockholm Environment Institute and Affiliated Faculty in Environmental Politics at KTH Royal Institute of Technology, Sweden. Her work focuses on the politics of Arctic change, environmental governance, communication at the science-policy interface, future scenarios, and the relationship between resource extraction and sustainable Arctic communities. She has participated in several scientific assessments under the auspices of the Arctic Council. Nilsson received her Ph.D. in environmental sciences in 2007, following a 20-year career as a science journalist. Her published writing includes the edited volume *Media and the Politics of Arctic Climate Change*.

Eric Paglia is a researcher at the Department of Security, Strategy and Leadership at the Swedish Defense University, Stockholm, Sweden. His research interests include environmental crisis and the history of global environmental governance; the relationship of science and geopolitics on Svalbard and the wider Arctic; and the concept of the Anthropocene in relation to environmental history and human–nature interactions. His dissertation *The Northward Course of the Anthropocene: Transformation, Temporality and Telecoupling in a Time of Environmental Crisis* (KTH Royal Institute of Technology 2016), as well as his ongoing postdoctoral research, encompasses these and other related topics.

Peder Roberts is a researcher at the Division of History of Science, Technology and Environment at KTH Royal Institute of Technology, Stockholm. He has published widely on the history of science, industry and environmental management in the Polar Regions during the twentieth century and on the history of midcentury oceanography. He is the leader of the European Research Council-sponsored project “Greening the Poles: Science, the Environment, and the Creation of the Modern Arctic and Antarctic.”

Sverker Sörlin is a professor of Environmental History, Division of History of Science, Technology and Environment at KTH Royal Institute of Technology, Stockholm. Against the backdrop of a career-long interest in the role of knowledge in environmentally informed modern societies his current work includes the science politics of climate change, the Anthropocene, and the history of global environmental governance. Among his edited or co-edited books on Arctic topics are *Narrating the Arctic* (2002), *Northscapes: History, Technology, and the Making of Northern Environments* (2013), and *Science, Geopolitics and Culture in the Polar Region* (2013). He is a co-author, with Libby Robin and Paul Warde, of *The Environment: A History of the Idea*. Johns Hopkins University Press, 2018.

Lize-Marié van der Watt is a researcher at the Division of History of Science, Technology and Environment at KTH Royal Institute of Technology, Stockholm. Trained as a historian, she studies the histories of polar pasts and polar futures, with a focus on the intersection between the environment, science, cultural heritage and critical geopolitics in the Arctic and Antarctica during the twentieth century. In addition to publishing articles and chapters in books, she was a co-editor of the Palgrave Macmillan volume on *Antarctica and the Humanities* (2016).

Andrian Vlachov is a senior lecturer and research fellow at National Research University Higher School of Economics (Moscow, Russia) and affiliated research fellow at Sociological institute of the Russian Academy of Science (St. Petersburg, Russia). His work focuses on the post-industrial transitions in the Arctic, especially Svalbard and Northwest Russia; the community development in the Russian North; and the international relations in the Arctic and Northern Europe. His upcoming doctoral dissertation, *Social Dimension of an Arctic Industrial Town: A Case of Barentsburg, Svalbard*, as well as his ongoing research, employs multidisciplinary approach within social sciences.

Paul Warde is a reader in Environmental History at the University of Cambridge and Research Director at the Centre for History and Economics at Cambridge. His research is on international energy and economic history and the historical formation of environmental expertise. Recent books include *Power to the People: Energy in Europe over the Last Five Centuries* with A. Kander and P. Malanima. Princeton University Press, 2013, *The Invention of Sustainability*. Cambridge University Press, 2018, and *The Environment: A History of the Idea*. with Libby Robin & Sverker Sörlin. Johns Hopkins University Press, 2018.

Nina Wormbs is an associate professor, Division of History of Science, Technology and Environment at KTH Royal Institute of Technology, Stockholm. She has worked on media history with a focus on infrastructures and with special interest in the appropriation and use of the electromagnetic spectrum for broadcasting in Europe. Recently, she has worked on environmental history and climate change. Publications include Christensen, Nilsson, and Wormbs, eds. *Media and the Politics of Arctic Climate Change: When the Ice Breaks*. Palgrave, 2013, and “The Assessed Arctic: How Monitoring Can Be Silently Normative.” In *The New Arctic*, edited by Evengård et al. Springer, 2015.
