Preface

The XIII IAEG Congress and 61st AEG Annual Meeting, San Francisco, USA, chose *Engineering Geology for a Sustainable World* as the theme for 2018. Based on the topical symposia and technical sessions, the proceedings are organized into six volumes and sub-categories as follows:

Volume 1: Slope Stability: Case Histories, Landslide Mapping, Emerging Technologies

Volume 2: Geotechnical and Environmental Site Characterization

Volume 3: Mining, Aggregates, Karst

Volume 4: Dams, Tunnels, Groundwater Resources, Climate Change

Volume 5: Geologic Hazards: Earthquakes, Land Subsidence, Coastal Hazards, and
Emergency Response

Volume 6: Advances in Engineering Geology: Education, Soil and Rock Properties, Modeling

Participants of this joint meeting had the option to submit either a full paper or only an abstract. The editors would like to thank the authors for their valuable contributions. One hundred eighty-six full papers were submitted for the review, and 153 papers successfully completed the process. Each paper submitted for the proceedings was peer-reviewed by two reviewers. Authors revised their papers in accordance with reviewers' comments. The reviewers, from across the globe, included professional experts as well as authors of other papers. The editors greatly appreciate the help provided by reviewers. A list of reviewers follows.

The editors are also very grateful to Karen Smith and Paisley Cato for their assistance throughout the review process.
