

# Palgrave Texts in Econometrics

**General Editor**  
Michael P. Clements

**Founding Editors**  
Kerry Patterson  
Terence Mills

This is a series of themed books in econometrics, where the subject is interpreted as including theoretical developments, applied econometrics and more specialized fields of application, for example financial econometrics, the econometrics of panel data sets, forecasting and so on. Each book in the series is directed to particular aspects of the underlying and unifying theme.

The pace of developments in econometrics has made it increasingly difficult for students and professionals alike to be aware of what is important and likely to be lasting in theory and practical applications. This series addresses important key developments within a unified framework, with individual volumes organised thematically. The series is relevant for both students and professionals who need to keep up with the econometric developments, yet is written for a wide audience with a style that is designed to make econometric concepts available to economists who are not econometricians.

*Titles include:*

Simon P. Burke and John Hunter  
MODELLING NON-STATIONARY TIME SERIES

Michael P. Clements  
EVALUATING ECONOMETRIC FORECASTS OF ECONOMIC AND FINANCIAL VARIABLES

Lesley Godfrey  
BOOTSTRAP TESTS FOR REGRESSION MODELS

Terence C. Mills  
MODELLING TRENDS AND CYCLES IN ECONOMIC TIME SERIES

Kerry Patterson  
A PRIMER FOR UNIT ROOT TESTING

Kerry Patterson  
UNIT ROOTS TESTS IN TIME SERIES VOLUME 1  
Key Concepts and Problems

Kerry Patterson  
UNIT ROOTS TESTS IN TIME SERIES VOLUME 2  
Extensions and Developments

Terence C. Mills  
ANALYSING ECONOMIC DATA  
A Concise Introduction

Giuseppe Arbia  
A PRIMER IN SPATIAL ECONOMETRICS  
With Applications in R

Terence C. Mills  
TIME SERIES ECONOMETRICS  
A Concise Introduction

John Hunter, Simon P. Burke and Alessandra Canepa  
MULTIVARIATE MODELLING OF NON-STATIONARY TIME SERIES

Michael P. Clements  
MACROECONOMIC SURVEY EXPECTATIONS

# Contents

<b>1</b>	<b>Introduction</b>	1
	References	4
<b>2</b>	<b>The Nature of Survey Expectations</b>	7
	2.1 Survey Expectations Data Sources	9
	2.2 Forecast Horizons and Targets	10
	2.3 Individual and Aggregate Expectations	12
	2.4 Means and Combining Information	16
	2.5 Which Survey Data?	20
	References	21
<b>3</b>	<b>Working with the Forecast Data</b>	25
	3.1 Calculating Moments from the Histograms	26
	3.2 Fitting Continuous Distributions to the Histograms	29
	3.3 Empirical Illustration: The US SPF Inflation Histograms	32
	References	34
<b>4</b>	<b>Assessing the Point Predictions</b>	37
	4.1 Assessing the Accuracy of Point Forecasts	38

4.1.1	Survey Expectations	38
4.1.2	Model Forecasts	40
4.2	Tests of Forecast Optimality or Rationality	42
4.3	Tests in the Presence of Instabilities	46
4.4	A Panel of Forecasters	48
4.4.1	Testing Consensus Forecasts When Agents Are Rational	48
4.4.2	Testing Consensus Forecasts When Agents Are Irrational	50
4.4.3	Pooling or Individual Regressions?	51
4.5	Testing for Optimality Under Asymmetric Loss	53
4.6	A Brief Review of the Empirical Evidence	57
4.6.1	Testing for Optimality	57
4.6.2	Testing Allowing for Instabilities	57
4.6.3	Testing Using a Panel of Forecasters	58
4.6.4	Rationality and Asymmetric Loss	58
	References	60
<b>5</b>	<b>Assessing the Accuracy of the Probability Distributions</b>	<b>65</b>
5.1	Density Evaluation	66
5.2	Density Comparison	68
5.3	Evaluating Regions of the Densities	71
5.4	Alternative Density Scoring Rules	72
5.5	Benchmark Density Forecasts	73
5.6	Empirical Results	78
5.6.1	The Aggregate Distributions	78
5.6.2	The Individual Distributions	85
5.6.3	Robustness of the Results to the Assumptions	90
5.7	Conclusion	93
	References	93
<b>6</b>	<b>Consistency of the Point Forecasts and Probability Distributions</b>	<b>97</b>
6.1	Calculating Bounds on the Central Moments of Histograms	99

6.2	Inconsistency and Asymmetric Loss	102
6.3	Rounding and the Reporting of Probability Forecasts	108
6.3.1	The SPF Probabilities of Decline and Rounding	109
6.3.2	The Consistency of the Decline Probability Forecasts and the Probability Distributions	115
6.3.3	The Consistency of the Decline Probability Forecasts and the Probability Distributions Allowing That the Decline Probability Forecasts Have Been Rounded	117
6.3.4	Rounding of Probability Forecasts and the Histogram Forecasts	118
6.4	Conclusions	120
	References	121
7	<b>Macroeconomic Uncertainty: Surveys Versus Models?</b>	123
7.1	Measuring Survey Uncertainty	125
7.1.1	Empirical Results	128
7.1.2	Are Survey Forecasters Targeting True Values?	131
7.2	Models for Inflation and Output Growth Uncertainty	133
7.2.1	MIDAS Specification	134
7.3	Empirical Results	138
7.4	Conclusions	140
	References	142
8	<b>Behavioural Models of Expectations Formation</b>	145
8.1	Evidence of Disagreement Among Forecasters	147
8.2	Adaptive Learning	149
8.3	Models of the Expectations Formation Process: Sticky Information	152
8.4	Models of the Expectations Formation Process: Noisy Information	155
8.5	Extensions to Basic IR Models	157

8.5.1	Heterogeneous Beliefs About Long-Run Outcomes	157
8.5.2	Heterogeneous Precision of Signals	158
8.5.3	Asymmetric Loss Functions	159
8.6	Empirical Evidence	160
8.7	Individual Forecasters	163
	References	169
<b>9</b>	<b>Expectations Shocks and the Macroeconomy</b>	<b>173</b>
9.1	Short-Run and Long-Run Identification Schemes in Structural VARs	174
9.2	Identification by Maximizing the Contribution of a Shock to the Forecast-Error Variance Decomposition	178
9.3	Expectations and Non-fundamental Shocks	181
9.4	Expectations Shocks and Macroeconomic Fluctuations: Empirical Evidence	182
9.5	Uncertainty Shocks	184

# List of Figures

Fig. 3.1	Estimated CDFs obtained by (1) joining up CDF points $\{t_i, F(t_i)\}$ with straight lines (solid line), (2) a normal approximation (dashed line), and (3) fitting a generalized beta distribution (longer-dashed line). Note that (1) corresponds to assuming the probability mass is uniform with a bin	31
Fig. 3.2	US SPF aggregate inflation histogram mean estimates	33
Fig. 3.3	US SPF aggregate inflation histogram variance estimates	33
Fig. 6.1	Proportion of consistent forecasts made by each respondent, ordered least to most. The point prediction is interpreted as the mean. From Clements (2014a)	103

# List of Tables

Table 2.1	The nature of the US SPF point predictions	12
Table 3.1	Example of a histogram return	28
Table 5.1	Aggregate density forecasts for output growth: SPF and benchmarks	81
Table 5.2	Aggregate density forecasts for inflation: SPF and benchmarks	83
Table 5.3	Evaluation of individual respondents' output histograms	86
Table 5.4	Evaluation of individual respondents' inflation histograms	88
Table 5.5	Evaluating density regions corresponding to events of interest	91
Table 5.6	Alternative density scoring rules for the aggregate density forecasts	92
Table 6.1	Example of a histogram return	100
Table 6.2	Bounds violations: mean, mode, median, and conservative	101
Table 6.3	Asymmetric loss and inconsistent point and histogram forecasts, individual regressions (by horizon), 1968:4 to 2010:4	105
Table 6.4	Forecast encompassing tests, 1968:4 to 2010:4	107
Table 6.5	Reported probabilities of decline of SPF respondents	111
Table 6.6	Widths of intervals assuming the reported probabilities reflect different degrees of rounding	113

**xvi**      **List of Tables**

Table 6.7	Example of a histogram return to 1992:Q4 survey and histogram allowing for rounding	116
Table 6.8	Bounds on histogram probabilities of decline and directly reported probabilities from Q4 surveys (497 forecasts)	117
Table 7.1	Results for survey forecasts: <i>ex ante</i> and RMSE forecast uncertainty	129
Table 7.2	Survey estimates: forecasting early-release data or true values	132
Table 7.3	Monthly indicator variables	134
Table 7.4	Estimates of macro uncertainty: MIDAS relative to survey forecasts	139
Table 8.1	Disagreement US SPF	148
