# Preface

The aim of this book is to provide a systematic description of pressure and temperature sensitive paints (PSP and TSP) developed since the 1980s for aerodynamics/fluid mechanics and heat transfer experiments. PSP is the first global optical technique that is able to give non-contact, quantitative surface pressure visualization for complex aerodynamic flows and provide tremendous information on flow structures that cannot be easily obtained using conventional pressure sensors. TSP is a valuable addition to other global temperature measurement techniques such as thermographic phosphors, thermochromic liquid crystals and infrared thermography. This book mainly covers research made in the United States, Japan, Germany, France, Great Britain and Canada. Excellent work on PSP in Russia has been described in the book “Luminescent Pressure Sensors in Aerodynamic Experiments” by V. E. Mosharov, V. N. Radchenko and S. D. Fonov of the Central Aerohydrodynamic Institute (TsAGI).

We are truly grateful to our colleagues in the field of PSP and TSP for kindly providing their paper drafts, offering comments, and allowing us to use their published results. Without their helps, this book cannot be completed. Especially, we would like to thank the following individuals and organizations:

T. Amer, K. Asai, J. H. Bell, T. J. Bencic, O. C. Brown, G. Buck, A. W. Burner, S. Burns, B. Campbell, B. F. Carroll, L. N. Cattafesta, J. Crafton, R. C. Crites, G. Dale, R. H. Engler, R. G. Erausquin, W. Goad, L. G. Goss, J. W. Gregory, M. Gounterman, M. Guille, M. Hamner, J. M. Holmes, C. Y. Huang, J. P. Hubner, J. Ingram, H. Ji, R. Johnston, J. D. Jordan, M. Kameda, M. Kammeyer, J. T. Kegelman, N. Lachendro, J. Lepicovsky, Y. Le Sant, X. Lu, Y. Mebarki, R. D. Mehta, K. Nakakita, C. Obara, D. M. Oglesby, T. G. Popernack, W. M. Ruyten, H. Sakaue, E. T. Schairer, K. S. Schanze, M. E. Sellers, Y. Shimbo, K. Teduka, S. D. Torgerson, B. T. Upchurch, A. N. Watkins.

# Table of Contents

1. Introduction .....	1
1.1. Pressure Sensitive Paint .....	2
1.2. Temperature Sensitive Paint .....	8
1.3. Historical Remarks .....	11
2. Basic Photophysics .....	15
2.1. Kinetics of Luminescence.....	15
2.2. Models for Conventional Pressure Sensitive Paint .....	18
2.3. Models for Porous Pressure Sensitive Paint .....	24
2.3.1. Collision-Controlled Model .....	26
2.3.2. Adsorption-Controlled Model.....	27
2.4. Thermal Quenching .....	31
3. Physical Properties of Paints .....	33
3.1. Calibration .....	33
3.2. Typical Pressure Sensitive Paints .....	34
3.3. Typical Temperature Sensitive Paints.....	45
3.4. Cryogenic Paints.....	50
3.5. Multi-Luminophore Paints.....	54
3.6. 'Ideal' Pressure Sensitive Paint .....	56
3.7. Desirable Properties of Paints.....	58
4. Radiative Energy Transport and Intensity-Based Methods .....	61
4.1. Radiometric Notation.....	61
4.2. Excitation Light .....	62
4.3. Luminescent Emission and Photodetector Response.....	65
4.4. Intensity-Based Measurement Systems .....	69
4.4.1. CCD Camera System .....	70
4.4.2. Laser Scanning System .....	74
4.5. Basic Data Processing.....	75
5. Image and Data Analysis Techniques.....	81
5.1. Geometric Calibration of Camera.....	82
5.1.1. Collinearity Equations.....	82
5.1.2. Direct Linear Transformation .....	85
5.1.3. Optimization Method .....	87
5.2. Radiometric Calibration of Camera .....	92
5.3. Correction for Self-Illumination .....	95
5.4. Image Registration.....	102
5.5. Conversion to Pressure .....	105
5.6. Pressure Correction for Extrapolation to Low-Speed Data.....	107
5.7. Generation of Deformed Surface Grid.....	112

6.	Lifetime-Based Methods .....	115
6.1.	Response of Luminescence to Time-Varying Excitation Light .....	116
6.1.1.	First-Order Model .....	116
6.1.2.	Higher-Order Model .....	118
6.2.	Lifetime Measurement Techniques.....	118
6.2.1.	Pulse Method .....	118
6.2.2.	Phase Method.....	119
6.2.3.	Amplitude Demodulation Method .....	121
6.2.4.	Gated Intensity Ratio Method .....	123
6.3.	Fluorescence Lifetime Imaging .....	128
6.3.1.	Intensified CCD Camera .....	128
6.3.2.	Internally Gated CCD Camera .....	130
6.4.	Lifetime Experiments .....	131
7.	Uncertainty .....	137
7.1.	Pressure Uncertainty of Intensity-Based Methods.....	137
7.1.1.	System Modeling .....	137
7.1.2.	Error Propagation, Sensitivity and Total Uncertainty .....	138
7.1.3.	Photodetector Noise and Limiting Pressure Resolution .....	141
7.1.4.	Errors Induced by Model Deformation .....	144
7.1.5.	Temperature Effect .....	145
7.1.6.	Calibration Errors.....	145
7.1.7.	Temporal Variations in Luminescence and Illumination .....	146
7.1.8.	Spectral Variability and Filter Leakage .....	146
7.1.9.	Pressure Mapping Errors.....	146
7.1.10.	Paint Intrusiveness .....	147
7.1.11.	Other Error Sources and Limitations .....	148
7.1.12.	Allowable Upper Bounds of Elemental Errors.....	149
7.1.13.	Uncertainties of Integrated Forces and Moments.....	150
7.2.	Pressure Uncertainty Analysis for Subsonic Airfoil Flows .....	151
7.3.	In-Situ Calibration Uncertainty .....	156
7.3.1.	Experiments .....	156
7.3.2.	Simulation .....	159
7.4.	Pressure Uncertainty of Lifetime-Based Methods .....	163
7.4.1.	Phase Method.....	163
7.4.2.	Amplitude Demodulation Method .....	164
7.4.3.	Gated Intensity Ratio Method .....	166
7.5.	Uncertainty of Temperature Sensitive Paint .....	169
7.5.1.	Error Propagation and Limiting Temperature Resolution.....	169
7.5.2.	Elemental Error Sources .....	170
8.	Time Response .....	175
8.1.	Time Response of Conventional Pressure Sensitive Paint.....	175
8.1.1.	Solutions of Diffusion Equation.....	175
8.1.2.	Pressure Response and Optimum Thickness.....	178
8.2.	Time Response of Porous Pressure Sensitive Paint .....	182
8.2.1.	Deviation from the Square-Law .....	182
8.2.2.	Effective Diffusivity .....	183
8.2.3.	Diffusion Timescale .....	186

---

8.3.	Measurements of Pressure Time Response.....	187
8.4.	Time Response of Temperature Sensitive Paint .....	194
8.4.1.	Pulse Laser Heating on Thin Metal Film .....	195
8.4.2.	Step-Like Jet Impingement Cooling .....	198
9.	Applications of Pressure Sensitive Paint .....	201
9.1.	Low-Speed Flows .....	201
9.1.1.	Airfoil Flows .....	201
9.1.2.	Delta Wings, Swept Wings and Car Models.....	207
9.1.3.	Impingement Jet.....	214
9.2.	Subsonic, Transonic and Supersonic Wind Tunnels.....	215
9.2.1.	Aircraft Model in Transonic Flow .....	215
9.2.2.	Supercritical Wing at Cruising Speed .....	221
9.2.3.	Transonic Wing-Body Model .....	223
9.2.4.	Laser Scanning Pressure Measurement on Transonic Wing .....	225
9.2.5.	Boundary Layer Control in Supersonic Inlets.....	226
9.3.	Hypersonic and Shock Wind Tunnels.....	230
9.3.1.	Expansion and Compression Corners .....	230
9.3.2.	Moving Shock Impinging to Cylinder Normal to Wall.....	236
9.4.	Cryogenic Wind Tunnels.....	237
9.5.	Rotating Machinery .....	242
9.5.1.	Laser Scanning Measurements.....	242
9.5.2.	CCD Camera Measurements.....	247
9.6.	Impinging Jets.....	249
9.7.	Flight Tests .....	256
9.8.	Micronozzle .....	260
10.	Applications of Temperature Sensitive Paint .....	263
10.1.	Hypersonic Flows .....	263
10.2.	Boundary-Layer Transition Detection .....	270
10.3.	Impinging Jet Heat Transfer .....	275
10.4.	Shock/Boundary-Layer Interaction.....	280
10.5.	Laser Spot Heating and Heat Transfer Measurements.....	282
10.6.	Hot-Film Surface Temperature in Shear Flow.....	289
	References .....	293
	Appendix A. Calibration Apparatus .....	313
	Appendix B. Recipes of Typical Pressure and Temperature Sensitive Paints.....	317
	Appendix C. Vendors .....	319
	Color Plates .....	321
	Index.....	327
