To the Memory of Gill-Chin Lim

As this book was in its final stages of production, Gill died tragically in an auto accident on the Michigan State University campus in East Lansing. Some of the contributors to the book were old friends, some were new, but we all wish to join in its dedication to his memory. Of course, we are only a handful of the hundreds, perhaps thousands, who were shocked and grieved by his premature passing. The scale of the outpouring of condolences, sympathies and remembrances by his friends, colleagues and students was truly amazing until we remember that Gill was not only a first-class scholar but a wonderful human being. He had an infinite pool of close friends and admirers and not a single enemy.

Born in Korea, Gill received B.S. and M.S. degrees in Architectural Engineering at Seoul National University before coming to the United States to take his Master's in Planning at Harvard and his Ph.D. in Planning at Princeton. He started his teaching career at Princeton, later moving to Northwestern, then to Illinois, before on to Michigan State University where he established a new program in international planning. Along the way, he founded an international program in Public Policy and Management at the Korea Development Institute (Korea's premier think tank) where he served as the Dean for some years and continued to be a Distinguished Professor there at the time of his death. He published (at our last count) 32 books, 45 refereed journal articles and 79 book chapters.

Gill was a global citizen, but close enough to his cultural roots to wear Hanbok (Korean national costume) at social functions. He gave his time as generously to his students as to famous academics; the fable is that he knew each student in classes of 200 by name, but in Gill's case it was probably true. He was a published poet, artist and an activist for world peace. No one played a larger role in promoting global planning in the profession (he was a leading figure in the Global Planning Educators Interest Group), and he was generous with his own resources in financing student travel grants and prizes, not to mention raising the tradition of Asian gift giving to a new level. Gill, we miss you, but we are proud that one of your last publications will be in our book.

Preface

The papers in this book were first presented at a conference at the Villa Serbelloni in Bellagio, Italy, better known as the Rockefeller Foundation Bellagio Center, in August 2002. The conference was a wonderful experience from both a professional and a hedonistic perspective. It was supported by travel funds and payments in-kind (food and accommodation) from the Rockefeller Foundation, and the editors are very grateful for this support which made the conference, a special issue of the *Annals of Regional Science*, and this book possible. The idea was to focus on the specific urban impacts of globalization and to give substantial but not 100% attention to the major regions in the developing world; scholars from 12 countries participated in the book. This is not the first research project on this very important topic, and it will not be the last. We hope that it contributes to this interesting debate.
