Contents

1	Introduction	1
2	Homogenous Transformations	5
2.1	Transformation of Coordinates and Homogenous Transformations	5
2.2	Velocity and Acceleration of a Rigid Body	15
2.3	Description of Geometry of Rigid Links	17
2.4	Kinetic Energy and Lagrange Operators	19
2.5	Potential Energy of Gravity Forces	25
2.6	Generalised Forces and Equations of Motion	26
2.7	Generalisation of the Procedure	27
3	The Rigid Finite Element Method	35
3.1	Division of the Flexible Link into Rigid Finite Elements and Spring-Damping Elements	37
3.2	Kinetic Energy of the Flexible Link	45
3.3	Energy of Deformation and Dissipation of Energy of Link p ...	53
3.4	Synthesis of Equations	58
3.5	Linear Model	61
3.6	Parameters of Rigid Finite Elements and Spring-Damping Elements	69
4	Modification of the Rigid Finite Element Method	83
4.1	Generalised Coordinates and Transformation Matrices	83
4.2	Kinetic Energy of the Flexible Link and Its Derivatives	86
4.3	Potential Energy of the Flexible Link	90
4.4	Synthesis of Equations	92
4.5	Linear Model	94
5	Calculations for a Cantilever Beam and Methods of Integrating the Equations of Motion	103
5.1	Equations of the Free Vibrations of a Beam	103
5.1.1	Classical Rigid Finite Element Method	
	Nonlinear Model	104

5.1.2	Classical Rigid Finite Element Method Linear Model	111
5.1.3	Modified Rigid Finite Element Method Nonlinear Model	113
5.1.4	Modified Rigid Finite Element Method Linear Model	116
5.2	Integrating the Equations of Motion	119
5.2.1	Newmark Method	123
5.2.2	Euler and Runge–Kutta Methods	123
5.2.3	Step-Size Control	125
5.2.4	Stiff Systems of Differential Equations	131
5.3	Numerical Effectiveness of Models and Methods of Integrating the Equations of Motion	135
6	Verification of the Method	141
6.1	Vibrations of Whippy Beams	141
6.1.1	Frequencies of Free Vibrations for a Uniform Beam	143
6.1.2	Linear and Non-linear Vibrations of a Viscoelastic Beam	145
6.1.3	Kane’s Manipulator	153
6.1.4	Analysis of Large Deflections	163
6.2	Experimental Verification of the Method	166
6.2.1	Large Amplitude Vibrations of a Fixed Whippy Beam	167
6.2.2	Sandia Manipulator	173
7	Applications	183
7.1	Offshore Crane	183
7.1.1	Discretisation of Flexible Links and the Equations of Motion	183
7.1.2	Numerical Calculations	188
7.2	Telescopic Rapier	192
7.2.1	Discretisation of the Internal Rapier and the Equations of Motion	194
7.2.2	Numerical Calculations	197
7.3	A-Frame	198
7.3.1	Classical Rigid Finite Element Method Linear Model	205
7.3.2	Modified Rigid Finite Element Method Linear Model	211
7.3.3	Description of Programmes and Results of Calculations	212
7.4	Further Applications	216
	References	219
	Index	223
