We dedicate these volumes to our long-time colleagues
Hartmut Rothe and **Theodoros Pitsios**
in appreciation of their friendship and unique contributions to
primatology and paleoanthropology.

Preface to the Series

Palaeoanthropology is perhaps the most multidisciplinary of all the sciences. Any complete account of the evolution and of the cultural and biological contexts of *Homo sapiens* must combine information from geology, paleoecology, primatology, evolutionary biology and a host of other fields. Above all, historical information garnered from the fossil record needs to be combined with, and interpreted in the light of, what we know of the living world. In these volumes we have brought together contributions by a variety of leading specialists that reflect the broad spectrum of modern paleoanthropology, in an attempt to provide a resource that we hope will be useful to professionals and students alike.

Volume I of this three-volume Handbook deals with principles, methods, and approaches. In recent years enormous advances have been made in such areas as phylogenetic analysis, evolutionary theory and philosophy, paleoecology, and dating methods. The contributions aim to present the state of the art in these and other relevant fields, as well as to furnish succinct introductions to them and to reflect the many ways in which they interact. Human beings are primates, and Volume II is devoted to primate origins, evolution, behavior, and adaptive variety. In this compilation the emphasis is on the integration of fossil data with the vast amount that is now known of the behavior and ecology of living primates in natural environments. The third and final volume deals directly with the fossil and molecular evidence for the evolution of *Homo sapiens* and its fossil relatives (the family Hominidae or subfamily Homininae, according to taste, a matter that we have left to each individual contributor). Paleoanthropology is a pluralistic and actively developing field in which much remains to be settled, and we have not tried to impose any uniformity of viewpoint on our authors. Instead, while maintaining an emphasis on the data, we have encouraged them to express their individual interpretations rather than to cover all possible points of view. This has inevitably led to a certain degree of heterogeneity of opinion between the covers of this Handbook; but we believe that this is the best way of reflecting the excitement and momentum of the field and that it is best for the reader to be left to reach his or her own conclusions. Science is, after all, a process rather than a static product, and one of our primary aims here is to reflect the ongoing dynamism of that process in paleoanthropology.

We thank all of the contributors to these volumes for their participation. Some initially responded enthusiastically while others needed convincing about the basic strategy of the Handbook, but all responded marvellously to the

particular needs of a corporate effort such as this one. We are particularly grateful to those authors who responded at short notice to needs that became apparent only as the project progressed. This series was conceived in collaboration with Prof. Hartmut Rothe of the University of Göttingen, who was later forced to withdraw for reasons beyond his control. We thank him most warmly for his creativity in the conceptual stages and for his subsequent moral support. The laborious process of putting together the volumes could not have been accomplished without the cheerful help of Thorolf Hardt, whose active involvement was indispensable throughout.

This project could never have come to fruition without the enthusiastic support of Dr. Dieter Czeschlik, editor life sciences at Springer Publishing, and the efficient assistance of Mrs. Ursula Gramm. We express our deep gratitude to Mrs. Susanne Friedrichsen and Mrs. Caroline Simpson, who showed both care and commitment during the phases of copyediting and product development. The continuous cooperation and dialogue with them and their professionalism gave us the courage to see the project through. Further thanks go to Mrs. Sandra Fabiani and her colleagues at Springer Publishing, who prepared the eReference. Ms. Nitya Swaruba, compositor at SPi Technologies, deserves warm thanks for her efficient help, and finally our gratitude goes in addition to Britta Hardt, Peter Menke and Monika Sandführ, who also rendered much valuable assistance.

Winfried Henke and Ian Tattersall
Mainz and New York City
November, 2006

Table of Contents

Volume 1

1 Historical Overview of Paleoanthropological Research	1
<i>Winfried Henke</i>	
2 Evolutionary Theory in Philosophical Focus	57
<i>Philippe Huneman</i>	
3 The Ontogeny–Phylogeny Nexus in a Nutshell: Implications for Primateology and Paleoanthropology	103
<i>Peter R. Menke</i>	
4 Principles of Taxonomy and Classification: Current Procedures for Naming and Classifying Organisms	141
<i>Michael Ohl</i>	
5 Quantitative Approaches to Phylogenetics	167
<i>Kaila E. Folinsbee · David C. Evans · Jörg Fröbisch · Linda A. Tsuji · Daniel R. Brooks</i>	
6 Homology: A Philosophical and Biological Perspective	217
<i>Olivier Rieppel</i>	
7 Taphonomic and Diagenetic Processes	241
<i>Gisela Grupe</i>	
8 Archeology	261
<i>Miriam N. Haidle</i>	
9 Contribution of Stable Light Isotopes to Paleoenvironmental Reconstruction	289
<i>Julia Lee-Thorp · Matt Sponheimer</i>	
10 Chronometric Methods in Paleoanthropology	311
<i>Günther A. Wagner</i>	

11 Geological Background of Early Hominid Sites in Africa	339
<i>Ottmar Kullmer</i>	
12 Paleoclimate	357
<i>Keith Alverson</i>	
13 Paleosols	383
<i>Gregory Retallack</i>	
14 Quaternary Deposits and Paleosites	409
<i>Klaus-Dieter Jäger</i>	
15 Zoogeography: Primate and Early Hominin Distribution and Migration Patterns	421
<i>Alan Turner · Hannah O'Regan</i>	
16 Patterns of Diversification and Extinction	441
<i>Walter Etter</i>	
17 Paleoecology: An Adequate Window on the Past?	503
<i>Thorolf Hardt · Britta Hardt · Peter R. Menke</i>	
18 Hominin Paleodiets: The Contribution of Stable Isotopes	555
<i>Matt Sponheimer · Julia Lee-Thorp</i>	
19 Estimation of Basic Life History Data of Fossil Hominoids	587
<i>Helmut Hemmer</i>	
20 Population Genetics and Paleoanthropology	621
<i>John H. Relethford</i>	
21 Ancient DNA	643
<i>Susanne Hummel</i>	
22 Paleodemography of Extinct Hominin Populations	673
<i>Janet Monge · Alan Mann</i>	
23 Modeling the Past: The Primatological Approach	701
<i>R. W. Sussman · Donna Hart</i>	
24 Modeling the Past: The Paleoethnological Evidence	723
<i>Paolo Biagi</i>	

25 Modeling the Past: The Linguistic Approach	747
<i>Bernard Comrie</i>	
26 General Principles of Evolutionary Morphology	769
<i>Gabriele A. Macho</i>	
27 Computer-Based Reconstruction: Technical Aspects and Applications	787
<i>Lilian Ulhaas</i>	
28 Prospects and Pitfalls	815
<i>Jean-Jacques Hublin</i>	

Volume 2

1 Primate Origins and Supraordinal Relationships: Morphological Evidence	831
<i>Mary T. Silcox · Eric J. Sargis · Jonathan I. Bloch · Doug M. Boyer</i>	
2 Molecular Evidence on Primate Origins and Evolution	861
<i>Hans Zischler</i>	
3 Fossil Record of the Primates from the Paleocene to the Oligocene	889
<i>D. Tab Rasmussen</i>	
4 Fossil Record of Miocene Hominoids	921
<i>David R. Begun</i>	
5 The Biotic Environments of the Late Miocene Hominids	979
<i>Jordi Agustí</i>	
6 Postcranial and Locomotor Adaptations of Hominoids	1011
<i>Carol V. Ward</i>	
7 Hominoid Cranial Diversity and Adaptation	1031
<i>Alan Bilsborough · Todd C. Rae</i>	
8 Dental Adaptations of African Apes	1107
<i>Mark F. Teaford · Peter S. Ungar</i>	
9 Evolution of the Primate Brain	1133
<i>Dean Falk</i>	

10 Primate Life Histories	1163
<i>Elke Zimmermann · Ute Radespiel</i>	
11 The Biology and Evolution of Ape and Monkey Feeding	1207
<i>Joanna E. Lambert</i>	
12 Great Ape Social Systems	1235
<i>Angela Meder</i>	
13 Primate Intelligence	1273
<i>Richard W. Byrne</i>	
14 Chimpanzee Hunting Behavior	1295
<i>Nicholas E. Newton-Fisher</i>	
15 Cooperation, Coalition, and Alliances	1321
<i>Charlotte K. Hemelrijk · Jutta Steinhauser</i>	

Volume 3

1 Potential Hominoid Ancestors for Hominidae	1347
<i>George D. Koufos</i>	
2 Defining Hominidae	1379
<i>Jeffrey H. Schwartz</i>	
3 Origins of Homininae and Putative Selection Pressures Acting on the Early Hominins	1409
<i>Bogusław Pawłowski</i>	
4 Role of Environmental Stimuli in Hominid Origins	1441
<i>Elisabeth S. Vrba</i>	
5 The Origins of Bipedal Locomotion	1483
<i>William E. H. Harcourt-Smith</i>	
6 The Earliest Putative Hominids	1519
<i>Brigitte Senut</i>	
7 The Species and Diversity of Australopiths	1539
<i>William H. Kimbel</i>	

8 Defining the Genus <i>Homo</i>	1575
<i>Mark Collard · Bernard Wood</i>	
9 The Earliest Putative <i>Homo</i> Fossils	1611
<i>Friedemann Schrenk · Ottmar Kullmer · Timothy Bromage</i>	
10 <i>Homo ergaster</i> and Its Contemporaries	1633
<i>Ian Tattersall</i>	
11 Defining <i>Homo erectus</i>: Size Considered	1655
<i>Susan C. Antón · Fred Spoor · Connie D. Fellmann · Carl C. Swisher III</i>	
12 Later Middle Pleistocene <i>Homo</i>	1695
<i>G. Philip Rightmire</i>	
13 Neanderthals and Their Contemporaries	1717
<i>Katerina Harvati</i>	
14 Origin of Modern Humans	1749
<i>Günter Bräuer</i>	
15 Analyzing Hominid Phylogeny	1781
<i>David Strait · Frederick E. Grine · John G. Fleagle</i>	
16 Phylogenetic Relationships (Biomolecules)	1807
<i>Todd R. Disotell</i>	
17 Population Biology and Population Genetics of Pleistocene Hominins	1825
<i>Alan R. Templeton</i>	
18 Species Concepts and Speciation: Facts and Fantasies	1861
<i>Colin Groves</i>	
19 Human Environmental Impact in the Paleolithic and Neolithic	1881
<i>Wolfgang Nentwig</i>	
20 The Dentition of American Indians: Evolutionary Results and Demographic Implications Following Colonization from Siberia	1901
<i>Christy G. Turner II · G. Richard Scott</i>	

- 21 Overview of Paleolithic Archeology 1943**
Nicholas Toth · Kathy Schick
- 22 The Network of Brain, Body, Language, and Culture 1965**
Steven Mithen
- 23 Cultural Evolution in Africa and Eurasia During the Middle
and Late Pleistocene 2001**
Nicholas Conard
- 24 Paleoanthropology and the Foundation of Ethics: Methodological
Remarks on the Problem of Criteriology 2039**
Mathias Gutmann · Michael Weingarten

Winfried Henke is currently Professor of Anthropology at the Johannes Gutenberg University of Mainz. He was born in 1944 in Ludwigshorst/Pomerania, Germany, and studied biology, anthropology and geosciences in Kiel and Braunschweig. He received his Ph.D. from the University of Kiel in 1971, his thesis focusing on a prehistoric anthropological topic. In 1990 he habilitated with a monograph on the “Anthropology of Early Paleolithics and Mesolithics” at the University of Mainz.

Research activities in various countries (Iceland, Israel, Jordan, US, Greece) and extensive teaching assignments in the Erasmus exchange program at numerous European Universities followed. From 1996 to 2004, he acted as anthropology referee for the German Research Foundation (DFG). He served at the advisory boards of many scientific journals, and was advisory consultant to museums, e.g. the Neanderthal Museum (Mettmann, Germany). In 2006 he was awarded with the honorary doctorate of the National and Kapodistrian University of Athens and is an elected member of the German Academy of

Sciences Leopoldina. Areas of research and teaching: paleoanthropology, primatology, prehistoric anthropology, comparative morphology, systematics, demography and sociobiology.

He has published approximately 180 original papers in scientific journals and anthologies, and over 600 book reviews. He is author, co-author (together with H. Rothe) and editor of several books, including such standard works as “Paläoanthropologie” and “Stammesgeschichte des Menschen” (published at Springer-Verlag).

Ian Tattersall is currently Curator in the Division of Anthropology of the American Museum of Natural History in New York City. Born in England and raised in East Africa, he has carried out both primatological and paleontological fieldwork in countries as diverse as Madagascar, Vietnam, Surinam, Yemen and Mauritius. Trained in archeology and anthropology at Cambridge, and in geology and vertebrate paleontology at Yale, Tattersall has concentrated his research since the 1960s in two main areas: the analysis of the human fossil record and its integration with evolutionary theory, and the study of the ecology and systematics of the lemurs of Madagascar. Tattersall is also a prominent interpreter of human paleontology to the public, with several trade books to his credit, among them *The Monkey in the Mirror* (2002), *Extinct Humans* (with Jeffrey Schwartz, 2000), *Becoming Human: Evolution and Human Uniqueness* (1998) and *The Last Neanderthal: The Rise, Success and Mysterious Extinction of Our Closest Human Relatives* (1995; rev. 1999) as well as several articles in *Scientific American* and the co-editorship of the definitive *Encyclopedia of Human Evolution and Prehistory*. He lectures widely, and, as curator, has also been responsible for several major exhibits at the American Museum of Natural History, including *Ancestors: Four Million Years of Humanity* (1984); *Dark Caves, Bright Visions: Life In Ice Age Europe* (1986); *Madagascar: Island of the Ancestors* (1989); *The First Europeans: Treasures from the Hills of Atapuerca* (2003); and the highly acclaimed *Hall of Human Biology and Evolution* (1993).

Thorolf Hardt graduated in biology and is currently a PhD student at the Institute of Anthropology, University of Mainz. He was born in 1973 in Neustadt (RhP/Germany) and studied anthropology, paleontology and zoology in Kiel and Mainz. At present his research activities are focused on Geometric Morphometrics, functional morphology and evolutionary biology in Primates.
