Smooth S^1 Manifolds

by Wolf Iberkleid and Ted Petrie

Introduction. Part I, Part II, Consequences of non-singularity, 1
Recent developments.

PART I. The Algebraic Tools	25
1. Preliminary remarks on G spaces	26
2. Structure of smooth G manifolds in terms of handles	46
3. Multiplicative properties of $h^*()$	54
4. Fixed point free actions	61
5. The universal coefficient theorem	74
6. Poincaré duality	83
References	99
PART II. A setting for smooth S^1 actions	101
1. Introduction and notation	102
2. Specifics about S^1	105
3. The relation between completion and localization	109
4. Remarks on spin^c structures	112
5. The induction homomorphism	116
6. Differential Structure and the representations TX_P	119
7. The topology of some real algebraic varieties	122
8. Real algebraic actions on $P(\mathbb{C}^{4n})$	125
9. The case of finite isotropy groups	130
10. Induction	146
References	160
Symbol index	161
