Preface

The present volume contains the invited lectures given at the Symposium on Integrable Quantum Field Theory, organised by the Research Institute for Theoretical Physics of the University of Helsinki in Tvärminne, Finland, 23-27 March, 1981.

We are grateful to Dr. E.K. Sklyanin, who, although unable to attend due to a last-minute delay, agreed to submit together with Dr. P.P. Kulish an expanded review of the work done by the Leningrad school.

The symposium received generous financial support from the Academy of Finland and NORDITA, which is gratefully acknowledged.

Jarmo Hietarinta

Claus Montonen

Contents

H.B. THACKER	
The Quantum Inverse Method and Green's Functions for Completely Integrable Field Theories	1
P.P. KULISH, E.K. SKLYANIN	
Quantum Spectral Transform Method. Recent Developments	61
H.J. DE VEGA	
The Inverse Scattering Transformation and the Functional Integration Method	120
W.J. ZAKRZEWSKI	
Classical Solutions to CP^{n-1} Models and Their Generalizations	160
H. EICHENHERR	
Geometrical Analysis of Integrable Sigma Models	189
E. CORRIGAN	
Multimonopoles	215
