CONTENTS

Prologue	1
I. Analyticity spaces, trajectory spaces and linear mappings between them	
Introduction	10
I.1. The analyticity space $S_{X,A}$	11
I.2. The trajectory space $T_{X,A}$	22
I.3. Pairing and duality of $S_{X,A}$ and $T_{X,A}$	31
I.4. Continuous linear mappings between analyticity spaces and trajectory spaces	37
II. Illustrative examples of analyticity spaces	
Introduction	45
II.1. Analyticity spaces based on the Laplacian operator	47
II.2. The Gelfand-Shilov spaces S_{α}^{β}	55
II.3. Analyticity spaces related to classical polynomials	60
II.4. Analyticity spaces related to unitary representations of Lie groups	71
III. Compound spaces, tensor products and kernel theorems	
Introduction	77
III.1. Compound spaces	78
III.2. The analyticity-trajectory space $ST_{Z;C,D}$	82
III.3. The trajectory-analyticity space $TS_{Z;C,D}$	98
III.4. Pairing and duality of $ST_{Z;C,D}$ and $TS_{Z;C,D}$	103
III.5. An inclusion diagram for compound spaces	108
III.6. Topological tensor products and kernel theorems	116
Appendix	131

IV

IV.	Algebras of continuous linear mappings on analyticity spaces and trajectory spaces	
	Introduction	133
IV.1.	The algebra $L(S_{X,A})$	135
IV.2.	The algebra $L(T_{X,A})$	149
IV.3.	The algebra $E(S_{X,A})$	162
IV.4.	Operator ideals in $L(S_{X,A})$ and $L(T_{X,A})$	170
IV.5.	The nuclear case, a matrix calculus	175
IV.6.	The construction of nuclear analyticity spaces on which a given set of operators acts continuously	187
IV.7.	Some applications to quantum statistical mechanics	194
V.	A mathematical interpretation of Dirac's formalism for quantum mechanics	
	Introduction	209
V.1.	The concept of Dirac basis	211
V.2.	A measure theoretical Sobolev lemma	218
V.3.	The standard structure of a Dirac basis consisting of generalized eigenvectors for self-adjoint operators	227
V.4.	Commutative multiplicity theory	230
V.5.	Dirac bases of generalized eigenvectors for self-adjoint operators	234
V.6.	A mathematical interpretation of the formal computation with bras and kets in Dirac's formalism	237
V.7.	Matrices with respect to Dirac bases	244
	Epilogue	252
	References	260
	Index	265
	List of symbols	270
