Foreword

This volume contains the texts of the main talks delivered at the International Symposium on Complex Geometry and Analysis held in Pisa, May 23–27, 1988. The Symposium was organized on the occasion of the sixtieth birthday of Edoardo Vesentini, by some of his former students, in appreciation of his many contributions to mathematics, of his teaching and advice.

The aim of the lectures was to describe the present situation, the recent developments and research trends in several relevant topics in Complex Geometry and Analysis, that is in those fields in which the mathematical activity of E. Vesentini is most fruitful and inspiring. The contributors are distinguished mathematicians who have actively collaborated with the mathematical school in Pisa over the past thirty years.

The organizers would like to thank all the supporting institutions, and, in particular, the Comitato per la Matematica (CNR) and the Gruppo Nazionale di Geometria Analitica ed Analisi Complessa (MPI).

The Organizing Committee

V. Villani (chairman)

T. Franzoni

G. Gentili

G. Gigante

S. Levi

F. Ricci

Contents

Foreword	III
M.F. ATIYAH Hyperkähler Manifolds	1
E. CALABI Affine Differential Geometry and Holomorphic Curves	15
J.W. COGDELL, I.I. PIATETSKI-SHAPIRO The Meromorphic Continuation of Kloosterman-Selberg Zeta Functions....	23
G. DETHLOFF, H. GRAUERT Deformation of Compact Riemann Surfaces Y of Genus p with Distinguished Points $P_1, \dots, P_m \in Y$	37
S. KOBAYASHI On Moduli of Vector Bundles	45
A. KORÁNYI, H.M. REIMANN Quasiconformal Mappings on CR Manifolds	59
R. NAGEL On the Stability of Positive Semigroups Generated by Operator Matrices ..	77
R. NARASIMHAN The Levi Problem on Algebraic Manifolds	85
H.H. SCHAEFER A Banach-Steinhaus Theorem for Weak* and Order Continuous Operators .	93
J.-P. VIGUÉ Fixed Points of Holomorphic Mappings	101
List of participants	107
