

# Lecture Notes in Physics

## New Series m: Monographs

### Editorial Board

H. Araki

Research Institute for Mathematical Sciences  
Kyoto University, Kitashirakawa  
Sakyo-ku, Kyoto 606, Japan

E. Brézin

Ecole Normale Supérieure, Département de Physique  
24, rue Lhomond, F-75231 Paris Cedex 05, France

J. Ehlers

Max-Planck-Institut für Physik und Astrophysik, Institut für Astrophysik  
Karl-Schwarzschild-Strasse 1, W-8046 Garching, FRG

U. Frisch

Observatoire de Nice  
B. P. 139, F-06003 Nice Cedex, France

K. Hepp

Institut für Theoretische Physik, ETH  
Hönggerberg, CH-8093 Zürich, Switzerland

R. L. Jaffe

Massachusetts Institute of Technology, Department of Physics  
Center for Theoretical Physics  
Cambridge, MA 02139, USA

R. Kippenhahn

Rautenbreite 2, W-3400 Göttingen, FRG

H. A. Weidenmüller

Max-Planck-Institut für Kernphysik  
Postfach 10 39 80, W-6900 Heidelberg, FRG

J. Wess

Lehrstuhl für Theoretische Physik  
Theresienstrasse 37, W-8000 München 2, FRG

J. Zittartz

Institut für Theoretische Physik, Universität Köln  
Zülpicher Strasse 77, W-5000 Köln 41, FRG

### Managing Editor

W. Beiglböck

Assisted by Mrs. Sabine Landgraf  
c/o Springer-Verlag, Physics Editorial Department V  
Tiergartenstrasse 17, W-6900 Heidelberg, FRG

## The Editorial Policy for Monographs

The series Lecture Notes in Physics reports new developments in physical research and teaching - quickly, informally, and at a high level. The type of material considered for publication in the New Series includes monographs presenting original research or new angles in a classical field. The timeliness of a manuscript is more important than its form, which may be preliminary or tentative. Manuscripts should be reasonably self-contained. They will often present not only results of the author(s) but also related work by other people and will provide sufficient motivation, examples, and applications.

The manuscripts or a detailed description thereof should be submitted either to one of the series editors or to the managing editor. The proposal is then carefully refereed. A final decision concerning publication can often only be made on the basis of the complete manuscript, but otherwise the editors will try to make a preliminary decision as definite as they can on the basis of the available information.

Manuscripts should be no less than 100 and preferably no more than 400 pages in length. Final manuscripts should preferably be in English, or possibly in French or German. They should include a table of contents and an informative introduction accessible also to readers not particularly familiar with the topic treated. Authors are free to use the material in other publications. However, if extensive use is made elsewhere, the publisher should be informed.

Authors receive jointly 50 complimentary copies of their book. They are entitled to purchase further copies of their book at a reduced rate. As a rule no reprints of individual contributions can be supplied. No royalty is paid on Lecture Notes in Physics volumes. Commitment to publish is made by letter of interest rather than by signing a formal contract. Springer-Verlag secures the copyright for each volume.

## The Production Process

The books are hardbound, and quality paper appropriate to the needs of the author(s) is used. Publication time is about ten weeks. More than twenty years of experience guarantee authors the best possible service. To reach the goal of rapid publication at a low price the technique of photographic reproduction from a camera-ready manuscript was chosen. This process shifts the main responsibility for the technical quality considerably from the publisher to the author. We therefore urge all authors to observe very carefully our guidelines for the preparation of camera-ready manuscripts, which we will supply on request. This applies especially to the quality of figures and halftones submitted for publication. Figures should be submitted as originals or glossy prints, as very often Xerox copies are not suitable for reproduction. In addition, it might be useful to look at some of the volumes already published or, especially if some atypical text is planned, to write to the Physics Editorial Department of Springer-Verlag direct. This avoids mistakes and time-consuming correspondence during the production period.

As a special service, we offer free of charge LaTeX and TeX macro packages to format the text according to Springer-Verlag's quality requirements. We strongly recommend authors to make use of this offer, as the result will be a book of considerably improved technical quality. The typescript will be reduced in size (75% of the original). Therefore, for example, any writing within figures should not be smaller than 2.5 mm.

Manuscripts not meeting the technical standard of the series will have to be returned for improvement.

For further information please contact Springer-Verlag, Physics Editorial Department II, Tiergartenstrasse 17, W-6900 Heidelberg, FRG.
