Frontierland

by Jürg Gutknecht (Program Chair)

Programming languages and system architectures – two fundamental pillars of computer science, rich in tradition and yet so modern, mutually dependent and yet so separate, tightly coupled and yet a big gap between, stimulating as well as impeding one another, close friends and yet bitter opponents.

Programming languages and system architectures – two topics representing the frontiers of two different worlds, the world of algorithms and the world of electronic circuits, the world of formalists and the world of physicists.

This conference is an adventure in a field of high voltage, in a land where two different cultures clash, in a land that is both fertile and barren.

We are invited to explore this exciting land under the guidance of some world-renowned researchers, and we are well-advised to accept the offer gratefully, because opportunities like this are rare. There are not many experts in such a difficult terrain, and only a few have ever celebrated bridging the gap.

One of the most outstanding among them will have particularly good cause for a celebration: By pure chance, the conference coincides with Niklaus Wirth's 60th birthday.

Happy birthday!

Program Committee

J. Gutknecht, ETH Zürich, CH (Chairman)
R. P. Cook, Microsoft, USA
G. Coray, EPF Lausanne, CH
O. J. Dahl, University of Oslo, N
E. W. Dijkstra, University of Texas, USA
G. Goos, TU Karlsruhe, D
S. Graham, UC Berkeley, USA
D. Gries, Cornell University, USA
D. Hanson, Princeton University, USA
B. Kernighan, AT&T Bell Labs, USA
B. W. Lampson, DEC SRC, USA
J. Ludewig, TU Stuttgart, D
J. Misra, University of Texas, USA
H. Mössenböck, ETH Zürich, CH
R. Needham, Cambridge University, UK
S. Owicki, DEC SRC, USA
G. Pomberger, University of Linz, A
P. Rechenberg, University of Linz, A
M. Reiser, IBM Research, CH
B. A. Sanders, ETH Zürich, CH
P. Schulthess, University of Ulm, D
A. Shaw, University of Washington, USA
A. Tanenbaum, Vrije Universiteit Amsterdam, NL
P. D. Terry, Rhodes University, SA
L. Tesler, Apple Corp., USA
J. Welsh, University of Queensland, AUS
N. Wirth, ETH Zürich, CH

Organizing Committee

C. A. Zehnder, ETH Zürich (Chairman)
W. Gander, ETH Zürich
M. Franz, ETH Zürich

Contents

Invited Papers

<i>Interconnecting Computers: Architecture, Technology, and Economics</i> . . .	1
Butler W. Lampson (DEC SRC, Palo Alto, USA)	
<i>Languages and Interactive Software Development</i>	21
Susan Graham (University of California, Berkeley, USA)	
<i>Mechanized Support for Stepwise Refinement</i>	35
Jan L. A. van de Snepscheut (Caltech, USA)	
<i>Hardware and Software: The Closing Gap</i>	49
C.A.R. Hoare, Innes Page (Oxford University, United Kingdom)	

Session Papers

<i>On Computing Power</i>	69
Jean E. Vuillemin (DEC Paris Research Laboratory, France)	
<i>Increasing Memory Bandwidth for Vector Computations</i>	87
Sally A. McKee, Steven A. Moyer, William A. Wulf (University of Virginia, USA)	
Charles Hitchcock (Dartmouth College, USA)	
<i>The Advantages of Machine-Dependent Global Optimization</i> . . .	105
Manuel E. Benitez, Jack W. Davidson (University of Virginia, USA)	
<i>Dependence-Conscious Global Register Allocation</i>	129
Wolfgang Ambrosch, M. Anton Ertl, Felix Beer, Andreas Krall (Technical University of Vienna, Austria)	
<i>Type Test Elimination Using Typeflow Analysis</i>	137
Diane Corney, John Gough (Queensland University of Technology, Brisbane, Australia)	

<i>Where Concurrent Processes Originate</i>	151
Stanislaw Chrobot (Kuwait University, Kuwait)	
<i>High-Level Abstractions for Efficient Concurrent Systems</i>	171
Suresh Jagannathan, James Philbin (NEC Research, Princeton, USA)	
<i>Language and Architecture Paradigms as Object Classes: A Unified Approach Towards Multiparadigm Programming</i>	191
Diomidis Spinellis, Sophia Drossopoulou, Susan Eisenbach (Imperial College London, United Kingdom)	
<i>Engineering a Programming Language: The Type and Class System of Sather</i>	208
Clemens A. Szyperski, Stephen Omohundro, Stephan Murer (ICSI Berkeley, USA)	
<i>OPAL: Design and Implementation of an Algebraic Programming Language</i>	228
Klaus Didrich, Andreas Fett, Carola Gerke, Wolfgang Grieskamp, Peter Pepper (Technical University of Berlin, Germany)	
<i>Architectural Issues in Spreadsheet Languages</i>	245
Alan G. Yoder, David L. Cohn (University of Notre Dame, USA)	
<i>Technological Steps toward a Software Component Industry</i>	259
Michael Franz (ETH Zürich, Switzerland)	
<i>Distributed High-Level Module Binding for Flexible Encapsulation and Fast Inter-Modular Optimization</i>	282
Christian S. Collberg (University of Auckland, New Zealand)	
<i>Is Oberon as Simple as Possible? A Smaller Object-Oriented Language Based on the Concept of Module Type</i>	298
Atanas Radenski (University of North Carolina, USA)	
<i>On the Essence of Oberon</i>	313
David A. Naumann (Southwestern University, USA)	
<i>Adding Concurrency to the Oberon System</i>	328
Spiros Lalis, Beverly A. Sanders (ETH Zürich, Switzerland)
