

Section IV: Positioning and Sensor Fusion

20	Quality Assurance/Quality Control Analysis of Dead Reckoning Parameters in a Personal Navigator	333
	<i>Shahram Moafipoor, Dorota A. Grejner-Brzezinska, Charles K. Toth and Chris Rizos</i>	
21	Efficient Overlay Mediation for Mobile Location-Based Services . . .	353
	<i>Amine M. Houyou and Hermann De Meer</i>	
22	Three-Dimension Indoor Positioning Algorithms Using an Integrated RFID/INS System in Multi-storey Buildings	373
	<i>Kefei Zhang, Ming Zhu, Günther Retscher, Falin Wu and William Cartwright</i>	
23	Prediction of GNSS Availability and Accuracy in Urban Environments – Case Study Schiphol Airport	387
	<i>Frank Kleijer, Dennis Odijk and Edward Verbree</i>	
24	An Investigation of the Signal Performance of the Current and Future GNSS in Typical Urban Canyons in Australia Using a High Fidelity 3D Urban Model	407
	<i>Kefei Zhang, Gang-Jun Liu, Falin Wu, Liam Densley and Günther Retscher</i>	
25	Using RFID and INS for Indoor Positioning	421
	<i>Qing Fu and Günther Retscher</i>	
26	GPS/WiFi Real-Time Positioning Device: An Initial Outcome	439
	<i>Joon Wayn Cheong, Binghao Li, Andrew G. Dempster and Chris Rizos</i>
