Preface

It is our pleasure to welcome you to the fourth edition of the International Symposium on Engineering Secure Software and Systems.

This unique event aims at bringing together researchers from software engineering and security engineering, which might help to unite and further develop the two communities in this and future editions. The parallel technical sponsorship from the ACM SIGSAC (the ACM interest group in security) and ACM SIGSOFT (the ACM interest group in software engineering) is a clear sign of the importance of this interdisciplinary research area and its potential.

The difficulty of building secure software systems is no longer focused on mastering security technology such as cryptography or access control models. Other important factors include the complexity of modern networked software systems, the unpredictability of practical development life cycles, the intertwining of and trade-off between functionality, security and other qualities, the difficulty of dealing with human factors, and so forth. Over the last few years, an entire research domain has been building up around these problems.

The conference program include two major keynotes from Cristian Cadar (Imperial College London) on improving software reliability and security via symbolic execution and Thorsten Holz (Ruhr University Bochum) on an overview of modern security threats, and an interesting blend of research and idea papers.

In response to the call for papers, 53 papers were submitted. The Program Committee selected seven contributions as research papers (13%), presenting new research results in the realm of engineering secure software and systems. It further selected seven idea papers, which gave crisp expositions of interesting, novel ideas in the early stages of development.

Many individuals and organizations contributed to the success of this event. First of all, we would like to express our appreciation to the authors of the submitted papers and to the Program Committee members and external referees, who provided timely and relevant reviews. Many thanks go to the Steering Committee for supporting this and future editions of the symposium, and to all the members of the Organizing Committee for their tremendous work and for excelling in their respective tasks. The DistriNet research group of the K.U. Leuven did an excellent job with the website and the advertising for the conference. Finally, we are also grateful to Andrei Voronkov for his EasyChair system.

We owe gratitude to ACM SIGSAC/SIGSOFT, IEEE TCSP and LNCS for supporting us in this new scientific endeavor.

December 2011

Conference Organization

General Chair

Sandro Etalle
Eindhoven University of Technology,
The Netherlands

Program Co-chairs

Gilles Barthe
Ben Livshits
IMDEA Software Institute, Spain
Microsoft Research, USA

Publication Chair

Riccardo Scandariato
Katholieke Universiteit Leuven, Belgium

Publicity Chair

Pieter Philippaerts
Katholieke Universiteit Leuven, Belgium

Local Arrangements Co-chairs

Jerry den Hartog
Jolande Matthijsse
Eindhoven University of Technology,
The Netherlands
Eindhoven University of Technology,
The Netherlands

Steering Committee

Jorge Cuellar
Wouter Joosen
Fabio Massacci
Gary McGraw
Bashar Nuseibeh
Daniel Wallach
Siemens AG, Germany
Katholieke Universiteit Leuven, Belgium
Università di Trento, Italy
Cigital, USA
The Open University, UK
Rice University University, USA

Program Committee

Davide Balzarotti
Gilles Barthe
David Basin
Hao Chen
Eurecom, France
IMDEA Software Institute, Spain
ETH Zurich, Switzerland
UC Davis, USA

Manuel Costa	Microsoft Research, USA
Julian Dolby	IBM Research, USA
Maritta Heisel	University of Duisburg-Essen, Germany
Thorsten Holz	Ruhr-Universität Bochum, Germany
Collin Jackson	Carnegie Mellon University
Martin Johns	SAP Research - CEC Karlsruhe, Germany
Jan Jürjens	TU Dortmund and Fraunhofer ISST, Germany
Engin Kirda	Eurecom, France
Ben Livshits	Microsoft Research, USA
Javier Lopez	University of Malaga, Spain
Sergio Maffei	Imperial College London, UK
Heiko Mantel	TU Darmstadt, Germany
Fabio Martinelli	IIT-CNR, Italy
Haris Mouratidis	University of East London, UK
Anders Møller	Aarhus University, Denmark
Frank Piessens	K.U. Leuven, Belgium
Erik Poll	Radboud Universiteit Nijmegen, The Netherlands
Pierangela Samarati	Università di Milano, Italy
Ketil Stølen	SINTEF, Norway
Laurie Williams	North Carolina State University, USA
Jianying Zhou	Institute for Infocomm Research, Singapore

External Reviewers

Aderhold, Markus	Jawurek, Marek
Aizatulin, Misha	King, Jason
Anguraj, Baskar	Krautsevich, Leand
Beckers, Kristian	Lazouski, Aliaksandr

Table of Contents

Application-Replay Attack on Java Cards: When the Garbage Collector Gets Confused	1
<i>Guillaume Barbu, Philippe Hoogvorst, and Guillaume Duc</i>	
Supporting the Development and Documentation of ISO 27001 Information Security Management Systems through Security Requirements Engineering Approaches (Idea Paper)	14
<i>Kristian Beckers, Stephan Faßbender, Maritta Heisel, Jan-Christoph Küster, and Holger Schmidt</i>	
Typed Assembler for a RISC Crypto-Processor (Idea Paper)	22
<i>Peter T. Breuer and Jonathan Bowen</i>	
Transversal Policy Conflict Detection	30
<i>Matteo Maria Casalino, Henrik Plate, and Slim Trabelsi</i>	
Challenges in Implementing an End-to-End Secure Protocol for Java ME-Based Mobile Data Collection in Low-Budget Settings (Idea Paper)	38
<i>Samson Gejibo, Federico Mancini, Khalid A. Mughal, Remi Valvik, and Jørn Klungsøyr</i>	
Runtime Enforcement of Information Flow Security in Tree Manipulating Processes	46
<i>Máté Kovács and Helmut Seidl</i>	
Formalisation and Implementation of the XACML Access Control Mechanism	60
<i>Massimiliano Masi, Rosario Pugliese, and Francesco Tiezzi</i>	
A Task Ordering Approach for Automatic Trust Establishment	75
<i>Francisco Moyano, Carmen Fernandez-Gago, Isaac Agudo, and Javier Lopez</i>	
An Idea of an Independent Validation of Vulnerability Discovery Models (Idea Paper)	89
<i>Viet Hung Nguyen and Fabio Massacci</i>	
A Sound Decision Procedure for the Compositionality of Secrecy (Idea Paper)	97
<i>Martín Ochoa, Jan Jürjens, and Daniel Warzecha</i>	

Plagiarizing Smartphone Applications: Attack Strategies and Defense Techniques	106
<i>Rahul Potharaju, Andrew Newell, Cristina Nita-Rotaru, and Xiangyu Zhang</i>	
Design of Adaptive Security Mechanisms for Real-Time Embedded Systems	121
<i>Mehrdad Saadatmand, Antonio Cicchetti, and Mikael Sjödin</i>	
Hunting Application-Level Logical Errors (Idea Paper)	135
<i>George Stergiopoulos, Bill Tsoumas, and Dimitris Gritzalis</i>	
Optimal Trust Mining and Computing on Keyed MapReduce (Idea Paper)	143
<i>Huafei Zhu and Hong Xiao</i>	
Author Index	151
