Audin, Michèle:
Geometry / Michèle Audin. - Berlin ; Heidelberg ; New York ; Barcelona ;
Hong Kong ; London ; Milan ; Paris ; Tokyo : Springer, 2002
(Universitext)
Einheitssacht.: Geometrie <engl.>

The original French edition was published in 1998 under the title
„Géométrie“ by Éditions BELIN, Paris, et Éditions ESPACES 34, Montpellier

ISBN 978-3-540-43498-6 ISBN 978-3-642-56127-6 (eBook)
DOI 10.1007/978-3-642-56127-6

Mathematics Subject Classification (2000): 51XX, 53XX

Contents

Introduction	1
1. This is a book... ..	1
2. How to use this book	2
3. About the English edition	3
4. Acknowledgements	3
I. Affine Geometry	7
1. Affine spaces	7
2. Affine mappings	14
3. Using affine mappings: three theorems in plane geometry	23
4. Appendix: a few words on barycenters	26
5. Appendix: the notion of convexity	28
6. Appendix: Cartesian coordinates in affine geometry	30
Exercises and problems	32
II. Euclidean Geometry, Generalities	43
1. Euclidean vector spaces, Euclidean affine spaces	43
2. The structure of isometries	46
3. The group of linear isometries	52
Exercises and problems	58
III. Euclidean Geometry in the Plane	65
1. Angles	65
2. Isometries and rigid motions in the plane	76
3. Plane similarities	79
4. Inversions and pencils of circles	83
Exercises and problems	98
IV. Euclidean Geometry in Space	113
1. Isometries and rigid motions in space	113
2. The vector product, with area computations	116
3. Spheres, spherical triangles	120
4. Polyhedra, Euler formula	122
5. Regular polyhedra	126
Exercises and problems	130
V. Projective Geometry	143
1. Projective spaces	143
2. Projective subspaces	145

3. Affine <i>vs</i> projective	147
4. Projective duality	153
5. Projective transformations	155
6. The cross-ratio	161
7. The complex projective line and the circular group	164
Exercises and problems	170
VI. Conics and Quadrics	183
1. Affine quadrics and conics, generalities	184
2. Classification and properties of affine conics	189
3. Projective quadrics and conics	200
4. The cross-ratio of four points on a conic and Pascal's theorem ..	208
5. Affine quadrics, <i>via</i> projective geometry	210
6. Euclidean conics, <i>via</i> projective geometry	215
7. Circles, inversions, pencils of circles	219
8. Appendix: a summary of quadratic forms	225
Exercises and problems	233
VII. Curves, Envelopes, Evolutes	247
1. The envelope of a family of lines in the plane	248
2. The curvature of a plane curve	254
3. Evolutes	256
4. Appendix: a few words on parametrized curves	258
Exercises and problems	261
VIII. Surfaces in 3-dimensional Space	269
1. Examples of surfaces in 3-dimensional space	269
2. Differential geometry of surfaces in space	271
3. Metric properties of surfaces in the Euclidean space	284
4. Appendix: a few formulas	294
Exercises and problems	296
A few Hints and Solutions to Exercises	301
Chapter I	301
Chapter II	304
Chapter III	306
Chapter IV	314
Chapter V	321
Chapter VI	326
Chapter VII	332
Chapter VIII	336
Bibliography	343
Index	347
