## A. STRUCTURAL BOTANY

### I. General and Molecular Cytology: The Cytoskeleton:

#### Microfilaments

By UDO KRISTEN .....	1
1. Introduction .....	1
2. Molecular Organization of Actin Filaments .....	2
3. Assembly of Actin Filaments .....	3
4. Visualization of Actin Filaments .....	4
5. Actin Filaments and Intracellular Movements .....	5
a) Involvement of Actin Filaments in Organelle Movement .....	5
b) Involvement of Actin Filaments in Cytoplasmic Streaming .....	6
c) Involvement of Actin Filaments in Vesicle-Mediated Secretion .....	7
6. Actin Filaments and Cell Motility .....	7
7. Anti F-Actin Agents .....	8
References .....	9

### II. Cytology and Morphogenesis of Fungal Cells

By HANS R. HOHL .....	13
1. Books and Reviews .....	13
2. Techniques .....	14
3. Cytoplasmic Structures .....	14
a) Cytoskeleton .....	14
b) Plasma Membrane and Endomembrane System .....	16
c) Microbodies, Woronin Bodies .....	17
d) Storage Products, Miscellaneous Structures .....	17
e) Additional Studies .....	18
4. Nucleus, Mitosis, Meiosis .....	18
5. Wall Structure and Formation .....	20
a) Hyphal Tip Growth .....	21
b) Wall Regeneration .....	22
c) Septum .....	22
d) Dimorphism .....	23
References .....	23

### III. Vergleichende Morphologie des Vegetationskörpers

Von WOLFGANG HAGEMANN .....	29
1. Allgemeines .....	29
2. Meristeme .....	31
a) Sproßscheitelmeristeme .....	31
b) Blattrandmeristeme .....	33

c) Wurzelscheitelmeristeme .....	36
d) Anlegung des Leitgewebesystems .....	37
e) Embryoentwicklung .....	39
3. Blattstellungen und Blattmorphologie .....	41
4. Verzweigung und Wuchsformen .....	42
a) Allgemeines und dikotyle Pflanzen .....	42
b) Monocotyledonen .....	44
5. Wurzeln .....	45
Literatur .....	46

<u>IV. Reproductive Structures of the Flowering Plants</u>	
By ROLF RUTISHAUSER .....	51
1. Introduction .....	51
2. Reproductive Development (General Aspects) .....	52
3. Inflorescences .....	54
4. Floral Vascular Anatomy .....	54
5. Perianth .....	55
6. Androecium .....	55
7. Floral Nectaries .....	56
8. Gynoecium .....	56
9. Pistil-Pollen Interactions .....	58
10. Fruits and Seeds .....	59
11. Origin and Evolution of the Flowering Plants .....	59
12. Systematic Survey on Morphological Literature .....	61
References .....	63

B. PHYSIOLOGY

<u>I. Mineral Nutrition: Anions</u>	
By ULRICH LÜTTGE and DAVID T. CLARKSON .....	68
1. Gradient-Coupled Transport: General Observations .....	68
a) Nitrate Uptake .....	69
b) Phosphate Uptake .....	69
c) Sulphate Uptake .....	69
d) Bicarbonate Uptake .....	69
e) Chloride Uptake .....	70
f) $\beta$ -Indolyl-Acetate Transport .....	71
2. Transport Proteins .....	71
a) Distinct Gene Products? .....	71
b) Primary Active Transport Mechanisms and the Effects of Anions .....	72
$\alpha 72 $	72
$\beta$ ) Tonoplast .....	74
$\gamma$ ) Other Membranes .....	76
c) Secondary Active Transport Mechanisms of Anions ...	76
$\alpha$ ) Plasmalemma .....	76
$\beta$ ) Tonoplast .....	76
d) Extrinsic Anion-Binding Proteins at the Plasmalemma	77
3. Passive Lipid Diffusion .....	77
4. Feedback Inhibition of Anion Uptake .....	78
5. Metabolism and Anion Transport in Whole Plants .....	79
a) Sulphate and Phosphate .....	79
b) Nitrate .....	79
6. Root-Soil Interactions .....	80
7. Concluding Remarks .....	81
References .....	81

<u>II. Photosynthesis: Antennae and Reaction Centers</u>	
By J. AMESZ. With 3 Figures .....	87
1. Introduction .....	87
2. Purple Bacteria .....	89
3. Green Bacteria .....	91
a) Chlorosomes .....	91
b) Green Sulfur Bacteria .....	92
c) Green Filamentous Bacteria .....	94
4. Photosystem II .....	95
5. Photosystem I .....	96
References .....	98
<u>III. Metabolism of Inorganic Nitrogen Compounds</u>	
By HERMANN BOTHE .....	103
1. Nitrogen Fixation .....	103
a) Nitrogen Fixation by Free-Living Microorganisms ..	103
b) Nitrogen Fixation by Symbiotic Microorganisms .....	105
2. Nitrate Reduction .....	108
a) Assimilatory Nitrate Reduction .....	108
b) Dissimilatory Nitrate Reduction .....	110
3. Nitrification .....	111
References .....	112
<u>IV. Secondary Plant Substances. Aspects of Steroid</u>	
<u>Biosynthesis.</u> By HORST-ROBERT SCHÜTTE	
With 9 Figures .....	117
1. Sterols .....	117
2. Sterol Conjugations .....	123
3. Sterol Synthesis During Seed Germination .....	123
4. Cardenolides and Bufadienolides .....	124
5. Steroidal Saponins .....	127
6. Steroidal Alkaloids .....	128
7. Withanolides .....	130
References .....	131
<u>V. Growth.</u> By GÜNTHER SEMBDNER, WILLIBALD SCHLIEMANN, and	
GABRIELE HERRMANN. With 4 Figures .....	137
1. General Reviews .....	137
2. Gibberellins .....	137
a) Chemistry .....	137
b) Occurrence .....	138
$\alpha$ ) Isolation, Separation, and Determination .....	138
$\beta$ ) Free Gibberellins .....	139
$\gamma$ ) Gibberellin Conjugates .....	140
c) Biosynthesis and Metabolism .....	141
$\alpha$ ) Biosynthetic Pathways .....	141
$\beta$ ) Enzymic Studies .....	142
$\gamma$ ) Glucosyl Conjugates: Metabolic Formation and	
Hydrolysis .....	144
d) Physiological Roles .....	145
e) Modes of Action, Mechanisms .....	147
3. Cytokinins .....	149
a) Synthesis and Analytical Methods .....	149
b) Biosynthesis and Metabolism .....	150

## VIII Contents

c) Occurrence and Physiological Roles .....	154
d) Modes of Action .....	156
4. Brassinosteroids .....	157
a) Chemistry, Analytical Methods, Occurrence, Metabolism .....	158
b) Physiological Effects, Mode of Action, Agri- cultural Application .....	158
References .....	160
<u>VI. Movement of Pulvinated Leaves.</u> By WOLFGANG HENSEL	
With 1 Figure .....	171
1. Introduction .....	171
2. The Proton/Potassium Exchange Model .....	171
3. The Role of Calcium .....	174
4. Effects of Various Substances .....	175
5. Cell Walls .....	176
6. Rhythmic Properties .....	176
7. Structural Aspects .....	178
References .....	179
<u>C. GENETICS</u>	
<u>I. Replication.</u> By WALTER NAGL.	
With 3 Figures .....	181
1. Introduction .....	181
2. General Aspects .....	181
3. Differential DNA Replication in Vivo .....	182
4. Chromosome Variation in Vitro .....	183
5. Endoreduplication and Endopolyploidy .....	185
6. Polyteny in Angiosperms .....	188
References .....	188
<u>II. Recombination: Asexual Recombination in Higher Plants</u>	
By WOLFGANG FRIEDT and ULRIKE BRUNE. With 2 Figures ....	192
1. Introduction .....	192
2. Somatic Hybrids and Cybrids .....	192
a) <i>Solanaceae</i> .....	192
b) <i>Brassicaceae</i> .....	193
c) Other Species .....	194
3. Somaclonal Variation .....	194
a) General .....	194
b) <i>Triticeae</i> .....	194
c) <i>Solanaceae</i> .....	196
d) Other Species .....	198
4. Transposable Elements .....	198
a) General .....	198
b) Maize ( <i>Zea sp.</i> ) .....	199
c) Other Species .....	201
d) Importance in Evolution and Breeding .....	202
5. Genetic Engineering .....	203
a) Transformation with Agrobacteria .....	203
α) <i>Agrobacterium tumefaciens</i> .....	203
β) Application of <i>A. tumefaciens</i> System .....	205
γ) <i>Agrobacterium rhizogenes</i> .....	207

b) Other Transformation Systems .....	209
α) Plant Viruses .....	209
β) Direct Gene Transfer .....	210
γ) Electroporation .....	211
6. Conclusion .....	212
References .....	212
<u>III. Mutation: Higher Plants. By WERNER GOTTSCHALK .....</u>	<u>216</u>
1. Methodological Aspects .....	216
2. Environmental Mutagenesis .....	217
3. Antimutagenic Plant Substances .....	218
4. Gene Mutations .....	219
a) Mutant Genes Affecting the Meiosis of Higher Plants .....	219
b) Mutants of Agronomic Interest .....	221
c) Somaclonal Variation .....	221
5. Genome Mutations .....	222
a) Haploids .....	222
b) Autopolyploids .....	223
c) Allopolyploids .....	224
α) Natural Allopolyploids .....	224
β) Experimentally Produced Allopolyploids .....	225
γ) Somatic Hybridization .....	225
d) Aneuploids .....	226
References .....	227
<u>IV. Function of Genetic Material. Ribulose-Bisphosphate- Carboxylase as a Tool for the Study of Gene Function in Plants. By ROLF BLAICH. With 1 Figure .....</u>	<u>231</u>
1. Introduction .....	231
2. Maps and Sequencing of RBC Genes .....	232
a) Prokaryotes .....	232
b) SSU Genes in Eukaryotic Plants .....	232
c) LSU Genes in Eukaryotic Plants .....	233
3. Evolutionary Studies .....	233
4. Translation and Processing of Transcripts .....	234
a) Small Subunit .....	234
b) Large Subunit .....	235
5. Assembly and Structure of the Enzyme .....	235
6. Regulation of Gene Activity .....	236
a) Light Induction of RBC .....	236
b) Influence of Hormones and Growth Conditions .....	239
c) Organ Specificity of Gene Expression .....	239
d) Influence of the Genotype of RBC Activity .....	239
7. Concluding Remarks .....	241
References .....	241
<u>V. Extranuclear Inheritance: Plastid Genetics</u> By RUDOLF HAGEMANN, MONIKA M. HAGEMANN, and MICHAEL METZLAFF. With 3 Figures .....	<u>245</u>
1. Introduction .....	245
2. The Complete Sequencing of the Plastid DNAs of <i>Marchantia</i> and <i>Nicotiana</i> .....	245
3. Introns in Plastid Genes .....	248
4. DNA Rearrangements and Drastic Size Reduction of Plastid DNA as a Consequence of Anther Culture in Cereals ...	256

5. Sequence Homologies Between Plastid DNA and the DNAs of the Nucleus and Mitochondria ..... 257

    a) Sequence Homologies Between Plastid and Mitochondrial DNA ..... 258

    b) Sequence Homologies Between Plastid and Nuclear DNA ..... 259

    c) Hypotheses for the Mechanisms of Intercompartmental Gene Transfer ..... 259

6. Outlook ..... 260

References ..... 260

VI. Population Genetics

By KLAUS WÖHRMANN and VOLKER LOESCHCKE ..... 264

1. Introduction ..... 264

2. DNA Variation and Population Genetics ..... 264

    a) Transposable Elements ..... 264

    b) Multigene Families ..... 266

    c) Extranuclear Variation ..... 267

    d) Adaptive Value of DNA Variation ..... 267

    e) DNA and Protein Variability in Populations of Microorganisms ..... 268

3. The Impact of Release of Genetically Manipulated Organisms ..... 269

    a) The Problem ..... 269

    b) Some Goals of Genetic Engineering ..... 270

    c) Discussion of Some Arguments ..... 271

        α) The Niche ..... 271

        β) Introgression ..... 272

        γ) Herbicide Resistance ..... 272

4. Quantitative Genetics ..... 273

    a) Maintenance of Quantitative Genetic Variation .... 273

        α) Mutation-Selection Balance ..... 273

        β) Other Evolutionary Factors ..... 274

        γ) Genetic Variation in Heterogeneous Environments 274

        δ) Experimental Evaluation ..... 274

    b) Quantitative Variation and the Analysis of Individual Loci ..... 275

    c) Phenotypic Plasticity ..... 275

    d) Genetic Correlations ..... 275

References ..... 276

D. TAXONOMY

I. Systematics of the Bryophytes. By JAN-PETER FRAHM ..... 280

1. Introduction ..... 280

2. Handbooks, General ..... 280

3. Taxonomy ..... 281

    a) General ..... 281

    b) Monographs, Revisions ..... 281

    c) Biosystematic and Experimental Study ..... 282

    d) Chemosystematics ..... 282

    e) Cytosystematics ..... 282

    f) Special Taxonomic Treatments ..... 283

4. Nomenclature ..... 285

5. Floristics ..... 285

    a) Checklists ..... 285

b) Books for Identification .....	285
c) Floristic Changes .....	285
6. Phylogeny, Evolution .....	286
7. Bryogeography .....	286
8. Morphology, Anatomy .....	287
a) General .....	287
b) Ultrastructures .....	288
c) Fungal Parasites and Mycorrhizas, Endophytic Bacteria and Symbiotic Blue-Green Algae .....	288
9. Applied Bryology .....	289
10. Bibliographies .....	289
References .....	289

## II. Evolution and Classification of Seed Plants

By HANS-HELMUT POPPENDIECK .....	296
1. Introduction .....	296
2. Methodological Aspects .....	297
a) Phylogenetic Reconstructions and Evolutionary Processes .....	297
α) Exemplary Studies in Seed Plant Phylogeny .....	297
β) Limits and Prospects of Numerical Cladistic Studies .....	298
γ) Further Aspects .....	299
b) Intraspecific Classification of Wild and Culti- vated Plants .....	300
c) Concepts of Classification .....	300
d) Institutional Bases and Means of Communication ...	301
3. Morphology .....	301
a) General Aspects .....	301
b) Vegetative Characters .....	302
c) Palynology and Embryology .....	303
4. Karyology and Cytogenetics .....	305
5. Chemical Systematics and Evolution .....	307
a) Phytochemical Systematics .....	307
b) Evolutionary Aspects of Plant Allelochemicals ...	308
c) Allelochemistry of Wild and Cultivated Plants ...	309
d) Selected Defence Compounds .....	309
6. Tracing Evolution .....	309
a) General Aspects .....	309
b) Phylogenetic Analysis at the Molecular Level .....	310
c) Evolution on the Population and Species Level ...	311
d) Reproductive Biology .....	313
e) Ecological Aspects .....	314
f) Selected Monographs and Studies in Special Groups	315
7. Plants and Man .....	316
a) Systematic Studies in Various Groups .....	317
8. Evolution and Classification of Larger Groups .....	318
a) Families of Dicotyledons .....	318
b) Reproductive Biology of Primitive Angiosperms ...	318
c) Magnoliidae .....	319
d) Hamamelididae .....	319
e) Myrtales .....	320
f) Monocotyledons .....	320
9. Studies on the Family Level and Below .....	321
References .....	327

E. GEOBOTANY

<u>I. Areal- und Florenkunde (Floristische Geobotanik)</u>	
Von ECKEHART J. JÄGER .....	343
1. Forschungstrends .....	343
2. Zusammenfassende Darstellungen .....	343
3. Neue Floren .....	344
a) Europa und Orient (außer Sowjetunion) .....	344
b) Sowjetunion .....	345
c) Süd- und Ostasien .....	346
d) Australien, Malesien, Ozeanien .....	347
e) Afrika südlich der Sahara .....	348
f) Nordamerika .....	348
g) Mittel- und Südamerika .....	349
4. Floristische Kartierung .....	350
5. Höhenverbreitung .....	351
6. Klimaökologische Arealinterpretation .....	351
a) Wuchsformen und Vegetationsformationen .....	351
b) Arealgrenzen einzelner Taxa .....	352
c) Ausfüllung der klimatischen Areale .....	352
7. Chorogenese and Artbildung .....	353
8. Synanthrope Areal- und Florenveränderungen .....	355
a) Beurteilung des Status .....	355
b) Ausbreitungsgeschichte von Neophyten .....	356
c) Prognose der Ausbreitung .....	356
d) Auswirkung der Ausbreitung von Neophyten .....	357
e) Artenverlust .....	357
Literatur .....	357
<u>II. The History of Flora and Vegetation During the Quaternary.</u>	
By BURKHARD FRENZEL .....	364
1. Reconstruction of Past Types of Vegetation and of Climate by Means of Mathematical Procedures .....	364
2. Dating Methods .....	366
3. The Problem of the Last but One Interglacial .....	367
4. The Eemian Interglacial .....	369
5. Paleoeological Problems of the Last Glaciation .....	371
6. The Late Glacial of the Last Glaciation .....	374
References .....	376
<u>III. Vegetation Science (Sociobiological Geobotany)</u>	
By KLAUS DIERSSEN .....	381
1. Introduction .....	381
2. Monographs and Bibliographies .....	381
3. Methods and General Results .....	382
a) Succession Studies .....	382
b) Population Structure of Vegetation .....	382
c) Numerical Methods .....	382
4. Vegetation of the Temperate Zone and Adjacent Regions .....	383
a) Temperate European Forests and Shrublands .....	383
b) Coastal Vegetation .....	383
c) Weed, Ruderal and Urban Vegetation .....	383
5. Vegetation of Tropical and Subtropical Areas .....	384
References .....	384

<u>IV. Ecosystem Research (Ecological Geobotany)</u>	
By WOLFGANG SCHMIDT .....	386
1. General .....	386
2. Productivity .....	387
a) Biomass and Net Primary Production .....	387
α) General, Modeling, and Methods .....	387
β) Algae and Aquatic Ecosystems .....	387
γ) Herbs and Grasses in Different Ecosystems, Mainly Grasslands .....	388
δ) Woody Plants and Forest Ecosystems .....	391
b) Respiration .....	392
c) Carbon Cycle .....	392
3. Energy and Water Balance .....	394
a) Energy Flow and Efficiency .....	394
b) Transpiration and Water Cycle .....	394
4. Mineral Cycle .....	395
a) Decomposition .....	395
b) Mineral Cycle .....	396
α) General .....	396
β) Aquatic Ecosystems .....	397
γ) Grasslands and Herb Communities .....	397
δ) Forest Ecosystems .....	399
5. Ecosystem Development: Succession, Stability and Man's Influence on Ecosystem Structure and Processes	401
a) General .....	401
b) Aquatic Ecosystems .....	402
c) Grasslands and Herb Communities, Old-Field Succession .....	402
d) Forest Succession .....	404
e) Air Pollution, Effects of Acid Precipitation and Forest Dieback .....	405
References .....	406

## F. SPECIAL TOPICS

<u>I. Seed Dispersal.</u> By SUSANNE S. RENNER .....	413
1. Introduction .....	413
2. General and Theoretical Aspects .....	414
3. Dispersal and Gene Flow .....	415
4. Dispersal by Wind .....	415
5. Dispersal by Water .....	416
6. Adhesive Dispersal .....	417
7. Dispersal by Frugivores .....	417
a) General .....	417
b) Birds .....	419
α) General .....	419
β) Fruit Color .....	419
γ) Fruit Accessibility .....	419
δ) Fruit Size .....	420
ε) Fruit Composition .....	420
ζ) Fruiting Phenology .....	421
η) Crop Size and the Fruiting Environment .....	422
θ) Habitat Influence on Bird Dispersal and Vice Versa .....	422
c) Bats .....	422
d) Primates .....	423

XIV Contents

e) Other Nonflying Mammals .....	424
f) Fish .....	424
8. Dispersal by Ants .....	425
9. Dispersal by Seed-Hoarding Animals .....	426
10. Modes of Dispersal in Plant Communities .....	427
11. Conservation of Dispersal Systems .....	428
References .....	428
<u>Plant Name Index</u> .....	433
<u>Subject Index</u> .....	443

## List of Editors

- Section A Professor Dr. H.-D. BEHNKE, Zellenlehre, Universität Heidelberg, Im Neuenheimer Feld 230, D 6900 Heidelberg
- Section B Professor Dr. H. ZIEGLER, Institut für Botanik und Mikrobiologie, Technische Universität München, Arcisstr. 21, D 8000 München 2
- Section C Professor Dr. Dr. h.c. K. ESSER, Lehrstuhl für Allgemeine Botanik, Ruhr-Universität, Postfach 10 21 48, D 4630 Bochum 1
- Section D Professor Dr. K. KUBITZKI, Institut für Allgemeine Botanik und Botanischer Garten, Universität Hamburg, Ohnhorststr. 18, D 2000 Hamburg 52
- Section E Professor Dr. M. RUNGE, Lehrstuhl für Geobotanik, Systematisch-Geobotanisches Institut der Universität, Untere Karspüle 2, D 3400 Göttingen
- Section F Professor Dr. K. KUBITZKI, Institut für Allgemeine Botanik und Botanischer Garten, Universität Hamburg, Ohnhorststr. 18, D 2000 Hamburg 52
