23/3020-5 4 3 2 1 0 – Printed on acid-free paper.

# Contents

1	Introduction . . . . .	1
2	Immunoglobulin G Neutralization by Inhibition of Attachment of Virus to the Cell . . . . .	3
3	Immunoglobulin G Neutralization Which Does Not Inhibit Attachment of Virus to the Cell . . . . .	10
4	Immunoglobulin G Neutralization by Aggregation of Virions . . . . .	14
5	Immunoglobulin G Neutralization Mechanisms Which Operate After Attachment of the Virus–Antibody Complex to a Cell Receptor Unit . . . . .	17
5.1	Inhibition of Fusion at the Plasma Membrane . . . . .	17
5.2	Inhibition of Endocytosis . . . . .	17
5.3	Inhibition of Fusion of Viral and Cellular Membranes . . . . .	17
5.4	Inhibition of Non-fusion Uncoating . . . . .	21
5.5	Inhibition of Events Which Occur After Primary Uncoating . . . . .	21
6	Neutralization Which Occurs by Virus Binding Antibody After It Has Attached to a Cell . . . . .	24
7	Role of the Cell in Neutralization . . . . .	26
8	Antibody-Dependent Enhancement of Infectivity by Neutralizing Antibody: Fc and Complement Receptors . . . . .	30
9	Neutralization by Polymeric Immunoglobulin A . . . . .	32
10	Neutralization by Immunoglobulin M . . . . .	34
11	The Relevance of Immunoglobulin Isotype to Neutralization . . . . .	37
12	Viral Carbohydrates, Proteins and Neutralization . . . . .	39
12.1	Carbohydrates and Neutralization . . . . .	39
12.2	Proteins and Neutralization . . . . .	40
13	Properties of Protein and Peptide Antigens Which Elicit Neutralizing Antibody . . . . .	44
14	Neutralization In Vivo . . . . .	49
15	Complement and Neutralization . . . . .	55

16	Neutralization by Inhibition of Release of Progeny Virus from the Infected Cell . . . . .	58
17	Changes in Virus Proteins and Virion Structure on Binding Antibody, Including Synergistic Neutralization . . . . .	59
18	Reversibility of Neutralization . . . . .	64
19	Neutralization by Fragments of Antibody . . . . .	67
20	Quantitative Aspects of Neutralization . . . . .	71
21	Unconventional Neutralization . . . . .	74
21.1	Genetic Engineering of Antibodies and Viruses . . . . .	74
21.2	Anti-idiotypic Antibodies and Neutralization . . . . .	76
22	The Evolutionary Significance of Neutralization Sites . . . . .	79
22.1	Why Do Viruses Have Neutralization Sites? . . . . .	79
22.2	Strategies Which Avoid or Minimize Expression of, or Response, to Neutralization Sites . . . . .	81
22.2.1	Relating to the Virus Particle . . . . .	81
22.2.2	Relating to the Immune System . . . . .	84
23	Neutralization of Poliovirus and Rhinovirus: A Summary . . . . .	88
23.1	Introduction . . . . .	88
23.2	Attachment . . . . .	90
23.3	Internalization . . . . .	91
23.4	Post-internalization . . . . .	92
23.5	Aggregation . . . . .	92
23.6	Conformational Changes on Binding Antibody . . . . .	95
24	Neutralization of Type A Influenza Virus by Immunoglobulins M, A and G: A Summary . . . . .	98
24.1	Introduction . . . . .	98
24.2	IgM Neutralization . . . . .	100
24.3	IgA Neutralization . . . . .	100
24.4	IgG Neutralization . . . . .	101
24.5	Discussion . . . . .	102
25	Neutralization of HIV-1: A Summary . . . . .	107
26	Conclusions . . . . .	111
	References . . . . .	112
	Subject Index . . . . .	147

## Abbreviations

FMDV, foot-and-mouth disease virus  
HA, Haemagglutinin  
HCMV, human cytomegalovirus  
HIV, HIV-1, human immunodeficiency virus type 1  
HSV-1, herpes simplex virus type 1  
influenza virus, influenza virus type A  
LCMV, lymphocytic choriomeningitis virus  
LDV, lactate dehydrogenase-elevating virus  
mab, monoclonal antibody  
MHV-4, mouse hepatitis virus type 4  
NA, neuraminidase  
NANA, N-acetyl neuraminic acid  
NDV, Newcastle disease virus  
PIV-3, parainfluenza virus type 3  
poliovirus, poliovirus type 1  
RSV, respiratory syncytial virus  
SLEV, Saint Louis encephalitis virus  
TBEV, tick-borne encephalitis virus  
TGEV, transmissible gastroenteritis virus  
TMEV, Theiler's murine encephalomyelitis virus  
VEEV, Venezuelan equine encephalomyelitis virus  
VSV, vesicular stomatitis virus
