Preface

This book gathers the proceedings of a symposium on Dynamics of satellites which took place in Prague in May 1969 during the twelfth COSPAR meeting.

This symposium was sponsored by the International Astronomical Union, the International Association of Geodesy, the International Union of Theoretical and Applied Mechanics and COSPAR (Committee on Space Research).

The organizing committee was composed of Dr. KOVALEVSKY chairman, Dr. YU. V. BATRAKOV representing IAU, Dr. A. H. COOK for IAG, Dr. D. KING-HELE for COSPAR, Prof. M. ROY for IUTAM and Dr. ROSENBERG.

I wish to take advantage of the opportunity to thank, on behalf of all the participants, the organizing committee members, Prof. BUCHAR, Dr. RAJSKI and Dr. SEHNAL, for the kindness and efficiency of their welcome. The interpreters who translated with virtuosity during the whole symposium also deserve our gratitude.

I am grateful also for the care and skill with which Springer-Verlag has printed this volume.

Paris, April 1970

Table of Contents

MORANDO, B.: Theory of the Motion of an Artificial Satellite	1
MORRISON, E.: Advances in Rapid Orbit Prediction and Applications to Satellite Visibility Studies	7
BATRAKOV, YU. V.: Determination of the most Probable Elements of a Satellite Orbit from Incomplete Systems of Elements	19
SOCHILINA, A. S.: On the Influence of Distribution of Observations on Accuracy of Orbital Elements of the Earth's Artificial Satellites	24
WALTER, H. G.: The Use of Ellipsoidal Harmonics for the Representation of the Geopotential	28
CHERNIACK, J., GAPOSCHKIN, E. M.: Computer Derivation of Short-Period Lunar Perturbations.	36
MORANDO, B., CHAPRONT, J., BRETAGNON, P.: Perturbations du Second Ordre d'un Satellite Artificiel de la Terre	40
BUCHAR, E.: A Short Study on the Motion of Artificial Satellites of Mercury and Venus	41
MICHAEL, W. H., JR. BLACKSHEAR, W. TH., GAPEYNSKI, J. P.: Results on the Mass and the Gravitational Field of the Moon as Determined from Dynamics of Lunar Satellites	42
ROY, A. E.: The Use of Brown's Lunar Theory in Lunar Satellite Perturbations by Sun and Earth	57
MELBOURNE, W. G.: The Determination of Planetary Masses from Radio Tracking of Space Probes and Planetary Radar	63
VONBUN, F. O.: Satellite Trajectory Determination and their Expected Errors OGO-IV, GEOS-I	89
KOZAI, Y.: Revised Values for Coefficients of Zonal Harmonics in the Geo- potential.	104
GAPOSCHKIN, E. M.: Improved Values for the Tesseral Harmonics of the Geo- potential and Station Coordinates	109
BURŠA, M.: On the Determination of Parameters of the Earth's Figure from Satellite Orbit Dynamics.	119
MARTIN, C. F.: Accuracy of Satellite Orbits Obtainable by Synchronous Satellite Tracking	120
WAGNER, C. A., DOUGLAS, B. C.: Resonant Satellite Geodesy by High Speed Analysis of Mean Kepler Elements	130
LAGO, B.: Resultats du Dépouillement des Mesures Laser en Géodésie Semi- Dynamique.	138
LYNN, J. J.: Short Arc Optical Survey of the GEOS North American Tracking Network	147
CHASSAING, J.-P.: Traitement des Mesures Doppler en Géodésie Semi-Dynamique	154

LEFEBVRE, M.: Comparative Analysis of Different Results on the European Datum from Spatial Geodesy	162
LAMBECK, K.: Comparisons and Combinations of Geodetic Parameters Estimated from Dynamic and Geometric Satellite Solutions and from Mariner Flights	170
KAULA, W. M.: Tidal Potential with Location-Dependent Amplitude and Phase angle	180
SCHNEIDER, M., REIGBER, CH.: On the Determination of Field Parameters Using a generalized Fourier-Analysis	181
FOMINOV, A. M.: Correlation Between the Solar Activity Indices and the Use of these Indices in the Study of Motion of the Earth Satellites	189
BELETSKII, V. V.: New Investigations of Motion of an Artificial Satellite About its Center of Mass	194
VIGNERON, F. R.: Dynamics of Spin-Stabilized Flexible Satellites of Crossed-Dipole Configuration	207
KING-HELE, D. G., SCOTT, D.W.: Comparison of Air Densities Derived from the Orbits of 1966-51A, B and C	216
ELYASBERG, P. E.: The Use of AES Orbits Evolution Data for Refinement of Some Geophysical Parameters	230
ALMÁR, I., HORVÁTH, A., ILLÉS, E.: Analysis of the Atmospheric Drag of the Echo 1 Satellite Using the PERLO Orbital Period Determination Program	244
