Acknowledgements

Writing this book would not have been possible without the support of many people. I am very grateful to my supervisor Christoph Görg, for his advice and critical oversight during all phases of the project. I am also grateful to Peter Newell, for his hospitality in Norwich, and for raising important questions regarding the objectives of my work; to Neil Adger, for welcoming me at the University of East Anglia, and for vital advice and help in orienting my empirical research; to Christoph Scherrer and the participants of his doctoral colloquium in Kassel, for broadening my understanding of discourse theory and the challenges of methodology. The Helmholtz Centre for Environmental Research in Leipzig provided me with a scholarship that allowed me focusing on my research for three years.

In particular, I would like to thank the following people for supporting me in many ways while I was writing this book: Aaron Leopold, Benjamin Stephan, Chris Methmann and Delf Rothe, for contributing to the intellectual environment that helped my project to progress; Martin Bitter and Jakob Horst, for discussing my ideas and questions many times, and for all the talk during coffee breaks; and, of course, Anne Binder and Jenny Jungehülsing, for always being there and cheering me up.

I am most indebted to my family, for constantly supporting me in pursuing my goals, and in particular to you, who in so many ways made me who I am: I would have wanted you to read this book!

Table of contents

- Acronyms 11
- 1 Introduction..... 13
 - 1.1 Towards a new rationality in climate governance 13
 - 1.1.1 Climate change as economic challenge 14
 - 1.1.2 The emergence of the climate investment discourse..... 15
 - 1.1.3 And a return of the state..... 17
 - 1.2 The research project 18
 - 1.2.1 State of research: Stern and investment for climate protection... 20
 - 1.2.2 A discourse perspective on the economics of climate change..... 22
 - 1.2.3 Governmentality and climate change..... 26
 - 1.2.4 Operationalisation, research strategy, and structure of the book 30
- 2 Theory: Power/Knowledge..... 33
 - 2.1 Epistemology: Archaeology, Genealogy, Power..... 35
 - 2.1.1 Archaeology of discourse 35
 - 2.1.2 Genealogy, the question of power, and power-knowledge..... 39
 - 2.1.3 Government as power 44
 - 2.2 The analytics of government and the role of the state 47
 - 2.2.1 The state as effect of governmental rationality 48
 - 2.2.2 Emergence and change of governmental rationalities 52
 - 2.2.3 Analysing discourse from (governmental) practices..... 56
 - 2.3 Operationalisation 61
 - 2.3.1 Ontology, epistemology, methodology..... 61
 - 2.3.2 Research process and methods 68

3	Economic rationality in climate governance.....	75
3.1	The old rationality of governing climate change.....	76
3.1.1	A short history of carbon markets in climate governance	76
3.1.2	Neoliberal rationality: Markets and flexibility	79
3.2	Stern and the economics of climate change: changing perspectives...	84
3.2.1	Reframing climate change as an economic problem.....	84
3.2.2	Turning climate governance into an economic challenge	90
3.2.3	The limits to economic rationalisation.....	96
3.3	After Stern: towards a new rationality in climate governance	100
4	Making investments an object of government	105
4.1	Climate finance: supporting north-south investment flows.....	106
4.1.1	The early days of adaptation and finance	106
4.1.2	The new importance of climate finance.....	110
4.1.3	Climate finance as investment.....	118
4.2	Low-carbon strategies: Investing in economic future	127
4.2.1	A Green New Deal	128
4.2.2	The low-carbon growth narrative	133
4.2.3	Low-carbon growth and development: country perspectives.....	137
4.2.4	Going low-carbon: towards economic rationality	147
4.3	The finance sector in climate change governance.....	149
4.3.1	Renewable energy governance: Bringing in the finance sector ..	150
4.3.2	Understanding investor behaviour	157
4.4	Investment for climate protection: visibilities and invisibilities	162
5	Governing investment for climate protection	165
5.1	Public Finance Mechanisms: incentivising private investment.....	166
5.1.1	Investment for low-carbon growth: UK GIB	166
5.1.2	PFMs for clean investment in developing countries	169
5.1.3	The other side of PFMs: raising public finance.....	178
5.2	Investment and the carbon market.....	182
5.2.1	Sensing investment opportunities.....	182

5.2.2	Governing carbon market investment	184
5.2.3	Enhancing the effectiveness of carbon trading.....	190
5.3	Investment and forest protection: the REDD mechanism.....	193
5.3.1	From Kyoto to Copenhagen: forest in the climate regime.....	193
5.3.2	The REDD mechanism: rising support for forest protection.....	196
5.3.3	Governing investment for forest protection.....	200
5.4	The investment dispositif in climate governance	204
6	Markets, investment and the state	207
6.1	From reducing emissions to building low-carbon economies	208
6.1.1	A new political economy of climate change.....	208
6.1.2	From markets to finance in climate governance	212
6.2	Climate protection in a financialised world economy.....	216
6.2.1	Governing investment, creating markets	217
6.2.2	The need for contesting the power of financial markets.....	223
6.3	The competition state in climate governance	227
6.3.1	Going low-carbon as new competitiveness	227
6.3.2	An emancipatory approach to the low-carbon transformation ...	231
7	Conclusion	235
7.1	A look back: What has been achieved, and what remains to do	236
7.1.1	Theoretical and methodological challenges.....	237
7.1.2	Discourse theory analysis and the question of critique.....	241
7.2	A look forward: What future for international climate politics?.....	244
7.2.1	What is wrong with a global top-down approach.....	245
7.2.2	But what still might be right about international cooperation ...	248
	Bibliography	255
