Preface

This volume of Progress in Colloid and Polymer Science consists of some selected papers presented at the XI Scandinavian Symposium on Surface Chemistry, held at the University of Bergen, Department of Chemistry, June 26–28, 1991. These Scandinavian Symposia have been organized about every other year since 1962.

The purpose of these symposia is to present the latest developments in surface and colloid chemistry from both fundamental and applied points of view. In the beginning, these symposia were almost entirely Scandinavian, but they now have a truly international character. At the Bergen Symposium 120 delegates from 14 different countries participated. In addition to about 50 oral presentations, 20 poster contributions were presented. The memory of the Scandinavian pioneer in surface and colloid chemistry, Prof. Per Ekwall, who died December 19, 1990, was honored at the symposium by a special pictorial presentation compiled by Dr. Krister Fontell.

The XI Scandinavian Symposium on Surface Chemistry was organized around the topics:

- Surfactants and macromolecules in solution and on surfaces;
- Surface forces, ceramics, and composites;
- Functionalized colloids; and
- Development of technical equipment in surface chemistry.

The Advisory Board consisted of Drs. K. S. Birdi and N. Krog of Denmark; I. Danielson and J. Rosenholm of Finland; A. Bjørseth, P. Gramme, B. Hafskjold, H. Hoiland, S. K. Ratkje, P. Read, O. Smidsrød, T. A. Torp and J. Ugelstad of Norway; M. Almgren, K. Holmberg, K. Larsson, G. Lindblom and I. Lundström of Sweden.

Financial support was provided by Berol Nobel Ab, Dipl. ing. Houm A/S, KSV Instruments Ltd. Norsk Hydro A/S, Statoil A/S, International Association of Colloid and Interface Scientists (IACIS), Norwegian Research Council for Science and the Humanities (NAVF), and VISTA.

On behalf of the organizing committee, we would like to thank all the participants and lecturers for making the symposium a success, all the contributors to this proceedings volume, all the contributing sponsors and, especially, the conference secretariat (lead by Dr. A. M. Blokhuis) for all the practical arrangements.

The next meeting in this series will be held in Helsinki in 1994. We look forward to meeting all of you then.

Contents

Preface	V
Zhang K, Karlström G, Lindman B: Phase behavior of a system of nonionic polymer, ionic surfactant and water	1
Kékicheff P, Richetti P: Effect of electrolyte on the depletion and structural forces in a micellar system	8
Wärnheim T, Jönsson A: Phase behavior of alkanolammonium carboxylates	18
Drummond CJ, Murray BS: Surface potentials in concentrated isotropic micellar systems	23
Friberg SE, Amran A, Sjöblom J: Solubilization of aluminium and calcium nitrates into w/o microemulsions and lyotropic liquid crystals stabilized by a nonionic surfactant	30
Backlund S, Lundsten G, Ruths M, Sjöberg M, Wärnheim T: Partial phase behavior of ionic microemulsions stabilized by sodium dodecylsulfate and alcohol cosurfactants	36
Selle MH, Sjöblom J, Friberg SE, Young T, Yang C-C: Studies of gelation of tetraethoxysilane in w/o microemulsions stabilized by nonionic surfactants NMR and phase equilibria	42
Ottewil RH: Adsorption of surfactants at interfaces — studies by small-angle neutron scattering	49
Blokhuis AM, Ruths M, Sjöblom J, Moksheim Andersen Ø, Ma Z, Friberg SE: Surfactant and cosurfactants in lamellar liquid crystals and adsorbed on solid surfaces. Part IV: The model system sodium <i>p</i> -octylbenzenesulfonate/benzyl alcohol and α -alumina	58
Claesson PM, Herder PC, Rutland MW, Waltermo Å, Anhede B: Amide functionalized surfactants — pH effects on adsorption and interaction	64
Gu T, Zhu B-Y, Rupprecht H: Surfactant adsorption and surface micellization	74
Nygren H: Critical dissociation of ferritin during adsorption at a liquid-solid interface	86
Kontturi A-K, Kontturi K, Niinikoski P, Sundholm G: Extraction and fractionation of lignosulfonate by a supported liquid membrane	90
Nygren H, Karlsson C: Intermolecular interaction and ordering of fibrinogen at a liquid-solid interface	96
Persson NO, Udval K, Liedberg B, Hellsten M: Organic xanthates adsorbed on gold surfaces: an infrared and photoelectron study	100
Bouwstra A, Gooris GS, van der Spek JA, Bras W: Lipid arrangements in human stratum corneum	110
Riess JG, Greiner J, Abouhilale S, Milius A: Stabilization of fluorocarbon emulsions by sugar-derived perfluoroalkylated surfactants and co-surfactants	123
Ebeltoft H, Nordli Børve KG, Sjöblom J, Stenius P: Interactions between poly(styreneallyl alcohol) monolayers and surfactants. Correlations to water-in-crude oil emulsion stability	131
Meliani A, Perez E, Rico I, Lattes A, Petipas C, Auvray X: Preliminary structural studies of liposomes and vesicles in formamide	140
Siegbahn HOG: ESCA studies of solution/vacuum interfaces	146
Erlandsson R, Elwing H, Eriksson M, Olsson L, Tengvall P, Wigren R, Welin-Klintström S, Lundström I: Scanning force microscopy — examples of applications to surface chemistry	154
Parker JL, Stewart AM: Force feedback measurements of surface forces	162
Author Index	169
Subject Index	170
