

Part I

Optimization

Matrices in Shop Scheduling Problems	17
<i>Heidemarie Bräsel</i>	
Introduction • Basic Notations • Graphs and Matrices for Shop Problems • On Sequences in Shop Problems • Generalization of the Model • LiSA: A Library of Scheduling Algorithms	
Saddle Points from the Geometric Point of View	43
<i>Wolfgang Eichhorn</i>	
Nachbarschaftssuche bei mehrkriteriellen Flow Shop Problemen	47
<i>Walter Habenicht and Martin Josef Geiger</i>	
Einleitung • Nachbarschaftssuche im Alternativenraum • Nachbarschaftssuche im Ergebnisraum • Ausblick	
The Solution of a Generalization of a Bayesian Stopping Problem of MacKinnon	69
<i>Karl Hinderer and Michael Stieglitz</i>	
Introduction • The Model for a Binary Bayesian Problem • Solution of the Generalization of MacKinnon's Problem	
A Remark on the Formulation of Dual Programs Based on Generalized Convexity	93
<i>Diethard Pallaschke</i>	
Introduction • Generalized Convexity • Augmented Lagrangians • Duality • The Dual Program
