*This book is dedicated to Graham Corney
(1943–2008).*

Acknowledgements

Firstly, we'd like to express our gratitude to the students and teachers who took part in the original studies upon which this book is based. Without their willingness to share their experiences, there would be no book to write. These studies were also greatly enriched by the support of some important colleagues in Oxford and Stockholm who also deserve our thanks: Ann Childs, Graham Corney, Russell Francis, Ola Halldén, Geoff Haywood, Anna Pendry and Inger Wistedt. We are also grateful for the funding received for these studies from the UK Economic and Social Research Council and the Swedish Research Council's Committee for Educational Science.

Secondly, we want to flag up a number of important inputs that have facilitated the development and writing of this book. Early on in the process, Karen Malone, Eleanor Rawlings and Geoffrey Walford provided helpful suggestions on drafts of the original proposal for this book. More recently, we are indebted to Arjen Wals, Lynn McAlpine, Chris Trevitt, Richard Arnold and Gill Turner who took the time to read and comment on various draft chapters. The in-depth collaborative process that was central to the book's development would have been impossible without support for Cecilia Lundholm to spend extended periods of time in the UK, both as a Leverhulme Research Fellow at the University of Staffordshire and as a Visiting Research Fellow at the University of Oxford (funded by the Swedish Research Council's Committee for Educational Science and the Helge Ax:son Johnson Foundation). Also significant have been opportunities to present and discuss our emerging ideas within various fora: the Ecological and Environmental Education Special Interest Group of the American Educational Research Association; the UK FERN Environmental Education Research Network; and the Swedish Research Network on Education and Sustainable Development.

Finally, we want to thank our partners, families and friends for their support during the creation of this book.

Contents

| | |
|---|----|
| Introduction | 1 |
| Education and the Environment | 1 |
| The Role of Learning | 3 |
| The Student Experience | 4 |
| The Evidence Underpinning This Book | 5 |
| Structure of the Book | 7 |
| What Is Environmental Learning? | 11 |
| Defining Environmental Learning | 11 |
| Our Framework | 14 |
| Who Is Learning | 16 |
| Where They Are Learning | 16 |
| What They Are Learning | 17 |
| How They Are Learning | 19 |
| Why They Are Learning | 19 |
| Summary | 21 |
| Researching Environmental Learning | 23 |
| Environmental Learning – An Emerging Research Topic | 23 |
| Ways of Researching Environmental Learning..... | 24 |
| Researching Learners..... | 25 |
| Measuring Outcomes | 26 |
| Exploring Processes..... | 28 |
| Current Knowledge About Environmental Learning in Formal Settings | 29 |
| Learners in Environmental Education..... | 29 |
| Learning in Environmental Education | 30 |
| Summary | 31 |
| Lenses for Understanding Environmental Learning | 33 |
| Introducing the Concept of Lenses | 33 |
| Introducing the Three Lenses..... | 34 |

An Exercise in Imagination 35

 Lens 1: Focus on Emotions and Values 35

 Lens 2: Focus on Issues To Do with Relevance..... 37

 Lens 3: Focus on Differing Viewpoints Among Students and Teachers..... 37

How the Lenses Came About..... 38

Why These Lenses Are Important 38

 The Importance of Values and Emotions 39

 The Importance of Relevance 40

 The Importance of Differing Viewpoints Among Students and Teachers 42

Summary 43

Dealing with Emotions and Values 47

Introduction..... 47

Students’ Emotions and Values as Part of the Learning Process 48

 Emotional Response to Content – Disengagement and Diversion..... 49

 Students’ Values in the Process of Understanding Concepts and Theories... 50

Students’ Conceptions of Values in Subject and Subject Matter..... 53

 Scientific Literacy 54

 Values in Environmental Subject Matter 55

 Values in Solutions to Environmental Problems..... 58

Summary 60

Questioning Relevance..... 63

Introduction..... 63

Relevance to Learners 64

 Introduction..... 64

 Relevance to Self in the Present..... 64

 Relevance to Self in the Future 69

 Summary 71

Relevance to Curricular Context..... 71

 Relevant to Learn About Physical or Human Phenomena..... 72

 The Case of Matt..... 72

 Other Learners and Contexts..... 74

 Relevant to Learn About Physical and Human Phenomena 75

 Physical and Human as Relevant but Separate 76

 Physical and Human as Relevant in Interaction..... 77

 Summary 80

Summary 81

Negotiating Viewpoints Among Students and Teachers 83

Introduction..... 83

Differing Views of Environmental Issues 85

Differing Views of What Is Controversial 87

Differing Views of What Is Relevant 90
 Differing Views of Empathy Tasks 91
 Summary 95

Enhancing Environmental Learning..... 97

Overview of Main Arguments and Findings..... 97
 The Active Role of the Learner in Environmental Learning 98
 The Centrality of Values and Emotions in Environmental Learning 98
 The Potential for Student-Teacher Tensions in Environmental Learning 99
 The Complexity of Students’ Experiences in Environmental Learning 99
 The Multi-layered Nature of Environmental Learning and Teaching..... 100
 Enhancing Environmental Learning Practices and Policies 101
 Understanding and Negotiating the Emotional Dimensions
 of Environmental Learning 101
 Accessing and Understanding Students’ Learning Experiences..... 103
 Enhancing Environmental Learning Research..... 104
 Further Research on Environmental Learning and Learners’ Experiences ... 104
 Greater Emphasis on Emotions and Values in Environmental Learning 105
 Better Use and Development of Theory in Environmental Learning 105
 Broader Consideration of Life-Long Environmental Learning Contexts 106
 Stronger Collaborations Between Researchers,
 Practitioners and Learners..... 106

Appendix I: Empirical Context 109

Rickinson Study 109
 Hopwood Study 115
 Lundholm Study..... 125

Appendix II: Development of the Lenses 129

Introduction..... 129
 Empirical Focus 129
 Engaging Other Research on Environmental Learning 130
 Engaging Wider Research and Theory 131
 Reflections on the Process 132

References..... 133

Index..... 141
