RETRACTED BOOK:
Probability Theory
A Foundational Course

RETRACTED BOOK

Texts and Readings in Mathematics

Advisory Editor

C. S. Seshadri, Chennai Mathematical Institute, Chennai.

Managing Editor

Rajendra Bhatia, Indian Statistical Institute, New Delhi.

Editors

V. Balaji, Chennai Mathematical Institute, Chennai.

R. B. Bapat, Indian Statistical Institute, New Delhi.

V. S. Borkar, Tata Inst. of Fundamental Research, Mumbai.

Probal Chaudhuri, Indian Statistical Institute, Kolkata.

RETRACTED BOOK:
Probability Theory
A Foundational Course

Contents

Preface	ix
RETRACTED CHAPTER: 1 Probability Measures in Product Spaces	1
1.1 π -system, Dynkin system and σ -fields	2
1.2 Product σ -field. Number of components: finite	4
1.3 Borel σ -field of the product space	7
1.4 Measurable functions / Random variables / Random elements	10
1.5 Probability measure spaces and distributions	18
1.6 Atoms of a probability measure (pm)	30
1.7 Discontinuities of distribution functions	32
1.8 Carrier of a pm	37
1.9 Tightness of a family of pms .	41
1.10 Structure of separable metric spaces with non-atomic pms	45
1.11 Probability measures in product spaces	50
1.12 Completeness and shift tightness	62
RETRACTED CHAPTER: 2 Weak Convergence of Probability Measures	66
2.1 Weak convergence of distribution functions	66
2.2 Tightness and weak convergence in R^p	84
2.3 Characteristic functions, tightness and weak convergence in R^p	86
2.4 Weak convergence of pms in metric spaces	97
2.5 Convergence of medians under weak convergence	106
2.6 Moments	108
2.7 Weak convergence in the metric space $C[0, 1]$	123
2.8 Uniform convergence of weakly convergent measures	136

RETRACTED CHAPTER: 3 Characteristic Functions 145

3.1	Remarks on the uniqueness theorem and the continuity theorem.	145
3.2	Some important characteristic functions	159
3.3	Infinite divisibility	164
3.4	Canonical form of infinitely divisible characteristic functions	168
3.5	Discrete distributions and lattice distributions	186
3.6	Moments and characteristic functions	189
3.7	Characteristic function criteria for uniform integrability	206
3.8	A uniqueness theorem for moment sequences	209
3.9	Symmetric distribution functions \ Symmetric probability measures	210
3.10	Moments and Laplace transforms	211

RETRACTED CHAPTER: 4 Independence 214

4.1	Definitions	214
4.2	Moments and uniform integrability of sums	233
4.3	Modes of convergence	238
4.4	Inequalities. Set II	246
4.5	Continuation of (4.3.2)(viii) and (4.3.2)(ix)	253
4.6	Infinite series of independent random variables.	257
4.7	The weak law of large numbers	262
4.8	The strong law of large numbers	274

RETRACTED CHAPTER: 5 The Central Limit Theorem and its Ramifications 283

5.1	Some elementary results	283
5.2	Weak limit of sums of infinitesimal variables	292
5.3	CLT (Lindeberg)	294
5.4	CLT for iid variables without variance and a converse to the CLT	314
5.5	Erdős-Kac invariance principle	330
5.6	Functional CLT or Donsker form of CLT	336
5.7	Wiener measure and representation for a Brownian Motion Process	345
5.8	Brownian Motion Process on $[0, \infty)$	350
5.9	Some basic properties of a Brownian Motion Process	351
5.10	Hölder continuous spaces	365

RETRACTED CHAPTER: 6 The law of the iterated logarithm	367
6.1 Introduction	367
6.2 Strassen LIL for Brownian Motion Processes: Bulinskii version	377
6.3 Conditioning	385
6.4 Properties of conditional expectation	393
6.5 Regular conditional probability measures	407
6.6 Skorohod embedding	418
6.7 The strong Markov property of a BMP	425
6.8 Studying the tail behaviour of the Skorohod time	438
6.9 Using the tool of Skorohod representation	442
6.10 Functional LIL	454
RETRACTED CHAPTER: 7 Discrete Time Markov Chains	458
7.1 From independence to Markov dependence	458
7.2 Chapman-Kolmogorov equation	467
7.3 Solidarity theorems	478
7.4 Long term behaviour of transition probabilities	487
7.5 Absorption probabilities	495
7.6 Stationary distributions	504
7.7 Geometric ergodicity	512
7.8 Examples	524
7.9 Hypothesis D and uniform geometric ergodicity	537
7.10 The central limit theorem for Markov chains.	545
Index	557
