## Biography

---

Yikun Yu was born in Fujian, China on November 16, 1981. He received the B.Sc. degree in electrical engineering from Tsinghua University, Beijing, China in 2002, the M.Sc. degree (with honors) in electrical engineering from Delft University of Technology, Delft, The Netherlands in 2005, and the Ph.D. degree in electrical engineering from Eindhoven University of Technology, Eindhoven, The Netherlands in 2010. During 2004–2005, he was with Automotive Business Line, Philips Semiconductors, Nijmegen, The Netherlands. During 2007–2009, he was with NXP Semiconductors, Research, Eindhoven, The Netherlands. In 2009, he visited the Department of Electrical and Computer Engineering, University of California at San Diego, California, USA. He joined IMEC, Eindhoven, The Netherlands in 2009, as a research scientist. His research interests include analog, RF and millimeter-wave integrated circuit design.

Peter G.M. Baltus was born on July 5th 1960 in Sittard and received his master's degree in Electrical Engineering from Eindhoven University of Technology in 1985, and his Ph.D. degree from the same university in 2004. He worked for 22 years at Philips and later NXP in various functions and locations. In 2007 he started his current job at the Eindhoven University of Technology

as professor in high-frequency electronics and director of the Centre for Wireless Technology, Eindhoven. He holds 16 patents and co-authored more than 30 papers.

Arthur H.M. van Roermund was born in Delft, The Netherlands in 1951. He received the M.Sc. degree in electrical engineering in 1975 from the Delft University of Technology and the Ph.D. degree in Applied Sciences from the K.U.Leuven, Belgium, in 1987. From 1975 to 1992 he was with Philips Research Laboratories in Eindhoven. From 1992 to 1999 he has been a full professor at the Electrical Engineering Department of Delft University of Technology, where he was chairman of the Electronics Research Group and member of the management team of DIMES. From 1992 to 1999 he has been chairman of a two-years post-graduate school for “chartered designer”. From 1992 to 1997 he has been consultant for Philips. October 1999 he joined Eindhoven University of Technology as a full professor, chairing the Mixed-signal Microelectronics Group. Since September 2002 he is also director of research of the Department of Electrical Engineering. He is chairman of the board of ProRISC, a nation-wide microelectronics platform; a member of the ICT research platform for The Netherlands (IPN); and a member of the supervisory board of the NRC Photonics research centre. Since 2001, he is one of the three organisers of the yearly workshop on Advanced Analog Circuit Design (AACD). In 2004 he achieved the ‘Simon Stevin Meester’ award, coupled to a price of 500.000 euro, for his scientific and technological achievements. In 2007 he was member of an international assessment panel for the Department of Electronics and Information of Politecnico di Milano, and in 2009 for Electronics and Electrical Engineering for the merged Aalto University Finland. He authored/co-authored more than 300 articles and 18 books.
