## SECTION 1 GENERAL ASPECTS

- 1 Introduction** 13  
Importance of rheumatology in practice – Classification of rheumatic disorders – Frequency of rheumatic disorders in family practice – The outcome and prognosis of rheumatic diseases
- 2 Some illustrative problems** 23  
Ankylosing spondylitis – Non-steroidal anti-inflammatory drugs – Pain and paraesthesiae in arms – The acute back – The painful foot – A gouty attack – The painful hip – A knee effusion – Laboratory investigations – The acute neck – Helpful organizations – Polymyalgia rheumatica – Early rheumatoid arthritis – The painful shoulder – Tennis elbow
- 3 Diagnosis and assessment of rheumatic disorders** 29  
Symptoms, signs and their diagnostic significance – X-rays and laboratory investigations – Early diagnosis: indications for referral for further opinion
- 4 Effect of the psyche on rheumatism** 47  
Assessment of the 'psychological overlay' – Psychological and emotional disturbance: their manifestations in rheumatology – pure – psychogenic rheumatism

- 5 Basic management of arthritis and rheumatism** 51  
Pain relief – Disease activity and its reduction – Improvement of mobility and function – Analgesics – Anti-inflammatory drugs – Practical procedures in family practice – Physiotherapy – Occupational therapy and rehabilitation

SECTION 2 THE COMMON RHEUMATIC DISORDERS

- 6 Soft-tissue (non-articular) rheumatism** 77  
Classification – Clinical varieties and treatment
- 7 Osteoarthritis** 85  
Aetiology and pathology – Clinical varieties – Management in family practice – Management in hospital
- 8 Rheumatoid arthritis** 91  
Early recognition – Complications – Differential diagnosis – Management of the early case in practice – Hospital management – Rheumatoid arthritis in children and the elderly
- 9 Ankylosing spondylitis and seronegative spondarthritis** 103  
Concept of seronegative spondarthritis – Ankylosing spondylitis – Clinical features – Management in practice
- 10 Gout and crystal deposition arthritis** 109  
Crystal deposition arthritis: clinical varieties – Gout: investigation of patients – Treatment of gout – Investigation and treatment of chondrocalcinosis

SECTION 3 REGIONAL PAIN SYNDROMES

- 11 Pain in the neck and back** 117  
Common causes of pain – Investigation of neck pain syndromes – Treatment of neck pain syndromes – Investigation of low back pain – Treatment of low back pain
- 12 Pain syndromes of the upper limb** 125  
Causes of pain – Diagnosis and treatment of pain

## Series Foreword

---

---

This series of books is designed to help general practitioners. So are other books. What is unusual in this instance is their collective authorship; they are written by specialists working at district general hospitals. The writers derive their own experience from a range of cases less highly selected than those on which textbooks are traditionally based. They are also in a good position to pick out topics which they see creating difficulties for the practitioners of their district, whose personal capacities are familiar to them; and to concentrate on contexts where mistakes are most likely to occur. They are all well-accustomed to working in consultation.

All the authors write from hospital experience and from the viewpoint of their specialty. There are, therefore, matters important to family practice which should be sought not within this series, but elsewhere. Within the series much practical and useful advice is to be found with which the general practitioner can compare his existing performance and build in new ideas and improved techniques.

These books are attractively produced and I recommend them.

*J. P. Horder OBE  
President, The Royal College  
of General Practitioners*
