PLANT TISSUE CULTURE MANUAL SUPPLEMENT 5

PLANT TISSUE CULTURE MANUAL

Supplement 5

Edited by:

K. LINDSEY

Department of Botany, University of Leicester, U.K.

Springer-Science+Business Media, B.V.

Library of Congress Cataloging-in-Publication Data

Plant tissue culture manual: fundamentals and applications / edited by K. Lindsey

p. cm.

Includes bibliographical references and index.

ISBN 978-94-011-7653-8 (acid-free paper).

Plant Tissue Culture Manual

Supplement 5, May 1995

INSTRUCTIONS FOR SUPPLEMENT 5

Preliminary pages

Replace: Table of Contents

Section D

Add after Chapter D8:

- Chapter D9: P. Anthony, R. Marchant, N.W. Blackhall, J.B. Power, M.R. Davey, Nottingham, UK/Chemical fusion of protoplasts

Section E

Add:

- Chapter E5: Chun-ming Liu, Zhi-hong Xu and Nam-Hai Chua, Singapore and New York, USA/*In vitro* culture of *Brassica juncea* zygotic proembryos

Section G

Add:

- Chapter G3: W.G.W. Kurz, K. Constabel, R.T. Tyler, Saskatchewan, Canada/Biosynthesis of monoterpenoid indole alkaloids *in vitro*

Section H

Add:

- Chapter H1: W. Hüsemann, Münster, Germany/Establishment of Photoautotrophic Cell Cultures
- Chapter H2: M. Sugiyama and H. Fukuda, Sendai, Japan/*Zinnia* mesophyll culture system to study xylogenesis
- Chapter H3: H. Kodama and A. Komamine/Cell cycle studies: induction of synchrony in suspension cultures of *Catharanthus roseus* cells

End matter

Replace: Index

Dear Reader

We would very much appreciate receiving your suggestions and criticisms on the *Plant Tissue Culture Manual*. They will be most helpful during our preparations for future supplements.

Would you please answer the questions listed below, and send your comments with any further suggestions you may have, to *Ir. A. Plaizier* at the above-mentioned address.

Thank you for your assistance!

A. Plaizier
Publisher

PLANT TISSUE CULTURE MANUAL

1. What errors have you found? (list page numbers and describe mistakes)
2. What protocols do you find to be confusing or lacking in detail? (list chapter numbers and page numbers and describe problems)
3. What protocols do you feel should be replaced in future supplements with newer (better) methods?
4. What new topics or other material would you like to see included in future supplements?

Please print or type your answers in the space below, and continue overleaf.

Contents

Preface

SECTION A: BASIC TECHNIQUES – CELL & TISSUE CULTURE OF MODEL SPECIES

1. Media preparation
O.L. Gamborg, Fort Collins, USA
2. The initiation and maintenance of callus cultures of carrot & tobacco
R.D. Hall, Wageningen, The Netherlands
3. The initiation and maintenance of plant cell suspension cultures
R.D. Hall, Wageningen, The Netherlands
4. Shoot cultures and root cultures of tobacco
J.F. Topping and K. Lindsey, Leicester, UK
5. Somatic embryogenesis in orchardgrass
M.E. Horn, Davis, USA
6. *Arabidopsis* regeneration and transformation (leaf & cotyledon explant system)
R. Schmidt and L. Willmitzer, Berlin, Germany
7. *Arabidopsis* protoplast transformation and regeneration
B. Damm and L. Willmitzer, Berlin, Germany
8. *Arabidopsis* regeneration and transformation (root explant system)
D. Valvekens, M. van Lijsebettens and M. van Montagu, Gent, Belgium
9. Somatic embryogenesis in carrot
A.D. Krikorian and D.L. Smith, New York, USA
10. Low density cultures: microdroplets and single-cell nurse cultures
G. Spangenberg, Ladenburg, Germany, and HU Koop, Munich, Germany
11. Tobacco protoplast isolation, culture & regeneration
I. Negrutiu, Gembloux, Belgium

SECTION B: TISSUE CULTURE & TRANSFORMATION OF CROP SPECIES

1. Embryogenic callus, cell suspension and protoplast cultures of cereals
I.K. Vasil and V. Vasil, Gainesville, USA
2. Transformation and regeneration of rice protoplasts
J. Kyoizuka and K. Shimamoto, Yokohama, Japan

3. Transformation and regeneration of orchardgrass protoplasts
M.E. Horn, Davis, USA
4. Transformation and regeneration of oilseed rape protoplasts
D. Rouan and P. Guerche, Versailles, France
5. Regeneration and transformation of potato by *Agrobacterium tumefaciens*
R.G.F. Visser, Wageningen, Netherlands
6. Transformation of tomato with *Agrobacterium tumefaciens*
S. McCormick, Albany, USA
7. Regeneration and transformation of sugarbeet by *Agrobacterium tumefaciens*
K. Lindsey, P. Gallois and C. Eady, Leicester, UK
8. Regeneration and transformation of apple (*Malus pumila* Mill.)
D.J. James and A.M. Dandekar, Davis, USA
9. Transformation and regeneration of maize protoplasts
C.A. Rhodes and D.W. Gray, Palo Alto, USA
10. Regeneration and transformation of barley protoplasts
P. Lazzeri, A. Jähne and H. Lörz, Hamburg, Germany
11. *Agrobacterium*-mediated transformation of potato stem and tuber tissue, regeneration and PCR screening for transformation
J.P. Sychalla and M.W. Bevan, Norwich, UK

SECTION C: PROPAGATION & CONSERVATION OF GERMPLASM

1. Clonal propagation of orchids
Y. Sagawa, Honolulu, USA
2. Clonal propagation of palms
B. Tisserrat, Pasadena, USA
3. Clonal propagation of conifers
T.A. Thorpe and I.S. Harry, Alberta, Canada
4. Cytological techniques
A. Karp, Long Ashton, UK
5. Restriction fragment analysis of somaclones
R.H. Potter, As, Norway
6. Virus elimination and testing
M.C. Coleman and W. Powell, Dundee, UK
7. Clonal propagation of *Citrus*
T.S. Rangan, Pasadena, USA

8. Clonal propagation of eucalypts
J.A. McComb, Perth, Australia

SECTION D: DIRECT GENE TRANSFER & PROTOPLAST FUSION

1. Gene transfer by particle bombardment
T.M. Klein, S. Knowlton and R. Arentzen, Wilmington, USA
2. Transformation of pollen by particle bombardment
D. Twell, T.M. Klein and S. McCormick, Albany, USA
3. Electrical fusion of protoplasts
M.G.K. Jones, Murdoch, Australia
4. Cybrid production and selection
E. Galun and D. Aviv, Rehovot, Israel
5. Fluorescence-activated analysis and sorting of protoplasts and somatic hybrids
D.W. Galbraith, Lincoln, USA
6. RFLP analysis of organellar genomes in somatic hybrids
E. Pehu, Helsinki, Finland
7. Isolation and uptake of plant nuclei
P.K. Saxena and J. King, Saskatoon, Canada
8. *In situ* hybridization to plant metaphase chromosomes: Radioactive and non-radioactive detection of repetitive and low copy number genes
J. Veuskens, S. Hinnisdaels & A. Mouras, Talence, France
- *9. Chemical fusion of protoplasts
P. Anthony, R. Marchant, N.W. Blackhall, J.B. Power, M.R. Davey, Nottingham, UK

SECTION E: REPRODUCTIVE TISSUES

1. *In vitro* fertilisation of maize
E. Kranz, Hamburg, Germany
2. Endosperm culture
S. Stirn and H.-J. Jacobsen, Bonn, Germany
3. Endosperm culture
B.M. Johri and P.S. Srivastava, Delhi, India
4. Hybrid embryo rescue
A. Agnihotri, New Delhi, India

* Included in Supplement 5.

- *5. *In vitro* culture of *Brassica juncea* zygotic proembryos
Chun-ming Liu, Zhi-hong Xu and Nam-Hai Chua,
Singapore and New York, USA

SECTION F: MUTANT SELECTION

1. Use of chemical and physical mutagens *in vitro*
P.J. Dix, Maynooth, Ireland

SECTION G: SECONDARY METABOLITES

1. Tropane alkaloid biosynthesis *in vitro*
R. Robins, Colney, Norwich, UK
2. Anthocyanin biosynthesis *in vitro*
A. Komamine and K. Kakegawa, Tsukuba City, Ibaraki, Japan
- *3. Biosynthesis of monoterpene indole alkaloids *in vitro*
W.G.W. Kurz, K. Constabel, R. Tyler, Saskatchewan, Canada

SECTION H: TISSUE CULTURE TECHNIQUES FOR FUNDAMENTAL STUDIES

- *1. Establishment of photoautotrophic cell cultures
W. Hüsemann, Münster, Germany
- *2. *Zinnia* mesophyll culture system to study xylogenesis
M. Sugiyama and H. Fukuda, Sendai, Japan
- *3. Cell cycle studies: induction of synchrony in suspension cultures of
Catharanthus roseus cells
H. Kodama and A. Komamine
- * Index

* Included in Supplement 5.
