MODERN MATHEMATICAL MODELS OF TIME AND THEIR APPLICATIONS TO PHYSICS AND COSMOLOGY

Proceedings of the International Conference held in Tucson,
Arizona, 11–13 April, 1996

Edited by

W.G. TIFFT

*Department of Astronomy, University of Arizona,
Tucson, Arizona, U.S.A.*

and

W.J. COCKE

TABLE OF CONTENTS

Preface	1
DAY 1 SESSIONS 1–3	
Session 1. The Redshift	
HALTON ARP / The pair of X-ray sources across NGC 4258, its relation to intrinsic redshifts, ejection and quantization	9
JACK W. SULENTIC and J. BRETT SMITH / A fresh look at discordant redshift galaxies in compact groups	23
W.G. TIFFT / Evidence for quantized and variable redshifts in the cosmic background rest frame	29
W.M. NAPIER and B.N.G. GUTHRIE / Testing for quantized redshifts. I. The project	57
T.E. NORDGREN, Y. TERZIAN and E.E. SALPETER / The distribution of galaxy pair redshifts	65
Session 2. Critical Properties of the Universe	
LI-ZHI FANG and YI-PENG JING / Density fluctuations on super-Hubble scales	73
S.A. GREGORY / The challenge of large-scale structure	81
ANTHONY L. PERATT / Electric space: evolution of the plasma universe	89
J.G. LAROS / Gamma-ray bursts: should cosmologists care?	105
Session 3. Statistical Methods	
W.M. NAPIER and B.N.G. GUTHRIE / Testing for quantized redshifts. II. The local supercluster	111
W.I. NEWMAN and Y. TERZIAN / Power spectrum analysis and redshift data	127

W. COCKE, C. DEVITO and A. PITUCCO / Statistical analysis of the occurrence of periodicities in galaxy redshift data	143
P.A. STURROCK / Zooming in on the redshift problem	159

DAY 2 SESSIONS 4–5

Session 4. New Approaches to Cosmology

G. BURBIDGE / Two universes	169
JAYANT V. NARLIKAR / Anomalous redshifts and the variable mass hypothesis	177
W.G. TIFFT / Three-dimensional quantized time in cosmology	187

Session 5. Gravitation and Time in General Relativity

W.J. COCKE / The stress-energy tensor and the deflection of light in 6-dimensional general relativity	211
P.C.W. DAVIES / Einstein's greatest mistake?	219
ROGER PENROSE / Time, space and complex geometry	229
D.F. ROSCOE / Discrete spatial scales in a fractal universe	231
TOM VAN FLANDERN / Possible new properties of gravity	249
LEOPOLD HALPERN / On the cosmic limits of physical laws	263
MENDEL SACHS / Changes in concepts of time from Aristotle to Einstein	269
METHOD SANIGA / On the transmutation and annihilation of pencil-generated spacetime dimensions	283

DAY 3 SESSIONS 6–7

Session 6. Nuclear and Particle Physics

VINCENT ICKE / Particles, space and time	293
AVSHALOM C. ELITZUR / Time anisotropy and quantum measurement: Clues for transcending the geometrical picture of time	313
ARI LEHTO / 3-D Period doubling and magnetic moments of particles	321
C. WOLF / Relics of the primordial origins of space and time in the low energy world	329
L.W. MORROW / Unexplained empirical relations among certain scatterings	347
MARTIN KOKUS / Spherical rotation, particles and cosmology	353

Session 7. Mathematical Models and Methods

CARL L. DEVITO / A Non-linear model for time	357
W.M. STUCKEY / Defining spacetime	371
A.P. PITUCCO / Some elementary geometric aspects of extending the dimension of the space of instants	375
B.R. FRIEDEN / Fisher information as a measure of time	387
