ACKNOWLEDGEMENTS

This book is a revised version of my Ph.D. thesis, awarded in May 1997. It is thus the end product of longstanding research to which many people have contributed in different ways and degrees. Thanks are due to many. I apologize to anyone inadvertently omitted.

My first special thanks goes to Annarita Puglielli, my tutor and thesis supervisor, who always stood by me. She helped me in every stage of my research, provided criticism and advice and gave me support when I most needed it. I also reaped the benefit of her wisdom and good humor, which I hope never to lose.

Thanks to Marco Svolacchia, who discussed different aspects of my work with me and to Lunella Mereu for her continuous observations, suggestions and much needed, steady encouragement.

I would like to thank Marina Nespor who guided my phonological studies in the early stages of research and provided substantial support for its subsequent development. Thanks are also due to Maria Teresa Guasti for discussion of some of the prosodic issues.

A special thank you goes to Michael Kenstowicz, whose interest in and help with the project went well beyond what anyone could expect. He read my thesis patiently, discussed and commented on it throughout.

I would also like to thank the Department of Linguistics of the University of Roma Tre, whose professors and researchers, provided me with a fine environment in which to pursue my work. Thanks to Raffaele Simone, head of Department, who contributed to my linguistic training with his professional and friendly criticisms and suggestions. Thanks also to Giuseppina Vecchioni, for administrative help and cheerful support.

Thanks to my informants for their help and patience in submitting to hundred of tests. Thanks to my fellow students and friends, Silvia Pieroni in particular, for their companionship and conversation, linguistic and otherwise. Thanks also to Hugo Bowles who checked my English and gave me some final suggestions for the book.

I also acknowledge the help of two anonymous reviewers who gave me useful comments, for which I am very grateful.

It was a pleasure to work with the Kluwer Publishing Editor, Vanessa Nijweide.

I finally wish to thank my family. Mom, Dad. Stefano. This would never have been done without them.
