### *About this Series*

The series “Advances in Intelligent Systems and Computing” contains publications on theory, applications, and design methods of Intelligent Systems and Intelligent Computing. Virtually all disciplines such as engineering, natural sciences, computer and information science, ICT, economics, business, e-commerce, environment, healthcare, life science are covered. The list of topics spans all the areas of modern intelligent systems and computing.

The publications within “Advances in Intelligent Systems and Computing” are primarily textbooks and proceedings of important conferences, symposia and congresses. They cover significant recent developments in the field, both of a foundational and applicable character. An important characteristic feature of the series is the short publication time and world-wide distribution. This permits a rapid and broad dissemination of research results.

# Preface

The first International Conference on Computer Vision and Image Processing (CVIP 2016) was organized at Indian Institute of Technology Roorkee (IITR) during 26 to 28 February, 2016. The conference was endorsed by International Association of Pattern Recognition (IAPR) and Indian Unit for Pattern Recognition and Artificial Intelligence (IUPRAI), and was primarily sponsored by the Department of Science and Technology (DST) and Defense Research and Development Organization (DRDO) of the Government of India.

CVIP 2016 brought together delegates from around the globe in the focused area of computer vision and image processing, facilitating exchange of ideas and initiation of collaborations. Among a total of 253 paper submissions, 106 (47 %) were accepted based on multiple high-quality reviews provided by the members of our technical program committee from 10 different countries. We, the organizers of the conference, were ably guided by its advisory committee composed of distinguished researchers in the field of computer vision and image processing from seven different countries.

A rich and diverse technical program was designed for CVIP 2016 comprising 5 plenary talks, and paper presentations in 8 oral and 3 poster sessions. Emphasis was given on latest advances in vision technology such as deep learning in vision, non-continuous long-term tracking, security in multimedia systems, egocentric object perception, sparse representations in vision and 3D content generation. The papers for the technical sessions were divided based on their theme relating to low-, mid- and high-level computer vision and image/video processing and their applications. This edited volume contains the papers presented in the technical sessions of the conference, organized session-wise.

Organizing CVIP 2016, which culminates with the compilation of these two volumes of proceedings, has been a gratifying and enjoyable experience for us.

The success of the conference was due to synergistic contributions of various individuals and groups including the international advisory committee members with their invaluable suggestions, the technical program committee members with their timely high-quality reviews, the keynote speakers with informative lectures,

the local organizing committee members with their unconditional help, and our sponsors and endorsers with their timely support.

Finally, we would like to thank Springer for agreeing to publish the proceedings in their prestigious Advances in Intelligent Systems and Computing (AISC) series. Hope the technical contributions made by the authors in these volumes presenting the proceedings of CVIP 2016 will be appreciated by one and all.

## About the Editors

**Balasubramanian Raman** is Associate Professor in the Department of Computer Science and Engineering at Indian Institute of Technology Roorkee from 2013. He has obtained M.Sc degree in Mathematics from Madras Christian College (University of Madras) in 1996 and Ph.D. from Indian Institute of Technology Madras in 2001. He was a postdoctoral fellow at University of Missouri Columbia, USA in 2001–2002 and a postdoctoral associate at Rutgers, the State University of New Jersey, USA in 2002–2003. He joined Department of Mathematics at Indian Institute of Technology Roorkee as Lecturer in 2004 and became Assistant Professor in 2006 and Associate Professor in 2012. He was a Visiting Professor and a member of Computer Vision and Sensing Systems Laboratory at the Department of Electrical and Computer Engineering in University of Windsor, Canada during May–August 2009. So far he has published more than 190 papers in reputed journals and conferences. His area of research includes vision geometry, digital watermarking using mathematical transformations, image fusion, biometrics and secure image transmission over wireless channel, content-based image retrieval and hyperspectral imaging.

**Sanjeev Kumar** is working as Assistant Professor with Department of Mathematics, Indian Institute of Technology Roorkee from November 2010. Earlier, he worked as a postdoctoral fellow with Department of Mathematics and Computer Science, University of Udine, Italy from March 2008 to November 2010. He has completed his Ph.D. in Mathematics from IIT Roorkee, India in 2008. His areas of research include image processing, inverse problems and machine learning. He has co-convened the first international conference on computer vision and image processing in 2016, and has served as a reviewer and program committee member of more than 20 international journals and conferences. He has conducted two workshops on image processing at IIT Roorkee in recent years. He has published more than 55 papers in various international journals and reputed conferences. He has completed a couple of sponsored research projects.

**Partha Pratim Roy** received his Ph.D. degree in Computer Science in 2010 from Universitat Autònoma de Barcelona, Spain. He worked as postdoctoral research fellow in the Computer Science Laboratory (LI, RFAI group), France and in Synchromedia Lab, Canada. He also worked as Visiting Scientist at Indian Statistical Institute, Kolkata, India in 2012 and 2014. Presently, Dr. Roy is working as Assistant Professor at Department of Computer Science and Engineering, Indian Institute of Technology (IIT), Roorkee. His main research area is Pattern Recognition. He has published more than 60 research papers in various international journals, conference proceedings. Dr. Roy has participated in several national and international projects funded by the Spanish and French government. In 2009, he won the best student paper award in International Conference on Document Analysis and Recognition (ICDAR). He has gathered industrial experience while working as an Assistant System Engineer in TATA Consultancy Services (India) from 2003 to 2005 and as Chief Engineer in Samsung, Noida from 2013 to 2014.

**Debashis Sen** is Assistant Professor at the Department of Electronics and Electrical Communication Engineering in Indian Institute of Technology (IIT) Kharagpur. Earlier, from September 2014 to May 2015, he was Assistant Professor at the Department of Computer Science and Engineering in Indian Institute of Technology (IIT) Roorkee. Before joining Indian Institute of Technology, he worked as a postdoctoral research fellow at School of Computing, National University of Singapore for about 3 years. He received his PhD degree from the Faculty of Engineering, Jadavpur University, Kolkata, India in 2011 and his M.A.Sc. degree from the Department of Electrical and Computer Engineering, Concordia University, Montreal, Canada in 2005. He has worked at the Center for Soft Computing Research of Indian Statistical Institute from 2005 to 2011 as a research scholar, and at the Center for Signal Processing and Communications and Video Processing and Communications group of Concordia University as a research assistant from 2003 to 2005. He is currently an associate editor of IET Image Processing journal. He has co-convened the first international conference on computer vision and image processing in 2016, and has served as a reviewer and program committee member of more than 30 international journals and conferences. Over the last decade, he has published in high-impact international journals, which are well cited, and has received two best paper awards. He heads the Vision, Image and Perception group in IIT Kharagpur. He is a member of Institute of Electrical and Electronics Engineers (IEEE), IEEE Signal Processing Society and Vision Science Society (VSS). His research interests include vision, image and video processing, uncertainty handling, bio-inspired computation, eye movement analysis, computational visual perception and multimedia signal processing.
