Acknowledgements

The senior editor of this volume, as President of the Association of Gerontology (AGI), organized the 17th Biennial Conference of the Association of Gerontology, India (AGI), and International Conference on Engaging and Empowering the Elderly (ICEEE-2014) during September 15–16, 2014, at the Centre for Development Studies, Thiruvananthapuram, Kerala. About 200 scholars and students participated in the conference, and 155 papers were presented both in the plenary and in the parallel sessions such as bio-gerontology, geriatric medicine, psycho-gerontology, elder abuse, economics of aging, health care, social support networks, living with dignity, well-being, living arrangements, and care for the elderly. The seminar was sponsored by HelpAge India; Ministry of Rural Development, Government of India; Ministry of Social Justice and Empowerment, Government of India; and United Nations Fund for Population Activities, New Delhi.

As a chairman of the conference, the senior editor asked some of the participants to take a lead in producing edited volumes based on the papers presented at the conference as we received many good quality papers—rather unusual in most big conferences. We are pleased to mention that two more volumes are published/forthcoming with Springer:

Topics in Bio-medical Gerontology—Editors: P.C. Rath, R. Sharma and S. Prasad, 2017, <http://www.springer.com/in/book/9789811021541>.

Abuse and Neglect of the Elderly in India—Editors: Mala Kapur Shankardass and S. Irudaya Rajan (forthcoming).

This volume is based on the papers presented in the two themes: care of the elderly and living arrangements. To fill gaps in discussions, we invited more papers. We wish to thank all the contributors who have put in considerable work to bring out the volume on time. We also would like to thank the Springer team at India, in particular Shinjini Chatterjee, Priya Vyas, and K.M. Govardhana for their hard work and encouragement to bring the book out on time.

About the Editors

S. Irudaya Rajan is a Professor at the Centre for Development Studies, Kerala, India. Currently, he is the President of the Association of Gerontology (AGI) as well as Kerala Economic Association (KEA). He has published extensively in national and international journals on social, economic, health and demographic facets of ageing. He is the lead author of the book, *India's Elderly: Burden or Challenge?* (1999), and has edited *Social Security for the Elderly: Experiences from South Asia* (2008). He has developed the first longitudinal Ageing Survey in India (Kerala) since 2004, repeated every 3 years, entering into the fifth wave in 2016. Professor Rajan has been involved in several projects on ageing funded by the United Nations (UN), United Nations Fund for Population Activities (UNFPA), the World Bank, International Labour Organization (ILO), HelpAge International, South Asian Network of Economic Institutes, Indo-Dutch Programme on Alternatives in Development, Shastri Indo-Canadian Institute and International Development Research Centre. He has also undertaken considerable research on migration and is the editor the annual series, India Migration Report as well as editor-in-chief of the journal *Migration and Development*.

Gayathri Balagopal is an independent researcher based in south India. She has worked on health and care needs of the elderly. Her work experience has been in the development sector as researcher with the Banyan Academy of Leadership in Mental Health, Chennai, and as consultant (Research, Monitoring and Evaluation) with the Health Portfolio of the Navajbai Ratan Tata Trust and Sir Ratan Tata Trust, Mumbai. She has researched rehabilitation of homeless women with mental health issues, employment problems confronting persons with mental health issues and documented community mental health programmes in India. Her research interests are in gerontology, public health, mental health and social security.
