Preface

The International Conference on Advanced Informatics for Computing Research (ICAICR 2017) targeted state-of-the-art as well as emerging topics pertaining to advanced informatics for computing research and its implementation in engineering applications. The objective of this international conference is to provide opportunities for researchers, academicians, people from industry, and students to interact and exchange ideas, experience, and expertise on information and communication technologies. Besides this, participants were enlightened about current and emerging technological developments in the field of advanced informatics and its applications.

The International Conference on Advanced Informatics for Computing Research (ICAICR 2017) was hosted by Lyallpur Khalsa College of Engineering, Jalandhar, Punjab, India on March 17–18, 2017 in association with Namibia University of Science & Technology, Namibia, and technically sponsored by the CSI Chandigarh Chapter, India and the Southern Federal University, Russia.

We are highly thankful to our valuable authors for their contribution and our Technical Program Committee for their immense support and motivation towards making the first ICAICR 2017 a success. We are also grateful to our keynote speakers for sharing their precious work and enlightening the delegates of the conference. We express our sincere gratitude to our publication partner, Springer, for believing in us.
