## **Series Editors**

Kinshuk, Athabasca, AB, Canada

Ronghuai Huang, Beijing Normal University, Beijing, China

Chris Dede, Technology, Innovation, and Education, Harvard University,  
Cambridge, MA, USA

This book series aims to establish itself as a medium for the publication of new research and development of innovative paradigms, models, architectures, conceptual underpinnings and practical implementations encompassed within smart computing and intelligence.

The scope of the series includes but is not limited to smart city, smart education, health informatics, smart ecology, data and computational analytics, smart society, smart learning, complex systems-chaos, computational thinking, brain computer interaction, natural/computer interaction, humanoid behaviour, and impact of educational psychology on computing.

The cornerstone of this series' editorial policy is its unwavering commitment to report the latest results from all areas of smart computing and intelligence research, development, and practice. Our mission is to serve the global smart computing and intelligence community by providing a most valuable publication service.

## About the Editors

**Prof. Dr. Paloma Díaz** is a Full Professor at the Department of Computer Science and Engineering of Universidad Carlos III de Madrid. With a degree and Ph.D. in Computer Science and Engineering from Universidad Politécnica de Madrid, she has been involved in interdisciplinary research in the Interactive Systems research group (DEI LAB) and the Institute of Culture and Technology from UC3M. Her main areas of interest are interaction design, web/usability engineering, mobile and ubiquitous computing, big data visualization, civic participation, ICT for learning and teaching, and digital cultural heritage. Since 1996, she leads the DEI LAB ([www.dei.inf.uc3m.es](http://www.dei.inf.uc3m.es)) that is focused on the design and development of interactive systems, data visualizations, collaborative systems, and learning and simulation. The group does use-inspired basic research in areas such as emergency and crisis management, operation control, elearning and training, and cultural heritage and it also goes into enabling research to devise the capabilities of emerging interactive devices. Dr. Díaz has led national and international research projects about the application of interactive technologies for design, learning and training, crisis management, civic participation or the operation of electrical smart grids. Some of her publications can be reached at dblp and researchGate. She has also organized international conferences and symposiums like IEEE ICALT 2008, IEEE VLHCC 2010, and IS-EUD 2015, ISCRAM-MEd 2017 as well as tracks in conferences such as Social Networking and Collaboration at ISCRAM 2010–2013, Serious games and simulation at ISCRAM 2014–2015, Creativity in Collaborative Design at ACM Cognition and Creativity 2015, or the track Technologies for Open Learning and Education at ICALT 2017 and ICALT 2018.

**Dr. Andri Ioannou** is an Assistant Professor in the Department of Multimedia and Graphic Arts of the Cyprus University of Technology, Director of the Cyprus Interaction Research Lab (<https://www.cyprusinteractionlab.com/>), and Team Leader of the “Educational Media for Education and Edutainment” Multidisciplinary

research Group within the Research Centre for Interactive Media, Smart Systems, and Emerging Technologies (RISE) of Cyprus. Andri has a Ph.D. in Educational Technology from the University of Connecticut, USA, an MA in Education from the same University, and a BSc in Computer Science from the University of Cyprus. Her research interests contribute to several key areas of Educational Technology, including (i) design and evaluation of innovative educational technologies and learning environments; (ii) development and evaluation of pedagogical frameworks and ICT tools for learning in both distant and collocated, formal and non-formal learning settings; (iii) study of tools and pedagogies targeting the development of skills within the twenty-first-century learning framework, collaboration, problem solving, leaving-in-the-world skills; (iv) use of educational technology for social change. Dr. Ioannou has established a respected research record through numerous publications in prestigious international journals and international conferences (e.g., *Computers in Human behaviour*, *Interactive with Computers*, *Education Technology and Society*, *Educational Technology Research and Development*, *Educational Computing research* etc.). Dr. Andri Ioannou has obtained considerable funding in support of her research from funding agencies in Cyprus and the EU. She has participated in the capacity of coordinator or research collaborator in programmes of the H2020 framework, Erasmus+ and programs of the Cyprus National Research Foundation, focused on technology-enhanced learning in K-12, higher education and vocational training (e.g., KA2 Project INTELed 2017-1-CY01-KA201-026733, ENGINITE 2017-1-CY01-KA202-026728, H2020-WIDESPREAD-01-2016-2017 grant no: 739578, NOTRE H2020-TWINN grant No: 692058).

**Dr. Kaushal Kumar Bhagat** is currently working as an Assistant Professor in the Centre for Educational Technology at the Indian Institute of Technology (IIT), Kharagpur, India. He received his Ph.D. from the Graduate Institute of Science Education at the National Taiwan Normal University in September 2016. He then served a 2-year postdoctoral position at the Smart Learning Institute at Beijing Normal University. He has published several referred journal articles and book chapters. Dr. Bhagat was presented NTNU International Outstanding Achievement Award. He was also awarded 2017 IEEE TCLT Young Researcher award. His research area of interest includes online learning, augmented reality, virtual reality, mathematics education, flipped classroom, formative assessment, and technology-enhanced learning.

**Prof. J. Michael Spector** is a Professor of Learning Technologies at the University of North Texas. He has been Editor of Educational Technology Research & Development for 15 years. He edited the third and fourth editions of the Handbook of Research on Educational Communications and Technology as well as the Encyclopedia of Educational Technology. His research focuses on intelligent support for instructional design, assessing learning in complex domains, and technology integration in education.

## Contributors

**Leonard A. Annetta** as the Taft Distinguished Professor of Science Education at East Carolina University, Dr. Annetta's research has focused on innovative technologies and the effect of Serious Educational Games on science learning of teachers and students in underserved populations. He has been awarded over \$19 million as Lead Principal Investigator for his research to date and has won numerous awards and honors for his work.

In 2008, Dr. Annetta was honored with three awards for his extension work teaching K-12 teachers and students' video game design and creation. These awards were progressive from the College of Education Outstanding Extension Service Award, to the induction into the NC State University Academy of Outstanding Faculty Engaged in Extension to the Distinguished Alumni Engaged in Extension and Outreach award. Moreover, Dr. Annetta has twice been awarded the National Technology Leadership Initiative Fellowship in Science Education and Technology from the Association of Science Teacher Education and the Society for Information Technology and Teacher Education. He has thrice been invited to the National Science and Engineering Festival as one of the top 50 speakers in STEM. [www.Lenannetta.com](http://www.Lenannetta.com)

**Jordan Beck** is an Assistant Research Professor in the College of Information Sciences and Technology and is a member of the Center for Human-Computer Interaction. His research focuses on understanding knowledge production practices in academia and online peer production communities. He is, especially, interested in identifying how these practices might be supported or constrained by interaction design.

**R. Benjamin Shapiro** is an Assistant Professor of Computer Science at the University of Colorado Boulder. He conducts research on creative learning with programmable technologies and, more broadly, on making and learning with technology. He earned his doctorate in Learning Sciences at Northwestern University.

**Dr. Scott W. Brown** is a University of Connecticut *Board of Trustees' Distinguished Professor of Educational Psychology* and Department Head of Educational Psychology at UConn. Dr. Brown has authored more than 170 journal articles and book chapters, 3 books and presented his research on problem-based learning, simulations, memory, and educational technology at international, national, and regional professional conferences. Dr. Brown is a Fellow in both the American Educational Research Association and the Association for Psychological Science. He has received grants from the US Department of Education, NSF, the CDC and the Carnegie Corporation, totalling more than \$15M (USA). Dr. Brown currently serves as the co-principal investigator on the GlobalEd 2 Efficacy Trials grant and 2017 GlobalEd 2.

**Huiying Cai** is an Associate Professor of Department of Educational Technology, Jiangnan University. She obtained her Ph.D. degree in East China Normal University, mentored by Prof. Xiaoqing Gu. Her main research interests are computer-supported collaborative learning and classroom research.

**John M. Carroll** is a Distinguished Professor of Information Sciences and Technology at the Pennsylvania State University. His research is in methods and theory in human–computer interaction, design of interactive information systems for collaborative learning and problem-solving, and spontaneous innovations of people interacting with technology-mediated problems and possibilities. Recent books include *Learning in Communities* (Springer, 2009), *The Neighborhood in the Internet: Design Research Projects in Community Informatics* (Routledge, 2012), *Creativity and Rationale: Enhancing Human Experience by Design* (Springer, 2012), and *Innovative Practices in Teaching Information Sciences and Technology* (Springer, 2014). Carroll serves on several advisory and editorial boards for journals, handbooks, and series. He is editor of the *Synthesis Lectures on Human-Centered Informatics*. Carroll has received the Rigo Award and the CHI Lifetime Achievement Award from ACM, the Silver Core Award from IFIP, the Goldsmith Award from IEEE, and an honorary doctorate in engineering from Universidad Carlos III de Madrid. He is a fellow of AAAS, ACM, IEEE, the Human Factors and Ergonomics Society, the Psychonomics Society, the Society for Technical Communication, and the Association for Psychological Science. In 2018, he received the Faculty Scholar Medal in Social and Behavioral Science from Penn State.

**Dr. Maiga Chang** is a Full Professor in the School of Computing Information and Systems at Athabasca University, Canada. He is now Chair of IEEE Technical Committee of Learning Technology (TCLT). He is Editor in Chief of International Journal of Distance Education Technologies (an EI and Web of Science’s ESCI journal without publication fee) and Section Editor of Education and Science (a free SSCI Open Access journal). Dr. Chang also serves academic international conference events include being program chair of International Conference on Smart Learning Environments (ICSLE 2015, 2018, and 2019), general program chair of IEEE TCLT flagship conference International Conference on Advanced Learning Technologies (IEEE ICALT 2017 to 2019), Program Committee Chair of 15th International Conference on Intelligent Tutoring Systems (ITS 2019), IPC Coordination Co-Chair of International Conference on Computers in Education (ICCE 2018), executive program chair and program co-chair of Global Chinese Conference on Computers in Education (GCCCE) in 2017 and 2016. He has given more than 90 talks and lectures in different conferences, universities, and events. He has participated in more than 290 international conferences and workshops as a Program Committee Member; and, he also has (co-)authored more than 234 proceedings, edited books, special issues, book chapters, journal, and international conference papers.

**Cheng-Li Chen** received his B.S degree in Information Science and Management Systems from Nation Taitung University, Taiwan in 2009. Since 2011, he started to work on his master degree in Information Management at National Kaohsiung First University of Science and Technology, Taiwan and completed it in 2017. He is now a master's student of School of Computing and Information Systems at Athabasca University, Canada, and works on his second master degree. His master thesis supervisor is Dr. Maiga Chang. For his thesis research, he thinks that compared to traditional rewards such as stamps or stickers, the use of in-game items as rewards can attract students much more and can get them motivated to put more efforts on doing their homework and participating in learning activities in online learning environment; for instance, doing discussions with peers in the discussion forums.

**Dr. Nian-Shing Chen** is currently the Feng Tay Chair Professor in the Department of Applied Foreign Languages at National Yunlin University of Science and Technology, Taiwan. He has published over 400 papers in the international referred journals, conferences and book chapters. One of his papers published in *Innovations in Education and Teaching International* was awarded as the top cited article in 2011. He is an author of three books with one textbook entitled "e-Learning Theory & Practice". Dr. Chen received three outstanding research awards from the National Science Council, Taiwan in 2008, 2011–2013 and the Ministry of Science and Technology in 2015–2017. His current research interests include assessing e-Learning course performance; online synchronous teaching and learning; mobile and ubiquitous learning; game-based learning and cognition & Gesture-based learning. Prof. Chen is serving as an editorial board member for many international journals and guest editors for special issues of international journals. He has also organized and chaired numerous international conferences and workshops in the area of advanced learning technologies. Professor Chen is a senior and golden core member of IEEE, ACM and the current Chair for the IEEE Technical Committee on Learning Technology (<http://lttf.ieee.org/>). He was Editor in Chief of the SSCI indexed Journal of Educational Technology & Society.

**Sie Wai Chew** is a doctoral candidate in the Department of Information Management at National Sun Yat-sen University, Taiwan. She received her masters in Applied Statistics from University Malaya (UM), Malaysia in 2009. Her research interests include Critical Thinking Skill, English as a Second Language and System Design in Learning Technology. She served as the Editorial Assistant of the SSCI indexed Journal of Educational Technology & Society.

**Maria Christofi** is a Ph.D. candidate at the Department of Multimedia and Graphic Arts. She holds a BSc in Computer Science (2014) from the University of Cyprus and a MSc in Design and Development of Computer Games and Interactive Technologies (2015) from the Cyprus University of Technology and the University of Cyprus. She is currently a research associate at H2020-TEAMING-RISE (Stage2) project. Her research interests include virtual reality, video games, body ownership, and psychology.

**Yiannis Georgiou** is a postdoctoral researcher with the Cyprus Interaction Lab [CIL] at the Cyprus University of Technology and the Research Center on Interactive Media, Smart Systems, and Emerging Technologies in Nicosia [RISE-N]. His research interests focus on the investigation of immersive and embodied learning environments grounded on emerging technologies, for inquiry and problem-based learning. His research interests also focus on teachers' professional development through participatory design models, for supporting teachers' learning on innovative pedagogies and new technologies.

**Xiaoqing Gu** is a professor of Educational Technology at Faculty of Education, East China Normal University. Her main research interests are learning sciences, learning designs, and CSCL.

**Dr. Christian Gütl** holds a Ph.D. in Computer Science from Graz University of Technology (TUG) and has received the “*venia legendi*” for applied computer science in 2009. He is at the Institute of Interactive Systems and Data Science at TUG in Graz, Austria, where he leads the Motivational Media Technologies (MMT) Group. Christian has authored and coauthored in more than 200 peer-reviewed book chapters, journals, and conference proceedings publications. He is involved in numerous organizational and editorial boards as well as program committees. He is the founding member of the global Immersive Learning Research Network (iLRN), managing editor of J.UCS, and coeditor of the International Journal of Knowledge and Learning (IJKL). His research interests include information search and retrieval, e-education, e-assessment, adaptive media technologies, and virtual and augmented reality for learning and knowledge transfer.

**Michael Holly** is a developer and researcher at the Institute of Interactive Systems and Data Science at Graz University of Technology focusing on designing and development virtual reality and physics simulations. He is development lead at the project Maroon, an interactive virtual physics laboratory. His aim is to provide illustrations of physical phenomena in order to give people a deeper understanding of physics.

**Christopher D. Hromalik** in addition to being a professor at OCC, Mr. Hromalik is a Ph.D. candidate in Instructional Design, Development, and Evaluation at Syracuse University. His research focuses on self-regulated learning, online learning, language instruction, and Universal Design for Learning in community college contexts.

**Dr. Mina C. Johnson-Glenberg** is a cognitive psychologist, 4D thinker, and entrepreneur. Please visit the website of the spin-out company: [www.embodied-games.com](http://www.embodied-games.com)

**Johannes Kopf** is a computer science student and researcher at the Institute of Interactive Systems and Data Science at Graz University of Technology with a focus on the development of VR experiences. He is an assistant at several courses and founding member of the organization “Game Dev Students Graz”, where he contributes with his profound experience in game development. Johannes is also one of the 20 selected members of the Circle of Excellence Graz in the year 2019.

**Dr. Tiffany A. Koszalka** research focus is studying the integration of learning, instruction, and technologies in instructional and learning environments. She has worked in corporate, higher education and K-12 environments exploring the use of educational technologies for teaching and learning.

**Dr. Rita Kuo** is an Instructor in the Department of Computer Science and Engineering, New Mexico Institute of Mining and Technology (New Mexico Tech). Her research interests include e-learning, computerized adaptive testing, computerized item generation, cognitive theory, intelligent agent, mobile learning, and game-based learning. She is the associate editor of *Technology for Education and Learning* since 2014. She has been the track coordinator of ICALT 2018 (the 18th International Conference on Advanced Learning Technologies) Track 7: Technology-Enhanced Science, Technology, Engineering and Math Education (TeSTEM) and sub-conference chair of Joyful Learning and Society (JL&S) in GCCCE 2018 (the 22nd Global Chinese Conference on Computers in Education). She has also been the publication chair of the 4th International Conference on E-Learning and Games (Edutainment 2009) and 1st International Symposium on Smart Learning Environment (SLE 2012), and the editorial advisory board of the *Handbook of Research on Learning Culture and Language via ICTs: Methods for Enhanced Instruction*. Moreover, she has been reviewers for many journals, e.g., Springer’s *Transactions on Edutainment*, *Computers in Human Behavior* (SSCI), *International Review of Research in Open and Distance Learning* (SSCI), *Journal of Internet Technology* (SCI), and *International Journal of Distance Education Technologies* (EI).

**Andreas Lanitis** is a Professor, at the Department of Multimedia and Graphic Arts, Cyprus University of Technology and the Director of the Visual Media Computing Research Lab. He is also the leader of the BIO-SCENT (Biometrics for Smart human-Centred EmergiNg Technologies) Multidisciplinary Research Group of the Research Centre of Excellence RISE ([www.rise.org.cy](http://www.rise.org.cy)). He received a B Eng in Electronic Engineering (1991) and Ph.D. in Image Processing and Computer Vision (1995), both from the University of Manchester, UK. His research interests are focused on Biometrics and virtual reality applications. He has published more than 140 papers in scientific journals, edited books and conference proceedings. He was the principal investigator or partner in 23 externally funded research projects funded by National or European agencies. Currently, he serves in the editorial Board of IET Biometrics.

**Dr. Kimberly A. Lawless** is a Professor of Educational Psychology and the Associate Dean for Research at the University of Illinois at Chicago College of Education. Dr. Lawless has published over 150 articles and book chapters, and present her research at international, national, and regional conferences. Her research focuses on learning in technology-rich environments K-20 and post-secondary and professional training in a variety of disciplines. Dr. Lawless' research has been funded by federal grants in excess of \$30 million (USA), focusing on teacher professional development, reading and literacy, educational technology, the GlobalEd 2 project, educational simulations, and medical education. Dr. Lawless currently serves as co-principal investigator on the GlobalEd 2 Efficacy Trials grant, the new 2017 GlobalEd 2 Development grant, funded by the US Department of Education's Institute for Education Sciences, and the PI of Project Includes, funded by NSF.

**Victor R. Lee** is an Associate professor of Instructional Technology and Learning Sciences at Utah State University. He conducts research on wearable technologies in education, Maker education, and recently computing education. Other lines of research have involved science curriculum materials and conceptual change. He completed his doctorate in Learning Sciences at Northwestern University.

**Isabel Lesjak** is a Software Engineering and Business Management student and researcher at the Institute of Interactive Systems and Data Science at Graz University of Technology, currently focusing on her master's thesis about interactive physics experiments in Augmented Reality. She was invited to conduct research at University of Sydney as a visiting scholar and has previously worked on the initial version of the award-winning virtual reality physics laboratory "MaroonVR". Her research interests include Virtual Reality, Augmented Reality, and Human-Computer Interaction.

**Chee-Kit Looi** is a Professor of Education in the National Institute of Education, Nanyang Technological University (NTU), Singapore, and Co-Director of the Centre for Research and Development in Learning, NTU. He was the Founding Head of Learning Sciences Lab, Singapore, from 2004 to 2008, the first research center devoted to the study of the sciences of learning in the Asia-Pacific region. His research interests include mobile and seamless learning, and computer-supported collaborative learning. He has served on the editorial boards of the IEEE Transactions in Learning Technologies, International Journal of AI in Education, International Journal of CSCL, and Journal of the Learning Sciences. He is the President of the Global Chinese Society on Computers in Education.

**Xi Lu** is a doctoral candidate in the Instructional Systems and Learning Technologies program at Florida State University. Working with her advisor (Dr. Shute), her current research interests focus on designing and developing optimal learning supports to facilitate STEM learning in digital interactive environments.

**Zhong-Xiu Lu** received his BA degree in information management from Chung Yuan Christian University in Taiwan in 2015 and continued to complete his MBA degree in 2017. Recently, he comes to Canada for studying the Master of Science in Information Systems (MScIS) at Athabasca University and participating the research on designing role-playing quest in an existing educational game in Prof. Maiga Chang's research group. The experience grants him in-depth knowledge and understanding of game-based learning and assessment. The background in information management allows him to quickly understand the concepts of new information technologies and the user requirements in application development. The rich experience of playing games provides him the advantages in the design of game world and quests for educational games.

**Despina Michael-Grigoriou** is an Assistant Professor at the Department of Multimedia and Graphic Arts of Cyprus University of Technology, and the founding director of the Microsoft Computer Games and Emerging Technologies Research Lab–GET Lab (<http://getlab.org>), established with seed funding from Microsoft. Despina is also the leader of Visual Science Research Pillar of RISE Research Centre on Interactive Media Smart Systems and Interactive Technologies and she leads within the centre the multidisciplinary research group on Virtual Reality of Well-being. She is a Senate member and coordinates, on behalf of her university, the inter-university postgraduate programme “MSc in Design and Development of Computer Games and Interactive Technologies”. Before joining CUT, she was a postdoctoral researcher at EVENT Lab, University of Barcelona (2011), which specializes in experiments within Virtual Reality systems and she held the position of Lecturer (2009–2011) at the University of Nicosia. She received her Ph.D. in Computer Graphics in 2010 from University of Cyprus. She has received several awards and distinctions including Anita Borg Scholarship awarded by Google (2008); nomination of her Ph.D. dissertation for the Best Ph.D. Thesis Award of the Eurographics Association (2011); and two best papers awards (VSMM 2014 and VS-Games 2014). Her research interests focus on Virtual Reality with emphasis on well-being. Despina participated in a number of European and locally funded projects. She is the principal investigator and the deputy scientific coordinator of the H2020-TEAMING RISE project, while she is currently participating in two other H2020 projects. She has been involved in more than ten other funded research projects in the areas of Computer Graphics and Virtual Reality.

**Mr. Yuri Pavlov** is a doctoral student in Instructional Design, Development, and Evaluation at Syracuse University. His research focuses on student engagement, motivation, and interests in higher education.

**Dr. Johanna Pirker** is a computer scientist focusing on game development, research, and education and an active and strong voice of the local game development community. She has lengthy experience in designing, developing, and evaluating games and VR experiences and believes in them as tools to support learning, collaboration, and solving real problems. In 2011/12, she started

researching and developing VR experiences at Massachusetts Institute of Technology. At the moment, she teaches game development at TU Graz and researches games with a focus on AI, HCI, data analysis, and VR technologies. Johanna was listed on the Forbes 30 Under 30 list of science professionals.

**Seyedahmad Rahimi** is a doctoral candidate at Florida State University in the Instructional Systems and Learning Technologies program. He is currently working with Dr. Valerie Shute as one of her Research Assistants on several research projects. His research interests include game-based learning and stealth assessment in STEM learning games, and measuring and fostering twenty-first-century competencies (e.g., creativity) in digital games.

**Dr. Mary Beth Rosson** is a Professor and Associate Dean of Graduate and Undergraduate Studies, in the College of Information Sciences and Technology (IST) at the Pennsylvania State University. Rosson also co-directs the Computer-Supported Collaboration and Learning Lab. Prior to joining Penn State in 2003, she was a Professor of Computer Science at Virginia Tech for 10 years, and a Research Staff Member at IBM T. J. Watson Research Center for 11 years. Rosson received her Ph.D. in cognitive psychology from the University of Texas at Austin in 1982. She is internationally known for research and education in human-computer interaction, participatory and scenario-based evaluation and design methods, computer-supported collaborative learning, and end user development. In recognition of her research accomplishments, Dr. Rosson was elected as Distinguished Scientist of the Association for Computing Machinery and is a member of the SIGCHI Academy.

**Dr. Marina Shapio** background is in Science Education Research (Chemistry) and Learning Technologies. Her research interests are implementing active learning technologies, such as game-based learning environments, virtual, and augmented reality software into undergraduate college chemistry curricula in order to facilitate methods for active and experiential learning, particularly in the context of lecture settings where students are often passive learners. Currently, Dr. Shapio is Lecturer of Chemistry at California State University, Bakersfield where she teaches General Chemistry, Foundations of Analytical Chemistry, Biochemistry, and Food Science lecture and laboratory courses.

**Valerie Shute** is the Mack & Effie Campbell Tyner Endowed Professor in Education in the Department of Educational Psychology and Learning Systems at Florida State University. Before coming to FSU in 2007, she was a principal research scientist at Educational Testing Service, involved with basic and applied research projects related to assessment, cognitive diagnosis, and learning from advanced instructional systems. Her general research interests hover around the design, development, and evaluation of advanced systems to support learning of knowledge, skills, and dispositions. Her research has resulted in numerous grants, journal articles, books, chapters in edited books, a patent, and several recent books.

**Kalliopi-Evangelia Stavroulia** is a Ph.D. candidate at the Department of Multimedia and Graphic Arts of Cyprus University of Technology. She holds an MSc in the Design and Development of Computer Games and Interactive Technologies from Cyprus University of Technology and University of Cyprus (2016). She also holds a Master of Arts in Education (Education Sciences) with distinction from Roehampton University of London and The Higher School of Pedagogical and Technological Education-ASPETE (2010). She graduated in 2006 from Panteion University of Athens with a degree in International and European Studies. Her research interests focus on the domain of new technologies and specifically in the use of virtual reality, serious games, and simulations in the field of education of any educational level. She has also been involved in research projects on these topics, she has attended and participated at workshops, seminars, and conferences and has published her work in conferences and journals related to this specific area.

**Na Sun** is a Ph.D. candidate in the College of Information Sciences and Technology at Pennsylvania State University, under the supervision of Dr. Mary Beth Rosson in the Human Computer Interaction Lab. Her dissertation focus is online community building for distance learners in lieu of enhancing students' identity and ties visibility. In particular, she explored the social needs and practices to connect online students beyond class encounters using visualizations. More generally, she is interested in social computing research that aims to enhance social connectedness and promote open education opportunities. Before joining Penn State, Na Sun graduated from East China Normal University with a bachelor's degree in computer science.

**Yun Wen** is an Assistant Professor of Learning Sciences and Technologies at the National Institute of Education (NIE) in Singapore. She obtained her Ph.D. from NIE and completed her Postdoc at the Computer-Human Interaction in Learning and Instruction (CHILI) Lab in EPFL, Switzerland. Her areas of expertise are Computer-supported Collaborative Learning, Computer-assisted Language Learning, and Learning Design.

**Mary K. Wilhelm-Chapin** in addition to being an Instructional Designer at SUNY Cortland, Ms. Wilhelm-Chapin is a doctoral student in Instructional Design, Development and Evaluation at Syracuse University. Her research focuses on features of multimedia learning resources that enhance learners deep understanding of course content.

**Telmo Zarraonandia** holds a degree in Computer Science from the Universidad de Deusto and a Ph.D. in Computer Science from Universidad Carlos III de Madrid where he is currently an associate professor. He is a member of the LAB DEI research group ([dei.inf.uc3m.es](http://dei.inf.uc3m.es)) focused on the design of interactive systems applied to different domains such as education, emergency and crisis management, or cultural heritage. His research interests include technologies to support education and learning, videogame design, mixed reality environments and interactive

systems. He has been visiting researcher at the Universidad Federal do Rio de Janeiro (UFRL) and at the Università degli Studi di Salerno (Italy). He has published several scientific papers in international journals and conferences related to the field of computer supported education and interactive systems.

**Ms. Lili Zhang** is a doctoral student in Instructional Design, Development, and Evaluation at Syracuse University. Her research focuses on the integration of technologies to facilitate learning and provide students with personalized learning experiences. She has worked in corporate, research institute, and higher education environments designing online courses, conducting evaluation projects, and examining the effectiveness of educational technologies.
