# Acknowledgements

We would like to thank all the contributors of this edited book. Without your support and endeavor, this book would not have been possible. We are deeply thankful for your prompt responses and patience with the revision process. We are also grateful to the anonymous reviewers for taking the time to share with us insightful feedback and words of encouragement. Special thanks to Alexandra Campbell and Ameena Jaafar from Singapore's Springer for working with us in this publication.

# Contents

## Part I Understanding Healthy Aging

- 1 **Healthy Aging: Concepts and Chronological Relevance** . . . . . 3  
Betsy Ng and Gloria Ho
- 2 **Self-Determination Theory: Attributes of Healthy Aging** . . . . . 19  
Betsy Ng and Diwi Abbas
- 3 **Predictive Relationships Among Psychological Needs Satisfaction,  
Creative Growth Mindset and Life Outcomes: A Sample  
of Individuals Above Age 40** . . . . . 31  
Ai Noi Lee, Leng Chee Kong, Betsy Ng, and Diwi Abbas
- 4 **Predicting Relations Among Life Goals, Physical Activity, Health,  
and Well-Being in Elderly Adults: A Self-Determination Theory  
Perspective on Healthy Aging** . . . . . 47  
Behzad Behzadnia, Edward L. Deci, and Cody R. DeHaan

## Part II Healthy Aging and Community Support

- 5 **Musical Engagement and Psychological Need Satisfaction  
in Later Life: Experiences from Community Older Musicians  
in Hong Kong** . . . . . 75  
Anna Wong
- 6 **Why Care? A Self-determination Theory Perspective of Informal  
Caregiving** . . . . . 93  
Robin A. Barry, James Bell, Saily Gomez Batista,  
and Christine McKibbin

<b>7</b>	<b>Aging and Physical Activity: A Qualitative Study of Basic Psychological Needs and Motivation in a Blended Home-Based Exercise Program for Older Adults</b> . . . . .	<b>127</b>

## About the Editors

**Betsy Ng** obtained her Ph.D. from the Nanyang Technological University. She is a researcher and lecturer at the National Institute of Education. She has been actively involved in education research since 2009. To date, she has over 40 peer-reviewed articles and conference paper presentations. Having a strong interest in education, Betsy has an extensive working experience as an education specialist, polytechnic lecturer, science editor, and educator in a range of educational settings. Her areas of expertise include motivation and lifelong learning. She also has research interests in positive psychology and gerontology.

**Gloria Ho** obtained her Bachelor of Arts in Psychology from the National University of Singapore. Her research interests lie in understanding the mechanisms underlying learning and memory, as well as the mediating roles of emotion and motivation. In particular, she is keen in exploring how the interplay of these factors may promote self-discovery, self-development, and well-being. Her experience as an educator in Japan, one of the world's rapidly aging country, led to her foray into gerontology, and investigation of how policy makers, technologies, and social opportunities may encourage healthy aging among individuals.

## Contributors

**Diwi Abbas** is a researcher at the National Institute of Education, Nanyang Technological University. Her research interests include leadership studies, Islamic education and adult learning. She was involved in assisting many research projects in NIE that use qualitative research methods.

**Robin A. Barry**, Ph.D., is an Assistant Professor in the Department of Psychology at the University of Wyoming. She also serves as the Program Evaluator for the

Wyoming Center on Aging and Project Director for Enhancing Dementia Capable Wyoming through Community Partnerships. Robin is a clinical psychologist whose research focuses on informal caregiving and couple and family relationships. She received her Ph.D. from the University of Iowa and her Bachelor of Arts from the University of Michigan.

**Saily Gomez Batista** is a graduate student in the clinical psychology doctoral program at the University of Wyoming. Her research focuses on caregiving and relationship dissatisfaction/violence in couples. She has a strong interest in promoting mental health services to minorities and rural populations. She received her Bachelor of Arts from the University of Nevada, Las Vegas.

**Behzad Behzadnia** is affiliated at the Department of Motor Behavior of the University of Tabriz, Iran. He holds a Ph.D. in Motor Behavior from the Urmia University in Iran. He is mainly interested in applying the Self-Determination Theory in guiding research in education, health and physical activity settings.

**James Bell** is an undergraduate student at the University of Wyoming. He is studying Psychology with minors in Philosophy, Chemistry, and Physiology.

**Edward L. Deci** is Helen F. & Fred H. Gowen Professor Emeritus in the Social Sciences and Professor Emeritus of Psychology at the University of Rochester, Rochester, New York; and Adjunct Professor in Motivation and Management at Southeast Norway University, Honefoss, Norway. He is co-founder (with Richard M. Ryan) of Self-Determination Theory. Deci is interested in a variety of issues in human motivation research, and testing its application across domains, such as health and education.

**Cody R. DeHaan** is a Senior Researcher with Immersyve Inc., in Celebration, Florida. He holds a Ph.D. in Social Psychology from the University of Rochester, Rochester, New York. He works to apply Self-Determination Theory to the workplace, education and engagement more broadly.

**Raoul H. H. Engelbert** was Professor of Physiotherapy, transition of Health Care (2013–2019) and from 2019 Professor of Pediatric Physiotherapy at Amsterdam University Medical Centers and Amsterdam University of Applied Sciences, Faculty of Health, the Netherlands. He is Director of Research at the Faculty of Health and Member of the European Research Network SKIN. He serves on several Dutch and international Advisory Boards. He heads a research group of 2 postdocs and 11 Ph.D. students. He has authored over 130 peer-reviewed publications on healthy aging, lifestyle, exercise behaviour in elderly and children/adolescents.

**Bárbara Gonzalez** is a researcher and lecturer at the School of Psychology and Life Sciences of University Lusophone of Humanities and Technologies, Portugal. She is member of HEI-Lab: Digital Human-Environment Interactions Lab. Her Ph.D. research in Clinical Psychology was about personality and medically unexplained symptoms. She teaches curricular units of personality and psychological assessment in the Psychology course, and in the Master in Clinical and Health

Psychology. She has several peer-reviewed articles and conference paper presentations on the topic of personality and psychopathology. Her research interests include the Self-Determination Theory, and are focused on personality and its correlations in different contexts.

**Louise Hickson** is Professor of Audiology and Head of the School of Health and Rehabilitation Sciences at The University of Queensland. She is also Co-Director of the Communication Disability Centre at that University. Professor Hickson has published over 180 research articles, books and book chapters with her main focus on the effects of hearing impairment on the lives of older people, how to measure outcomes in that population and the development of strategies and interventions that improve the uptake and outcomes of audiological rehabilitation.

**Leng Chee Kong** is a doctoral candidate at the National Institute of Education, Nanyang Technological University. Her research interest centres on motivation in learning. She is particularly intrigued by the postulations of the macro theory — the Self-Determination Theory and its application in understanding and solving a wide range of human challenges, including aging. Being a middle-ager, she has intimate understanding of the process of aging and the many challenges that come with growing old. She is intrinsically motivated to learn how to age healthily.

**Ben J. A. Kröse** is an emeritus professor of Ambient Robotics at the University of Amsterdam and professor of Digital Life at the Amsterdam University of Applied Science. His research focuses on interactive smart devices, which are expected to be widely applied for smart services in health, safety, well-being, security and comfort. In the fields of artificial intelligence, autonomous systems and health, he published more than 150 scientific papers and edited 5 books and special issues and more than 100 conference papers. He is involved in steering boards of national programs on IT and Health, and chairs the national platform for practice-oriented IT research.

**Ai Noi Lee**, Ph.D. is a lecturer at the National Institute of Education, Nanyang Technological University. She teaches educational psychology and assessment-related courses to students in the post-graduate diploma, undergraduate and master degree programs. She also has experience in designing and conducting continuing education and training courses for adult learners. Her research interest is in human development, and she is particularly keen in applying psychological theories and principles in understanding motivation and learning issues in educational and work settings.

**Christopher Lind** is the senior staff member in the Master of Audiology program and teaches in both the Bachelor and Master of Speech Pathology programs. Dr. Lind completed his Ph.D. at the University of Queensland in 2006. His major research interests include conversation repair and acquired hearing impairment, as well as psychosocial aspects of adult hearing impairment. He is on the editorial board for the International Journal of Audiology and the International Journal of Speech-Language Pathology.

**Mary Zagari Kampf MacLeod**, Ph.D., LCSW-R, ACSW, CGP, ACS was born in Rochester, New York. She attended Nazareth College where she earned her Bachelor of Arts degree in Psychology and Education. She then continued to the University at Buffalo where she earned a Master of Social Work degree. She has worked full-time at the University of Rochester for several years as a Social Worker and Psychotherapist while building a private practice. All while working, she attended the Warner School of Education at the University of Rochester where she completed her Ph.D. in Counseling, Human Development, and Mental Health. Her area of interest is exploring wellness factors within older adults; a population most endeared. She has collaborated in multiple research projects and also submitted the following publication: *Etiology and Management of Elder Self-Neglect*, Adult Span Journal (April, 2015).

**Christine McKibbin**, Ph.D., is the Director of the Wyoming Center on Aging and Associate Professor in the Department of Psychology at University of Wyoming. She is a clinical psychologist whose primary research aim is to conduct research to document and improve health and functional outcomes for rural and urban adults with serious mental illness as well as their family caregivers. She also has a strong interest in developing and implementing programs to improve health outcomes among older adults. She received her Ph.D. from the University of North Texas and her Bachelor of Science from Michigan State University.

**Sumit Mehra** is a senior lecturer and researcher of Applied Psychology at the Amsterdam University of Applied Sciences. He holds a M.Sc degree in Cognitive Psychology, as well as a M.Sc degree in Computer and Information Science. His work focusses on the interface between behavior change, human-computer interaction and health sciences. He has been awarded a grant by The Dutch Research Council (NWO) to conduct research on how persuasive technology can facilitate a healthy lifestyle amongst older adults. His work has been published in numerous leading journals and conferences.

**Janaina Pereira** has a Master in Applied Neuropsychology and in Clinical and Health Psychology. She is currently graduating in Behavioral and Cognitive Psychotherapy. She has participated in several national and international congresses, with conference paper presentations on anxiety, procrastination, proactive coping and the Self-Determination Theory. She is a full-time clinical and health psychologist. Her research interest areas are procrastination, motivation and emotion problems.

**Jason Ridgway** (principal author) is an experienced rehabilitative audiologist and consultant with an extensive background in adult hearing rehabilitation, policy, strategy, training and project management. Jason is National Audiology Adviser for the Australian Government Department of Veterans' Affairs, and the Rehabilitation Program Manager at a not-for-profit audiology clinic in Melbourne. He holds the position of President/Chair of Audiology Australia, the professional association for

audiologists in Australia, and is a graduate of the Australian Institute of Company Directors. Jason was awarded his Ph.D. at the University of Queensland in 2017, and his thesis is published here: <https://espace.library.uq.edu.au/view/UQ:530503>.

**Jantine van den Helder** received her M.Sc degree in Human Movement Sciences in 2013. After work experience in clinical trials, she is currently appointed as Ph.D. candidate at the Center of Expertise Urban Vitality, Amsterdam University of Applied Sciences, the Netherlands. Her research involves older adults, exercise, nutrition and e-health, with an emphasis on lifestyle interventions in older adults. In the research project, she fulfills the role of study coordinator and has aspiration to fortify the integration of research and education.

**Bart Visser** received his M.Sc degree in Human Movement Sciences in 1989 from the VU University Amsterdam. At the same University, he received his Ph.D. degree, with a thesis titled *Upper extremity load in low-intensity tasks*, in 2004. In 2011, Bart Visser was appointed Professor of Functional Exercise Therapy at the Amsterdam University of Applied Sciences. His research focuses on daily activities with special interest in the possibilities of technology in promoting a healthy and active lifestyle. By developing applications together with designers from the creative industry, an attempt is made to strengthen motivation and increase the enjoyment of exercise.

**Peter J. M. Weijts** is Professor of Nutrition and Exercise at both Amsterdam University Medical Centers and Amsterdam University of Applied Sciences, the Netherlands. He is Director of the Amsterdam Nutritional Assessment Center. He is a Marie Curie European Commission Fellow. He serves on several Dutch and international Advisory Boards. He heads a research group of 5 postdocs and 15 Ph.D. students on combined lifestyle interventions, from young children to old age, and from seriously ill to sports. He has authored over 100 peer-reviewed publications on healthy aging, lifestyle, nutrition and exercise behaviour, and nutrient requirements.

**Anna Wong** is a Post-doctoral Fellow at the University of Hong Kong (HKU). She graduated from the University of Cambridge with an undergraduate degree in Music and a Ph.D. degree in Education. One of her main research interests is the effects of musical engagement on psychological well-being. Since joining the Centre for Suicide Research and Prevention at HKU, Anna has been actively involved in projects that promote mental health in schools and community settings. As a researcher, she specializes in conducting and evaluating psychosocial interventions that empower individuals to live a healthy, active and meaningful life.
