Contents

Introduction	1
1 Notable elements	5
Introduction	5
1 Monoids and monoid homomorphisms	5
2 Multiplicity and embedding dimension	6
3 Frobenius number and genus	9
4 Pseudo-Frobenius numbers	13
Exercises	16
2 Numerical semigroups with maximal embedding dimension	19
Introduction	19
1 Characterizations	20
2 Arf numerical semigroups	23
3 Saturated numerical semigroups	28
Exercises	31
3 Irreducible numerical semigroups	33
Introduction	33
1 Symmetric and pseudo-symmetric numerical semigroups	33
2 Irreducible numerical semigroups with arbitrary multiplicity and embedding dimension	38
3 Unitary extensions of a numerical semigroup	44
4 Decomposition of a numerical semigroup into irreducibles	47
5 Fundamental gaps of a numerical semigroup	51
Exercises	53
4 Proportionally modular numerical semigroups	57
Introduction	57
1 Periodic subadditive functions	57

- 2 The numerical semigroup associated to an interval of rational numbers 59
- 3 Bézout sequences 61
- 4 Minimal generators of a proportionally modular numerical semigroup 65
- 5 Modular numerical semigroups 69
- 6 Opened modular numerical semigroups 71
- Exercises 75

- 5 The quotient of a numerical semigroup by a positive integer 77**
- Introduction 77
- 1 Notable elements 78
- 2 One half of an irreducible numerical semigroup 79
- 3 Numerical semigroups having a Toms decomposition 83
- Exercises 88

- 6 Families of numerical semigroups closed under finite intersections and adjoin of the Frobenius number 91**
- Introduction 91
- 1 The directed graph of the set of numerical semigroups 91
- 2 Frobenius varieties 93
- 3 Intersecting Frobenius varieties 98
- 4 Systems of generators with respect to a Frobenius variety 99
- 5 The directed graph of a Frobenius variety 100
- Exercises 104

- 7 Presentations of a numerical semigroup 105**
- Introduction 105
- 1 Free monoids and presentations 106
- 2 Minimal presentations of a numerical semigroup 110
- 3 Computing minimal presentations 113
- 4 An upper bound for the cardinality of a minimal presentation 117
- Exercises 120

- 8 The gluing of numerical semigroups 123**
- Introduction 123
- 1 The concept of gluing 124
- 2 Complete intersection numerical semigroups 127
- 3 Gluing of numerical semigroups 129
- 4 Free numerical semigroups 132
- Exercises 135

9 Numerical semigroups with embedding dimension three	137
Introduction	137
1 Numerical semigroups with Apéry sets of unique expression	137
2 Irreducible numerical semigroups with embedding dimension three	141
3 Pseudo-Frobenius numbers and genus of an embedding dimension three numerical semigroup	147
Exercises	154
10 The structure of a numerical semigroup	155
Introduction	155
1 Levin's theorem	155
2 Structure theorem	159
3 \mathfrak{N} -monoids	162
Exercises	168
Bibliography	171
List of symbols	177
Index	179
