## Preface

This volume contains the papers presented at DNA 21: the 21st International Conference on DNA Computing and Molecular Programming. The conference was held at the Wyss Institute for Biologically Inspired Engineering, Harvard University, Massachusetts, USA, during August 17–21, 2015, and organized under the auspices of the International Society for Nanoscale Science, Computation and Engineering (ISNSCE). The DNA conference series aims to draw together mathematics, computer science, physics, chemistry, biology, and nanotechnology to address the analysis, design, and synthesis of information-based molecular systems.

Presentations were sought in all areas that relate to biomolecular computing, including, but not restricted to: algorithms and models for computation on biomolecular systems; computational processes *in vitro* and *in vivo*; molecular switches, gates, devices, and circuits; molecular folding and self-assembly of nanostructures; analysis and theoretical models of laboratory techniques; molecular motors and molecular robotics; studies of fault-tolerance and error correction; software tools for analysis, simulation, and design; synthetic biology and *in vitro* evolution; applications in engineering, physics, chemistry, biology, and medicine.

Authors who wished to present their work were asked to select one of two submission tracks: Track A (full paper) or Track B (one-page abstract with supplementary document). Track B is primarily for authors submitting experimental results who plan to submit to a journal rather than publish in the conference proceedings. We received 63 submissions for oral presentations: 26 submissions in Track A and 37 submissions in Track B. Each submission was reviewed by at least three reviewers, with an average of four reviewers per paper. The Program Committee accepted 13 papers in Track A and 15 papers in Track B. This volume contains the papers accepted for Track A.

We express our sincere appreciation to our invited speakers: George Church, Sharon Glotzer, Lila Kari, Paul Rothemund, Leslie Valiant, and Chris Voigt. We would also like to thank all of the authors who contributed papers to these proceedings, and who presented papers and posters during the conference. Last but not least, the editors would like to thank the members of the Program Committee and the additional invited reviewers for their hard work in reviewing the papers and providing constructive comments to authors.

August 2015

# Organization

DNA 21 was organized at the Wyss Institute for Biologically Inspired Engineering, Harvard University, in cooperation with the International Society for Nanoscale Science, Computation and Engineering (ISNSCE).

## Program Committee

Andrew Phillips (Co-chair)	Microsoft Research, UK
Peng Yin (Co-chair)	Harvard University, USA
Luca Cardelli	Microsoft Research, UK
Hendrik Dietz	Technical University of Munich, Germany
David Doty	California Institute of Technology, USA
Shawn Douglas	University of California, San Francisco, USA
Andrew Ellington	University of Texas at Austin, USA
Elisa Franco	University of California, Riverside and California Institute of Technology, USA
Cody Geary	Aarhus University, Denmark
Kurt Gothelf	Aarhus University, Denmark
Natasha Jonoska	University of South Florida, USA
Lila Kari	University of Western Ontario, Canada
Ken Komiya	Tokyo Institute of Technology, Japan
Marta Kwiatkowska	University of Oxford, UK
Tim Liedl	Ludwig Maximilian University of Munich, Germany
Chengde Mao	Purdue University, USA
Pekka Orponen	Aalto University, Finland
Jennifer Padilla	Boise State University, USA
Matthew Patitz	University of Arkansas, USA
Lulu Qian	California Institute of Technology, USA
John Reif	Duke University, USA
Alfonso Rodríguez-Patón	Universidad Politécnica de Madrid, Spain
Yannick Rondelez	University of Tokyo, Japan
Rebecca Schulman	Johns Hopkins University, USA
David Soloveichik	University of California, San Francisco
Darko Stefanovic	University of New Mexico, USA
Chris Thachuk	California Institute of Technology, USA
Andrew Turberfield	University of Oxford, UK
Erik Winfree	California Institute of Technology, USA
Damien Woods	California Institute of Technology, USA

## **Organizing Committee**

William Shih (Co-chair)	Harvard University, USA
Peng Yin (Co-chair)	Harvard University, USA
Sungwook Woo	Harvard University, USA
Elena Chen	Harvard University, USA

## **Steering Committee**

Natasha Jonoska (Chair)	University of South Florida, USA
Luca Cardelli	Microsoft Research, UK
Anne Condon	University of British Columbia, Canada
Masami Hagiya	University of Tokyo, Japan
Lila Kari	University of Western Ontario, Canada
Satoshi Kobayashi	University of Electro-Communications, Japan
Chengde Mao	Purdue University, USA
Satoshi Murata	Tohoku University, Japan
John Reif	Duke University, USA
Grzegorz Rozenberg	University of Leiden, The Netherlands
Nadrian Seeman	New York University, USA
Friedrich Simmel	Technical University of Munich, Germany
Andrew Turberfield	University of Oxford, UK
Hao Yan	Arizona State University, USA
Erik Winfree	California Institute of Technology, USA

## **Sponsoring Institutions**

Wyss Institute for Biologically Inspired Engineering, Harvard University  
Air Force Office of Scientific Research  
Army Research Office  
National Science Foundation  
Office of Naval Research

**Additional Reviewers**

# Contents

Dominance and T-Invariants for Petri Nets and Chemical Reaction Networks . . . . .	1
<i>Robert Brijder</i>	
Synthesizing and Tuning Chemical Reaction Networks with Specified Behaviours . . . . .	16
<i>Neil Dalchau, Niall Murphy, Rasmus Petersen, and Boyan Yordanov</i>	
Universal Computation and Optimal Construction in the Chemical Reaction Network-Controlled Tile Assembly Model . . . . .	34
<i>Nicholas Schiefer and Erik Winfree</i>	
Reflections on Tiles (in Self-Assembly) . . . . .	55
<i>Jacob Hendricks, Matthew J. Patitz, and Trent A. Rogers</i>	
Optimal Program-Size Complexity for Self-Assembly at Temperature 1 in 3D. . . . .	71
<i>David Furcy, Samuel Micka, and Scott M. Summers</i>	
Flipping Tiles: Concentration Independent Coin Flips in Tile Self-Assembly . . . .	87
<i>Cameron T. Chalk, Bin Fu, Alejandro Huerta, Mario A. Maldonado, Eric Martinez, Robert T. Schweller, and Tim Wylie</i>	
New Geometric Algorithms for Fully Connected Staged Self-Assembly . . . . .	104
<i>Erik D. Demaine, Sándor P. Fekete, Christian Scheffer, and Arne Schmidt</i>	
Leader Election and Shape Formation with Self-organizing Programmable Matter . . . . .	117
<i>Zahra Derakhshandeh, Robert Gmyr, Thim Strothmann, Rida Bazzi, Andréa W. Richa, and Christian Scheideler</i>	
Leakless DNA Strand Displacement Systems . . . . .	133
<i>Chris Thachuk, Erik Winfree, and David Soloveichik</i>	
Supervised Learning in an Adaptive DNA Strand Displacement Circuit . . . . .	154
<i>Matthew R. Lakin and Darko Stefanovic</i>	
Automated Design and Verification of Localized DNA Computation Circuits. . . . .	168
<i>Michael A. Boemo, Andrew J. Turberfield, and Luca Cardelli</i>	

On Low Energy Barrier Folding Pathways for Nucleic Acid Sequences . . . . .	181
<i>Leigh-Anne Mathieson and Anne Condon</i>	
Stochastic Simulation of the Kinetics of Multiple Interacting Nucleic Acid Strands. . . . .	194
<i>Joseph Malcolm Schaeffer, Chris Thachuk, and Erik Winfree</i>
