Acknowledgment

There are many people without whom this book would not be possible. First of all, I would like to thank Pat Croskerry for being a pioneer in the field of cognitive biases in medicine. His encouragement and thoughts have been invaluable throughout this process. I am grateful that he let me use his definition of many of the cognitive biases. I would like to thank Steven Novella, Harriet Hall, David Gorski, and the entire team at Science Based Medicine. Their work has taught me an enormous amount about skepticism and critical thinking. I would like to thank “Fallacy Man” at “The Logic of Science” and Erik at “Contrive Platitudes” for letting me use their brilliant memes and cartoons. Thanks to GM at, “I Fucking Hate Pseudoscience,” for letting me borrow some of his writing. Cindy Harlow deserves angel wings for proofreading and helping to arrange the references along with Allyson Reid. Carol Lynn Curchoe and Dana Bigelow provided invaluable help and suggestions. I would like to thank Gregory Sutorius and the production team at Springer Publishing for recognizing that a book on biases was worth writing in the first place.

Finally, I would like to thank my parents and wife for their support and encouragement.

Disclaimer

None of these cases are real; though many are based loosely on actual cases, names, ages, and genders were changed. In every case, I invented key aspects to make a point. When pictures of people were used, these were obtained from free imaging sites, and there is no relation between the actual person and the medical case.

Contents

1	Introduction	1
	Summary	1
	Errors in Medicine	2
	Cognitive Biases	4
	Cognitive Biases in Medicine	7
	This Book	8
2	Ambiguity Effect	15
3	Bandwagon Effect and Authority Bias	21
	Social Loafing and Diffusion of Responsibility	41
	Reactance Bias	46
4	Confirmation Bias, Motivated Cognition, the Backfire Effect	57
	Belief Bias	75
5	Curse of Knowledge	89
6	Decision Fatigue	93
7	Feedback Sanction	103
8	Financial Bias	109
	Mere Exposure Effect and Norm of Reciprocity	122
9	Forer Effect	139
10	Framing Effect and Loss Aversion	145
	Sunk Costs, Endowment Effect, Choice-Supportive Bias	150
	Anchoring Effect	155
	Contrast Effect	163
11	Affective Error	169
	Attribution Biases: The Fundamental Attribution Error and Self-Serving Bias	183

12	Gambler's Fallacy and Hot Hand Fallacy	203
13	Hasty Generalization, Survival Bias, Special Pleading, and Burden of Proof	211
	Survival Bias, Special Pleading, and Burden of Proof	225
14	Hindsight Bias and Outcome Bias	247
	False Memories	254
15	Illusionary Correlation, False Causation, and Clustering Illusion	265
16	In-Group Favoritism	285
17	Information Bias	303
18	Nosology Trap	307
19	Omission Bias	321
	Commission Bias	327
20	Overchoice and Decision Avoidance	345
21	Overconfidence Bias	351
22	Patient Satisfaction Error	369
23	Premature Closure: Anchoring Bias, Occam's Error, Availability Bias, Search Satisficing, Yin-Yang Error, Diagnosis Momentum, Triage Cueing, and Unpacking Failure	379
	Introduction	379
	Anchoring Bias	379
	Occam's Error	386
	Availability Heuristic	389
	Search Satisficing	396
	Yin-Yang Error	404
	Diagnosis Momentum	406
	Triage Cueing	408
	Unpacking Failure	414
	Failure-To-Close Error	417
24	Representativeness Bias	425
	Base Rate Neglect	429
	Zebra Retreat	438
25	Screening Errors	445
26	Selection Bias and Endowment Effect	457
	Introduction	457
	Application Steps	457
27	Semmelweis Reflex	467
	Galileo Fallacy	473

28	Systems Errors	501
	Alarm Fatigue	501
	Defensive Medicine	506
	Graded Clinician Error	511
	The Electronic Medical Record Error	514
29	Blind Spot Bias	525
30	Research Errors	537
	Introduction	537
	Expectation Bias	538
	P-Hacking and HARKing	541
	File Drawer Effect/Publication Bias	546
	Poor Surrogate Outcomes	547
	Non-Representative Study Populations:	548
	Citation Plagiarism	549
	Lack of Replication	549
	Predatory Publishers	551
	Conflicts of Interest	553
	Legal Threats	554
	Ghostwriting	555
	Fraud	556
	Solutions	559
	Conclusion	565
	Index	577

About the Author

Jonathan Howard is a neurologist and psychiatrist at NYU and Bellevue. He is the director of neurology and Bellevue Hospital and the neurology clerkship coordinator.
