Preface and Acknowledgements

These notes constitute a revised and expanded version of a course given at Vanderbilt University during the academic year 1969-70.

Thanks are due to Mr. Chi Lin Yen, who read portions of the manuscript, and helped with the preparation of the bibliography.

During the period when the notes were being prepared, the author's work was supported in part by NSF Grants GP-11804 and GP-21059, and by a grant from the Vanderbilt University Research Council.

Contents

<u>Chapter 1. Preliminaries.</u>	1
1.1. Introduction.	1
1.2. The basic symbolism	1
1.3. Families of sets.	3
1.4. Relations	3
1.5. Functions	6
1.6. Equivalence relations	8
1.7. Ordering relations.	10
1.8. Natural and induced maps.	13
<u>Chapter 2. Algebras and relational structures</u>	16
2.1. Basic concepts.	16
2.2. Examples of relational structures	18
2.3. Homomorphisms and isomorphisms.	24
2.4. Automorphism groups and endomorphism monoids: The concrete representation problem	33
2.5. Automorphism groups and endomorphism monoids: The abstract representation problem	43
2.6. Rigid structures.	48
2.7. Endomorphism monoids: More about the abstract representation problem	54
<u>Chapter 3. Substructures.</u>	66
3.1. Substructures and subuniverses.	66
3.2. Automorphisms of 1-ary algebras	71

VI

3.3. Generating sets.	77
3.4. Non-generators	80
3.5. Polynomials and algebraic operations	83
3.6. Intersection structures and closure operators.	89
3.7. Multiplicity types and subuniverses.	96
3.8. The lattice of subuniverses.	103
3.9. Algebras with descending chain condition	120
3.10. Versatile monoids.	136
<u>Chapter 4. Congruence relations.</u>	148
4.1. Epimorphisms and congruence relations.	148
4.2. Algebraic operations and congruence relations.	156
4.3. Isomorphisms of quotient structures.	167
4.4. Congruence lattices: The concrete representation problem	171
4.5. Partial algebras	176
4.6. Congruence lattices: The abstract representation problem	181
4.7. Congruence lattices: Miscellaneous results and problems.	201
Addenda.	213
Table of notation.	215
Subject index.	216
