Lars Gårding

Singularities in Linear Wave Propagation

Springer-Verlag

Berlin Heidelberg New York London Paris Tokyo

Author

Lars Gårding
Department of Mathematics, University of Lund
Box 118, 22100 Lund, Sweden

Mathematics Subject Classification (1980): 35-xx; 35Lxx

ISBN 3-540-18001-X Springer-Verlag Berlin Heidelberg New York
ISBN 0-387-18001-X Springer-Verlag New York Berlin Heidelberg

Library of Congress Cataloging-in-Publication Data. Gårding, Lars, 1919- Singularities in linear wave propagation. (Lecture notes in mathematics; 1241) Includes index. 1. Differential equations, Hyperbolic. 2. Wave motion. Theory of. 3. Singularities (Mathematics) I. Title. II. Series: Lecture notes in mathematics (Springer-Verlag); 1241. QA3.L28 no. 1241 510 s 87-16397 [QA377] [515.3'53]
ISBN 0-387-18001-X (U.S.)

TABLE OF CONTENTS

Historical introduction	1
Chapter 1 Hyperbolic operators with constant coefficients	10
1.1 Algebraic hyperbolicity	10
1.2 Distributions associated with the inverses of a homogeneous hyperbolic polynomial	15
1.3 Intrinsic hyperbolicity	17
1.4 Fundamental solutions of homogeneous hyperbolic operators. Propagation cones. Localization. General conical refraction	20
1.5 The Herglotz-Petrovsky formula	25
Chapter 2 Wave front sets and oscillatory integrals	34
2.1 Wave front sets	34
2.2 The regularity function	37
2.3 Oscillatory integrals	39
2.4 Fourier integral operators	44
2.5 Applications	45
Chapter 3 Pseudodifferential operators	51
3.1 The calculus of pseudodifferential operators	53
3.2 L^2 estimates. Regularity properties of solutions of pseudodifferential equations	62
3.3 Lax's construction for Cauchy's problem and a first order differential operator	70
Chapter 4 The Hamilton-Jacobi equation and symplectic geometry	73
4.1 Hamilton systems	73
4.2 Symplectic spaces and Lagrangian planes	75
4.3 Lagrangian submanifolds of the cotangent bundle of a manifold	78
4.4 Hamilton flows on the cotangent bundle. Very regular phase functions	81
Chapter 5 A global parametrix for the fundamental solution of a first order hyperbolic pseudodifferential operator	85
5.1 Cauchy's problem for a first order hyperbolic pseudodifferential operator	85
5.2 Cauchy's problem on the product of a line and a manifold	88
5.3 A global parametrix	89
Chapter 6 Changes of variables and duality for general oscillatory integrals	95
6.1 Hörmander's equivalence theorem for oscillatory integrals with a regular phase function	96
6.2 Reduction of the number of variables	98
6.3 Duality and reduction of the number of variables	101
Chapter 7 Sharp and diffuse fronts of paired oscillatory integrals	104
7.1 A family of distributions	105
7.2 Polar coordinates in oscillatory integrals	108
7.3 Almost analytic extensions	111
7.4 Singularities of paired oscillatory integrals with Hessians of corank 2	112
7.5 The general case. Petrovsky chains and cycles. The Petrovsky condition	121
References	124
Index	125
