# Preface

EvoMUSART 2012 was the First International Conference and the 10th European event on Biologically Inspired Music, Sound, Art and Design. It convened during April 11–13, 2012, in Málaga, Spain.

The use of biologically inspired techniques for the development of artistic systems is an exciting and significant area of research. There is a growing interest in the application of these techniques in fields such as: visual art and music generation, analysis, and interpretation; sound synthesis; architecture; video; poetry; design; and other creative tasks.

The main goal of evoMUSART 2012 was to bring together researchers who use biologically inspired computer techniques for artistic tasks, providing the opportunity to promote, present, and discuss ongoing work in the area.

The first evoMUSART edition took place in 2003 in Essex, UK, as one of the Applications of Evolutionary Computing workshops. The event had 13 submissions and 11 Program Committee members.

The main motivation of this event was to promote the growth of this research area by allowing researchers and artists to come together and present their works. Demonstrating that it was possible to develop high-quality scientific research in creative domains, following the same scientific standards as other areas, was an additional goal.

Since then, evoMUSART has grown steadily in terms of number of submissions, Program Committee members, and quality of submissions, asserting itself as the only yearly event in the field and as its main forum.

In these 10 years, the area has grown significantly. This can be attested by the proliferation of workshops and special tracks devoted to evolutionary art and music in conferences such as the Genetic Evolutionary Computation Conference and the IEEE Congress on Evolutionary Computation, and by the publication of several books on these topics, for example, *The Art of Evolutionary Evolution* and *Evolutionary Computer Music*, both published by Springer.

As a consequence of the increase of interest in the area and of the success of previous events, in 2012 evoMUSART became an evo\* conference. Furthermore, celebrating its 10th anniversary two special issues on evolutionary art and music will be published by the *Genetic Programming and Evolvable Machines* (GPEM) journal and by the *International Journal of Arts and Technology* (IJART).

The success of evoMUSART would not have been possible without authors submitting their work, members of the Program Committees dedicating energy in reviewing the papers, and an audience. All these people deserve our recognition. We express our gratitude toward Colin G. Johnson, one of the founders of evoMUSART and Co-chair in 2003 and 2004, Jon McCormack, Co-chair in 2008 and 2009 and Gary Greenfield, Co-chair in 2010 and 2011, for their enthusiasm, support, and hard work. We would also like to acknowledge the organizers of

the art exhibitions associated with evoMUSART – Paulo Urbano, Anna Esparcia, Tim Blackwell, and Janis Jefferies – and the local Chairs who created the conditions for these exhibitions to take place, Anikó Ekárt and Anna Esparcia.

EvoMUSART 2012 received 43 submissions from 24 different countries across four continents. The papers underwent a rigorous double-blind peer-review process, each being reviewed by at least three members of the international Program Committee composed of 78 members from 20 countries on four different continents. The selection process resulted in this volume, with 15 papers accepted for oral presentation (34.9% acceptance rate) and 5 for poster presentation (46.5% global acceptance rate for talks and posters combined). The wide range of topics in this volume reflects the current state of research in the field, including theory, generation, computer-aided creativity, computational creativity, automation, and others.

EvoMUSART 2012 was part of the evo\* 2012 event, which included four additional conferences: evoGP 2012, evoCOP 2012, evoBIO 2012, and evoApplications 2012. Many people helped to make this event a success.

Many thanks to the local organizer Carlos Cotta, Associate Professor of the University of Málaga (Spain), and to the following local sponsors: the University of Málaga for its support of evo\*, and in particular to the School of Computer Science and the School of Telecommunications and their respective Directors Professor José M. Troya and Professor Antonio Puerta, and also to the Málaga Convention Bureau.

Also a big thanks to Pedro Miguel Cruz assisting Penousal Machado on creating and maintaining the official evo\* 2012 website and Marc Schoenauer from INRIA in France for providing continued assistance with the MyReview conference management system.

Last but certainly not least, we especially want to express a heartfelt thanks to Jennifer Willies and the Centre for Emergent Computing at Edinburgh Napier University. Ever since its inaugural meeting in 1998 this event has relied on her dedicated work and continued involvement and we do not exaggerate when we state that without her, evo\* could not have achieved its current status.

April 2012

 Adrian Carballal

# Organization

EvoMUSART 2012 was part of evo\* 2012, Europe's premier co-located events in the field of evolutionary computing, which also included the conferences euroGP 2012, evoCOP 2012, evoBIO 2012, and evoApplications 2012.

## Organizing Committee

### Conference Chairs

Juan Romero	University of A Coruña, Spain
Penousal Machado	University of Coimbra, Portugal

### Local Chair

Carlos Cotta	University of Málaga, Spain
--------------	-----------------------------

### Publication Chair

Adrian Carballal	University of A Coruña, Spain
------------------	-------------------------------

## Program Committee

Adrian Carballal	University of A Coruña, Spain
Alain Lioret	Paris 8 University, France
Alan Dorin	Monash University, Australia
Alejandro Pazos	University of A Coruña, Spain
Amílcar Cardoso	University of Coimbra, Portugal
Amy K. Hoover	University of Central Florida, USA
Andrew Brown	Griffith University, Australia
Andrew Gildfind	Google, Inc., Australia
Andrew Horner	University of Science and Technology, Hong Kong
Anna Ursyn	University of Northern Colorado, USA
Antonino Santos	University of A Coruña, Spain
Artemis Sanchez Moroni	Renato Archer Research Center, Brazil
Benjamin Schroeder	Ohio State University, USA
Bill Manaris	College of Charleston, USA
Brian Ross	Brock University, Canada
Carlos Grilo	Instituto Politécnico de Leiria, Portugal
Christian Jacob	University of Calgary, Canada
Colin Johnson	University of Kent, UK

Dan Ashlock	University of Guelph, Canada
Dan Costelloe	Independent Researcher (Solace One Ltd), Ireland
Dan Ventura	Brigham Young University, USA
Daniel Bisig	University of Zurich, Switzerland
Daniel Jones	Goldsmiths College, University of London, UK
David Rosenboom	California Institute of Arts, USA
Douglas Repetto	Columbia University, USA
Eduardo Miranda	University of Plymouth, UK
Eelco den Heijer	Vrije Universiteit Amsterdam, The Netherlands
Eleonora Bilotta	University of Calabria, Italy
Erik Hemberg	University College Dublin, Ireland
Erwin Driessens	Independent Artist, The Netherlands
Gary Greenfield	University of Richmond, USA
Gary Nelson	Oberlin College, USA
Hans Dehlinger	Independent Artist, Germany
Hernán Kerleñevich	National University of Quilmes, Argentina
Ingeborg Reichle	Berlin-Brandenburg Academy of Sciences and Humanities, Germany
J.E. Rowe	University of Birmingham, UK
James McDermott	University of Limerick, Ireland
Jane Prophet	Independent Artist, UK
John Collomosse	University of Surrey, UK
Jon Bird	University of Sussex, UK
Jon McCormack	Monash University, Australia
José Fornari	NICS/Unicamp, Brazil
Juan Romero	University of A Coruña, Spain
Kenneth O. Stanley	University of Central Florida, USA
Luigi Pagliarini	University of Southern Denmark, Denmark
Marcelo Freitas Caetano	IRCAM, France
Marcos Nadal	University of Illes Balears, Spain
María Luz Castro Pena	University of A Coruña, Spain
Maria Verstappen	Independent Artist, The Netherlands
Matthew Lewis	Ohio State University, USA
Mauro Annunziato	Plancton Art Studio, Italy
Michael O'Neill	University College Dublin, Ireland
Mitchell Whitelaw	University of Canberra, Australia
Nell Tenhaaf	York University, Canada
Nicolas Monmarché	University of Tours, France
Oliver Bown	University of Sidney, Australia
Pablo Gervás	Universidad Complutense de Madrid, Spain
Palle Dahlstedt	Göteborgs Universitet, Sweden
Paul Brown	University of Sussex, UK
Paulo Urbano	Universidade de Lisboa, Portugal
Pedro Cruz	University of Coimbra, Portugal

Penousal Machado	University of Coimbra, Portugal
Peter Bentley	University College London, UK
Peter Cariani	University of Binghamton, USA
Philip Galanter	Texas A&M College of Architecture, USA
Rafael Ramirez	Pompeu Fabra University, Spain
Roger Malina	International Society for the Arts, Sciences and Technology, USA
Ruli Manurung	University of Indonesia, Indonesia
Scott Draves	Independent Artist, USA
Simon Colton	Imperial College, UK
Somnuk Phon-Amnuaisuk	University Tunku Abdul Rahman, Malaysia
Stephen Todd	IBM, UK
Takashi Ikegami	Tokyo Institute of Technology, Japan
Thor Magnusson	Carnegie Mellon University, USA
Tim Blackwell	Goldsmiths College, University of London, UK
Troy Innocent	Monash University, Australia
Usman Haque	Haque Design + Research Ltd, UK/Pakistan
Vic Ciesielski	RMIT, Australia
William Latham	University of London, UK
Yang Li	University of Science and Technology Beijing, China

# Table of Contents

Generative Choreography: Animating in Real-Time Dancing Avatars . . .	1
<i>Rui Filipe Antunes and Frederic Fol Leymarie</i>	
Aesthetic 3D Model Evolution . . . . .	11
<i>Steve Bergen and Brian J. Ross</i>	
A Local Search Interface for Interactive Evolutionary Architectural Design . . . . .	23
<i>Jonathan Byrne, Erik Hemberg, Anthony Brabazon, and Michael O'Neill</i>	
Evolving a Library of Artistic Scene Descriptors . . . . .	35
<i>Simon Colton</i>	
Evolving Pop Art Using Scalable Vector Graphics . . . . .	48
<i>E. den Heijer and A.E. Eiben</i>	
Maintaining Population Diversity in Evolutionary Art . . . . .	60
<i>E. den Heijer and A.E. Eiben</i>	
Populations of Populations: Composing with Multiple Evolutionary Algorithms . . . . .	72
<i>Arne Eigenfeldt and Philippe Pasquier</i>	
Fuzzy Rule Based System Ensemble for Music Genre Classification . . . .	84
<i>Francisco Fernández and Francisco Chávez</i>	
A Computational Environment for the Evolutionary Sound Synthesis of Birdsongs . . . . .	96
<i>José Fornari</i>	
A Platform for Evolving Controllers for Simulated Drawing Robots . . . .	108
<i>Gary Greenfield</i>	
Learning Comparative User Models for Accelerating Human-Computer Collaborative Search . . . . .	117
<i>Gregory S. Hornby and Josh Bongard</i>	
Fitness in Evolutionary Art and Music: What Has Been Used and What Could Be Used? . . . . .	129
<i>Colin G. Johnson</i>	

Interactive Evolution of 8-Bit Melodies with Genetic Programming towards Finding Aesthetic Measures for Sound.....	141
<i>Maximos A. Kaliakatos-Papakostas, Michael G. Epitropakis, Andreas Floros, and Michael N. Vrahatis</i>	
Investigating Aesthetic Features to Model Human Preference in Evolutionary Art .....	153
<i>Yang Li, Changjun Hu, Ming Chen, and Jingyuan Hu</i>	
The Traveling Percussionist .....	165
<i>Phil Lopes and Paulo Urbano</i>	
Genetic Programming for Musical Sound Analysis.....	176
<i>Róisín Loughran, Jacqueline Walker, Michael O'Neill, and James McDermott</i>	
Expression-Based Evolution of Faces .....	187
<i>Penousal Machado, João Correia, and Juan Romero</i>	
Graph Grammars as a Representation for Interactive Evolutionary 3D Design.....	199
<i>James McDermott</i>	
Polyphonic Transcription: Exploring a Hybrid of Tone Models and Particle Swarm Optimisation .....	211
<i>Somnuk Phon-Amnuaisuk</i>	
Reinforcement Learning and the Creative, Automated Music Improviser .....	223
<i>Benjamin D. Smith and Guy E. Garnett</i>	
<b>Author Index .....</b>	<b>235</b>
