

Origins of Mind

BIOSEMIOTICS

VOLUME 8

Series Editors **Marcello Barbieri**
Professor of Embryology
University of Ferrara, Italy
President
Italian Association for Theoretical Biology
Editor-in-Chief
Biosemiotics
Jesper Hoffmeyer
Associate Professor in Biochemistry
University of Copenhagen
President
International Society for Biosemiotic Studies

Aims and Scope of the Series

Combining research approaches from biology, philosophy and linguistics, the emerging field of biosemiotics proposes that animals, plants and single cells all engage in semiosis – the conversion of physical signals into conventional signs. This has important implications and applications for issues ranging from natural selection to animal behaviour and human psychology, leaving biosemiotics at the cutting edge of the research on the fundamentals of life.

The Springer book series *Biosemiotics* draws together contributions from leading players in international biosemiotics, producing an unparalleled series that will appeal to all those interested in the origins and evolution of life, including molecular and evolutionary biologists, ecologists, anthropologists, psychologists, philosophers and historians of science, linguists, semioticians and researchers in artificial life, information theory and communication technology.

doing what I'm doing.*

Acknowledgments

This volume is more than a collection of 21 chapters on the origins of mind. It is also a reflection of the people whose ideas and encouragement brought it into being. Lou Goldberg set me on a path of thinking about mind in a more scientific and realistic way. Joseph Seckbach kindly invited me to suggest a new Springer book on the topic of origins, and Marcello Barbieri and Jesper Hoffmeyer generously welcomed *Origins of Mind* into their book series on biosemiotics. I am grateful to the wonderful Springer team who helped bring the book to fruition.

I'd like to thank all of the volume contributors for preparing such insightful chapters on mind, and also the reviewers who helped to make the content clearer and stronger. They include: Bernard Baars, Tom Barbalet, Marcello Barbieri, Megan Burke, Glenn Carruthers, Paul Cogley, Lou Goldberg, Justine Kingsbury, Curtis Metcalfe, Silvia Ouakinin, and David Skrbina.

And last but not least, I'd like to acknowledge Professor John R. Searle, on the occasion of his 80th birthday (in July 2012) for maintaining throughout his long career in philosophy that human consciousness is a biological phenomenon. *Ab uno disce omnes.*

Contents

Introduction: Exploring the Origins of Mindedness in Nature	1
Liz Swan	
Biosemiotics	
Organic Codes and the Natural History of Mind	21
Marcello Barbieri	
The Descent of Humanity: The Biological Roots of Human Consciousness, Culture and History	53
Angelo N.M. Recchia-Luciani	
From Non-minds to Minds: Biosemantics and the <i>Tertium Quid</i>	85
Crystal L'Hôte	
Cybersemiotics: A New Foundation for a Transdisciplinary Theory of Consciousness, Cognition, Meaning and Communication.....	97
Soren Brier	
Mental Representation	
The Emergence of Empathy in the Context of Cross-Species Mind Reading	129
John Sarnecki	
The Evolution of Scenario Visualization and the Early Hominin Mind.....	143
Robert Arp	
Representation in Biological Systems: Teleofunction, Etiology, and Structural Preservation.....	161
Michael Nair-Collins	

Beyond Embodiment: From Internal Representation of Action to Symbolic Processes..... 187
 Isabel Barahona da Fonseca, Jose Barahona da Fonseca, and Vitor Pereira

Consciousness

Imitation, Skill Learning, and Conceptual Thought: An Embodied, Developmental Approach 203
 Ellen Fridland

Evolving Consciousness: The Very Idea! 225
 James H. Fetzer

Mind or Mechanism: Which Came First? 243
 Teed Rockwell

Origins of the Qualitative Aspects of Consciousness: Evolutionary Answers to Chalmers’ Hard Problem 259
 Jonathan Y. Tsou

Philosophy of Mind

Neuropragmatism on the Origins of Conscious Minding 273
 Tibor Solymosi

Not So Exceptional: Away from Chomskian Saltationism and Towards a Naturally Gradual Account of Mindfulness 289
 Andrew M. Winters and Alex Levine

Mental Organs and the Origins of Mind 301
 Thomas S. Ray

Mnemo-psychography: The Origin of Mind and the Problem of Biological Memory Storage 327
 Frank Scalabrino

Synthetic Intelligence

Minimal Mind..... 343
 Alexei A. Sharov

Concept Combination and the Origins of Complex Cognition 361
 Liane Gabora and Kirsty Kitto

Contents	xi
The Mind of the Noble Ape in Three Simulations	383
Tom Barbalet	
From the Natural Brain to the Artificial Mind	399
Massimo Negrotti	
Index	411
