

Studies in Computational Intelligence

Volume 923

Series Editor

Janusz Kacprzyk, Polish Academy of Sciences, Warsaw, Poland

The series “Studies in Computational Intelligence” (SCI) publishes new developments and advances in the various areas of computational intelligence—quickly and with a high quality. The intent is to cover the theory, applications, and design methods of computational intelligence, as embedded in the fields of engineering, computer science, physics and life sciences, as well as the methodologies behind them. The series contains monographs, lecture notes and edited volumes in computational intelligence spanning the areas of neural networks, connectionist systems, genetic algorithms, evolutionary computation, artificial intelligence, cellular automata, self-organizing systems, soft computing, fuzzy systems, and hybrid intelligent systems. Of particular value to both the contributors and the readership are the short publication timeframe and the world-wide distribution, which enable both wide and rapid dissemination of research output.

The books of this series are submitted to indexing to Web of Science, EI-Compendex, DBLP, SCOPUS, Google Scholar and Springerlink.

Preface

The novel coronavirus disease 2019 (COVID-19) pandemic has posed a major threat to human life and health. The COVID-19 had been documented in more than 210 countries, directly affecting people's life. There is a great crisis all over the world, and scientific communities are rigorously looking for instant solutions to deal with COVID-19 problems. Computational intelligence (CI), being powerful tools, can be applied to fight against COVID-19. This edited volume aims to provide recent research and developments in CI to fight against COVID-19. This edited volume has 22 chapters which is divided into five parts.

First part contains two introductory chapters that cover the basic concepts of CI methods and its applications in surveillance, prevention, prediction, diagnosis and therapeutic of COVID-19; and basics of coronaviruses, its epidemic, viral structure, its genome and so on.

Second part comprises four chapters which cover applications of CI in surveillance and prevention of COVID-19 infection. It covers how CI and social network analysis can be used to track the COVID-19 outbreak and identify key spreaders. Further, this section also covers mobile technology solutions and the role of IoT for surveillance and prevention of COVID-19 spread.

Third part is a collection of seven chapters that demonstrate how CI is helpful in the prediction and diagnosis of COVID-19. It systematically presents available predictive systems and data models, comparative study of SIR prediction models and disease control strategies, particle swarm optimization (PSO) for prediction of COVID-19, epidemic data visualization and forecasting using Elasticsearch, medical image-based diagnosis of zoonotic COVID-19 infection.

Fourth part has three chapters that attempt to present the role of CI in computer-aided drug design, drug repurposing using machine learning and vaccine design.

Fifth part contains six chapters that extensively cover the role of big data, Intelligent Internet of Medical Things (IoMT) and image processing to combat deadly COVID-19.

The contributing authors of this volume are experts in their fields, and they are from various reputed universities and institutions across the world. This volume is a valuable and comprehensive resource for computer and data scientists, epidemiologists, radiologists, doctors, clinicians, pharmaceutical professionals, along with graduate and research students of interdisciplinary and multidisciplinary sciences.

New Delhi, India

Khalid Raza

Acknowledgements

The editor and contributors are thankful to all the anonymous reviewers for their valuable expert comments and suggestions on the chapters. Special thanks go to the series editor, editors, publication and production manager, and other editorial staff of the Springer Nature for their overwhelming support despite ongoing COVID-19 pandemic.

Contents

Computational Intelligence and COVID-19 Preliminaries	
An Introduction to Computational Intelligence in COVID-19: Surveillance, Prevention, Prediction, and Diagnosis	3
Khalid Raza, Maryam, and Sahar Qazi	
Role of Computational Intelligence Against COVID-19	19
Simran Kaur and Yasha Hasija	
Computational Intelligence in Surveillance and Prevention of COVID-19 Infection	
Using Computational Intelligence for Tracking COVID-19 Outbreak in Online Social Networks	47
Sahar Qazi, Salim Ahmad, and Khalid Raza	
Social Network Analysis for the Identification of Key Spreaders During COVID-19	61
Ahmadi Hasan and Ahmad Kamal	
Mobile Technology Solution for COVID-19: Surveillance and Prevention	79
Shaban Ahmad, Pragya Chitkara, Fatima Nazish Khan, Avtar Kishan, Vaibhav Alok, Ayyagari Ramlal, and Sahil Mehta	
The Role of Internet of Things (IoT) in the Containment and Spread of the Novel COVID-19 Pandemic	109
Ibrahim Babangida Mohammed and Salmi Mohd Isa	

Computational Intelligence in Prediction and Diagnosis of COVID-19

A Review on Predictive Systems and Data Models for COVID-19 123
Fatima Nazish Khan, Ayesha Ayubi Khanam, Ayyagari Ramlal,
and Shaban Ahmad

A Comparative Study of the SIR Prediction Models and Disease Control Strategies: A Case Study of the State of Kerala, India 165
K. Reji Kumar

Computational Intelligence Approach for Prediction of COVID-19 Using Particle Swarm Optimization 175
R. S. M. Lakshmi Patibandla and V. Lakshman Narayana

COVID-19 Insightful Data Visualization and Forecasting Using Elasticsearch 191
Hemant Kumar Tewtia and Deepti Singh

Computational Intelligence Methods for the Diagnosis of COVID-19 207
Sarra Akermi, Subrata Sinha, Surabhi Johari, Sunil Jayant,
and Anshul Nigam

Rapid Computer Diagnosis for the Deadly Zoonotic COVID-19 Infection 225
Peter Mudiaga Etaware

Computational Intelligence Methods in Medical Image-Based Diagnosis of COVID-19 Infections 251
Abdullahi Isa

Computational Intelligence in Drug Design and Drug Repurposing

Computational Intelligence in Drug Repurposing for COVID-19 273
Manish Kumar Tripathi, Sujata Sharma, Tej P. Singh, A. S. Ethayathulla,
and Punit Kaur

COVID-19: Hard Road to Find Integrated Computational Drug and Repurposing Pipeline 295
Ankita Sahu, Sahar Qazi, Khalid Raza, and Saurabh Verma

Computational Intelligence in Vaccine Design Against COVID-19 311
Kaushik Kumar Bharadwaj, Ankit Srivastava, Manasa Kumar Panda,
Yengkhom Disco Singh, Rojali Maharana, Kalicharan Mandal,
B. S. Manisha Singh, Dipanjali Singh, Mohinikanti Das, Devasish Murmu,
and Sandeep Kumar Kabi

Big Data, Intelligent IoMT, and Image Processing to Combat COVID-19

Big Data Analytics for Understanding and Fighting COVID-19 333
Sandhya Verma and Rajesh Kumar Gazara

IoMT Potential Impact in COVID-19: Combating a Pandemic with Innovation 349
Mohd Faizan Siddiqui

Advances in Intelligent Based Internet of Medical Things (IoMT) for COVID-19: Olfactory Disorders 363
V. Evelyn Brindha and X. Anitha Mary

Integrating M-Health with IoMT to Counter COVID-19 373
Devansh Sharma, Ali Zaid Bin Nawab, and Mansaf Alam

Digital Image Analysis Is a Silver Bullet to COVID-19 Pandemic 397
Sakshi Aggarwal, Navjot Singh, and K. K. Mishra

Non Linear Tensor Diffusion Based Unsharp Masking for Filtering of COVID-19 CT Images 415
S. N. Kumar, A. Lenin Fred, L. R. Jonisha Miriam, Parasuraman Padmanabhan, Balazs Gulyas, and H. Ajay Kumar

Editor and Contributors

About the Editor

Dr. Khalid Raza is Assistant Professor in the Department of Computer Science, Jamia Millia Islamia (Central University), New Delhi. He has been honored with “ICCR Chair Visiting Professor” at the Faculty of Computer & Information Sciences, Ain Shams University, Cairo, Egypt. He has over 10 years of teaching and research experience in the field of computational intelligence and its various applications. He has contributed over 70 research articles in reputed journals and edited books, including one sole-authored book, and he has reviewed over 150 research articles for reputed journals/conferences in the last 5 years. He has delivered several keynote addresses, invited talks, public lectures and seminars in national and international conferences, workshops and chaired technical sessions at various conferences. He has also executed two Indian government-funded research projects. He is Member of MIR Labs (USA), CSI (India) and SCRS (India). His research interest includes computational intelligence methods and its applications in bioinformatics, viro-informatics and health informatics.
